ABOUT THE PROJECT

This project required us to conduct user research to identify the needs, behaviours, and pain points of the target audience and use that evidence to inform design decisions.

Design a functional, interactive mobile application prototype in Figma that adheres to the Eduvos CI guidelines.

Build a structured, styled, and responsive app landing page using HTML, CSS, Bootstrap 5, and Adobe Dreamweaver.

Compile and present a professional digital portfolio that documents the complete design-to-code process, from research through to the final build.

AI Use Disclosure

I have dyslexia and used chatgpt as an assistive tool to help correct spelling, grammar, and punctuation throughout this portfolio. All concepts, research, creative decisions and project development are my own. chatgpt was used solely to improve the clarity and readability of my written work.

Research

Research

Target audience :

The target audience for this app is first-year Eduvos students at Tyger Valley.

Purpose of the app :

The purpose of this app is to make it easier for students to navigate a new environment. In this case, the app is designed to help first-year students find their way around the Eduvos Tyger Valley campus. It aims to ease the pressure and reduce the intimidation that can come with navigating an unfamiliar campus by helping students locate important facilities such as classrooms, bathrooms, student advisor offices, IT offices, computer labs, the library, and other campus facilities.

Research

UI TRENDS - relevant to this app

01 AI collaboration

I have noticed that a lot of apps and websites have adopted this feature, using AI as a chatbot. This could work well for the wayfinding app, as users who need help could ask the chatbot for assistance. In order to implement this, one would need to use an API key, an HTTP client, and a system prompt.

02 Purposeful Motion, Not Decorative Animation

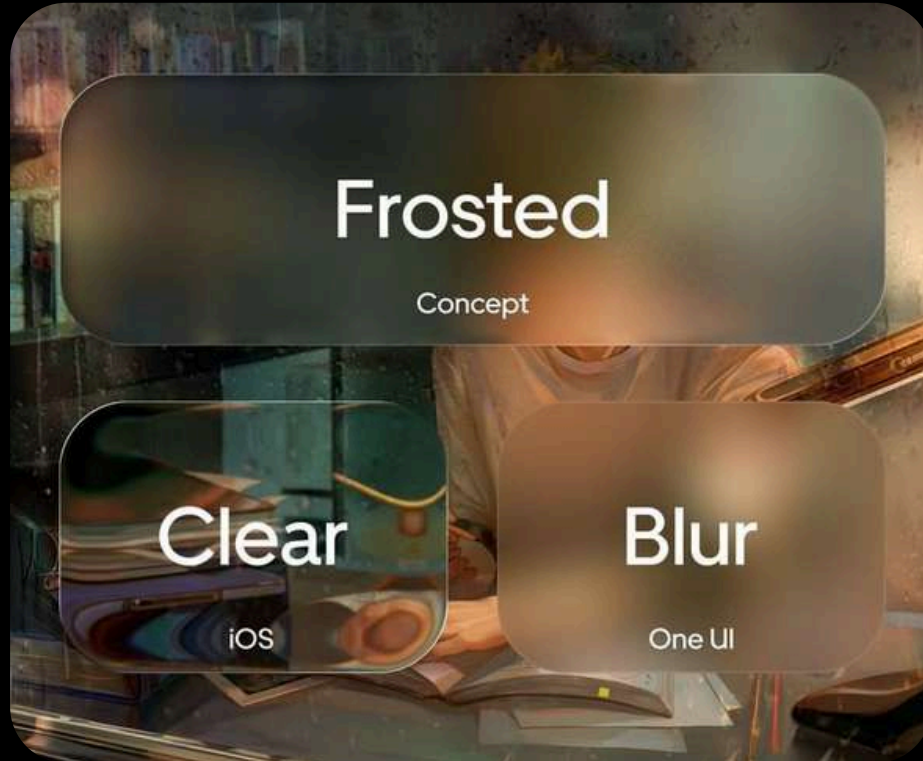

The animation needs to feel purposeful rather than being used purely for decoration. The example above shows two submit buttons. With the first button, when the user clicks it, a loading symbol appears for a few milliseconds before disappearing. With the second button, the loading symbol remains on screen for slightly longer, making the user feel that the form is actually being submitted successfully.

Research

UI TRENDS

03 glassmorphasism

Glassmorphism gives the app a premium quality. It makes the app more engaging and interesting while also being visually appealing.

04 Crafted, Not Prompted :

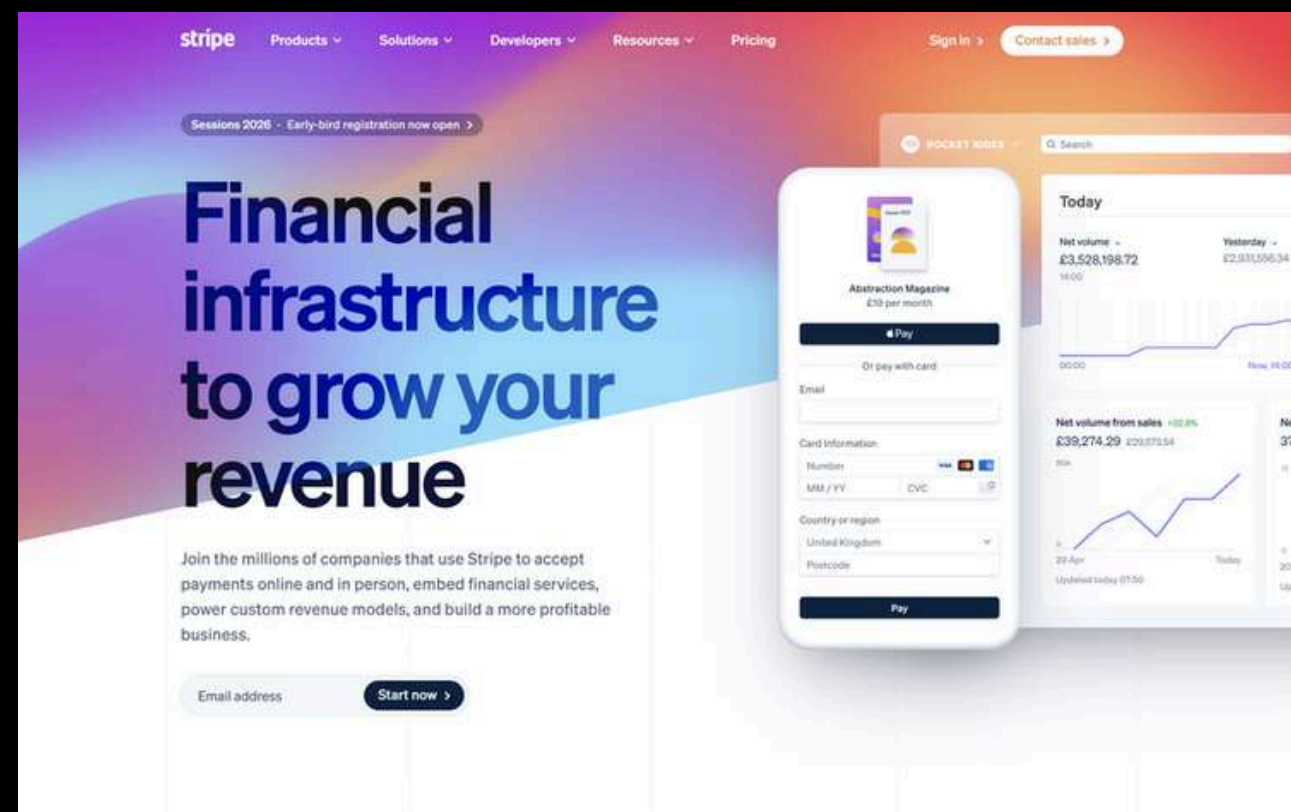

I've noticed an increase in ads where, after seeing the final version of the ad, I then see the same ad but with the behind-the-scenes version of how it was made. Companies are doing this to show that their ads were not created by AI, and the behind-the-scenes content often gets more interaction than the finalised ad itself.

I think this could be relevant to this app. This is just an idea, but instead of having the user navigate through the app using images and a traditional map, it could almost have a sketch-like appearance. This could make the app feel more approachable and less intimidating, while also making the university environment feel more familiar to new students.

Research

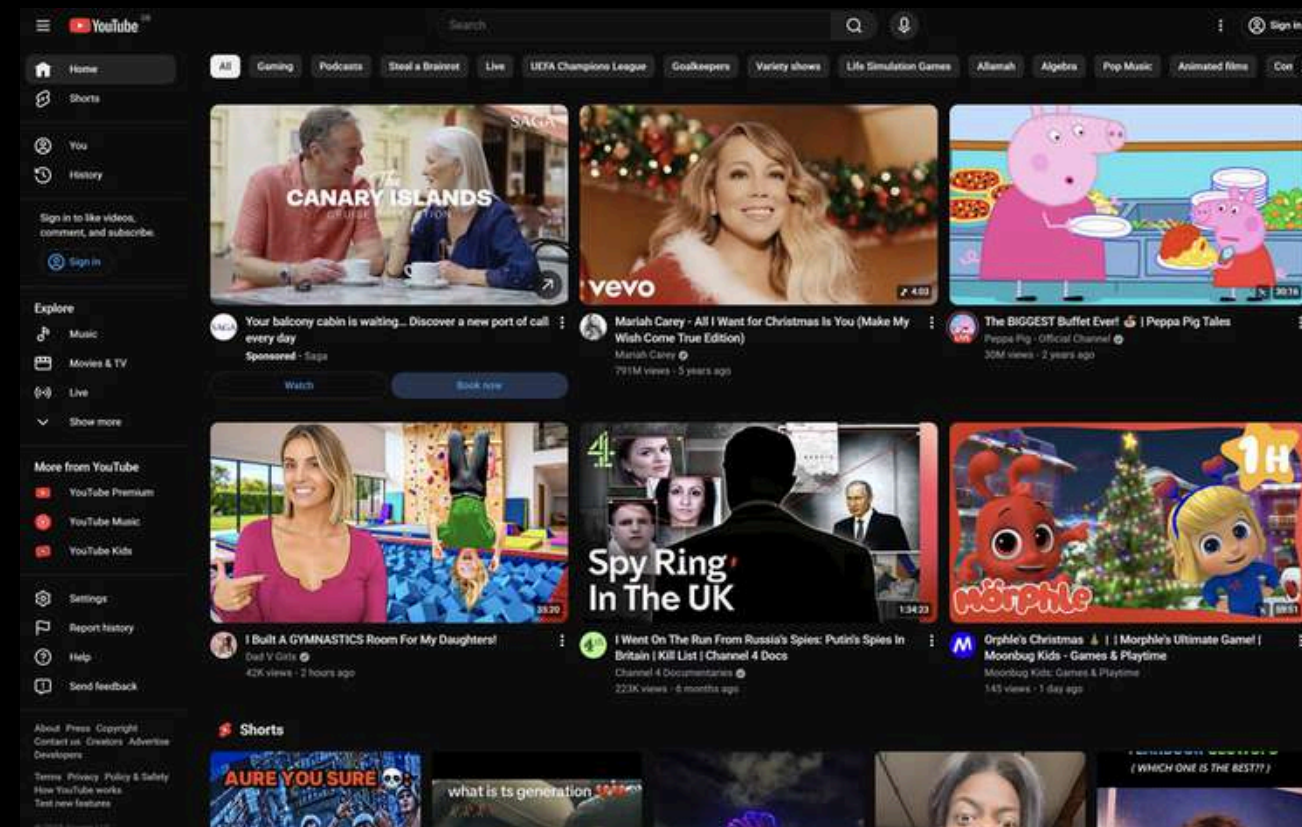

UI TRENDS

05 Neomorphism

Soft shadows and subtle gradients.

06 dark mode

Many people are choosing dark mode over light mode.

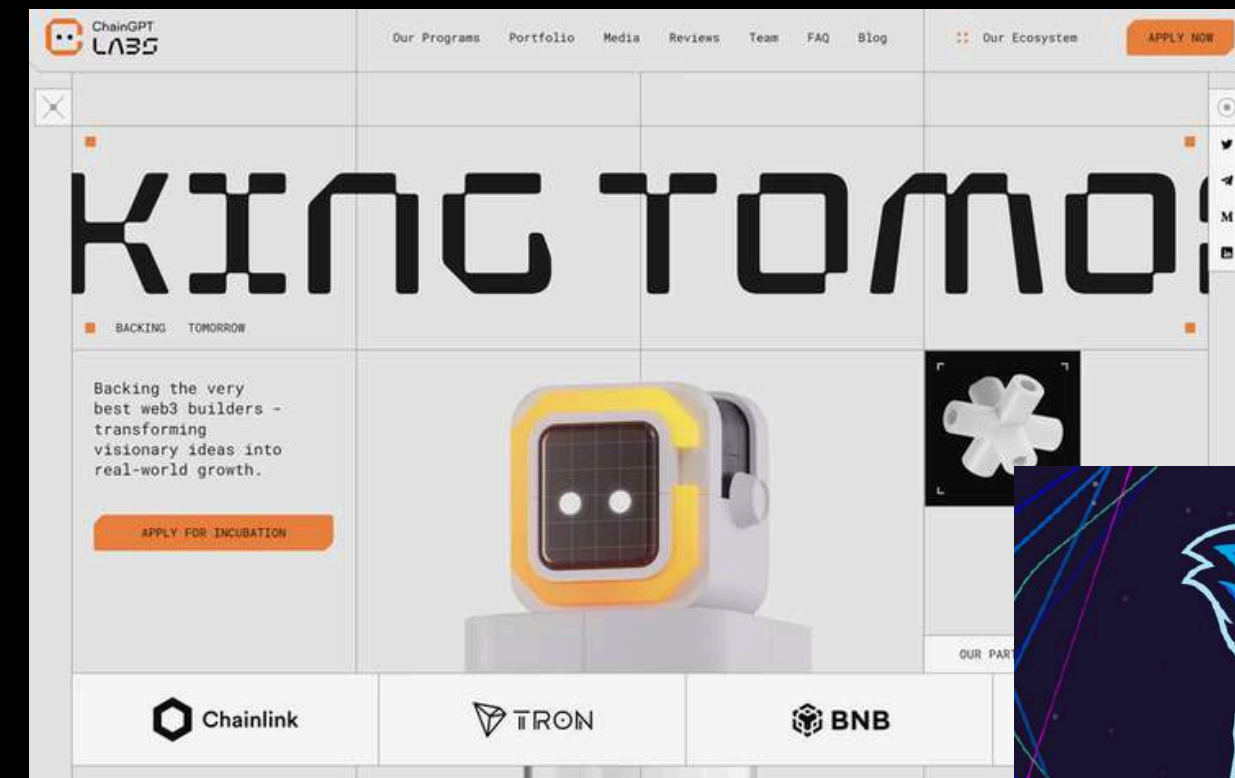

Research

UI TRENDS

07 bold typography

08 3D and Immersive elements

Although there is no official Eduvos mascot, I did find one for esports. However, a 3D Vossie mascot could be an interesting direction.

UX INSPIRATION

Card shuffling

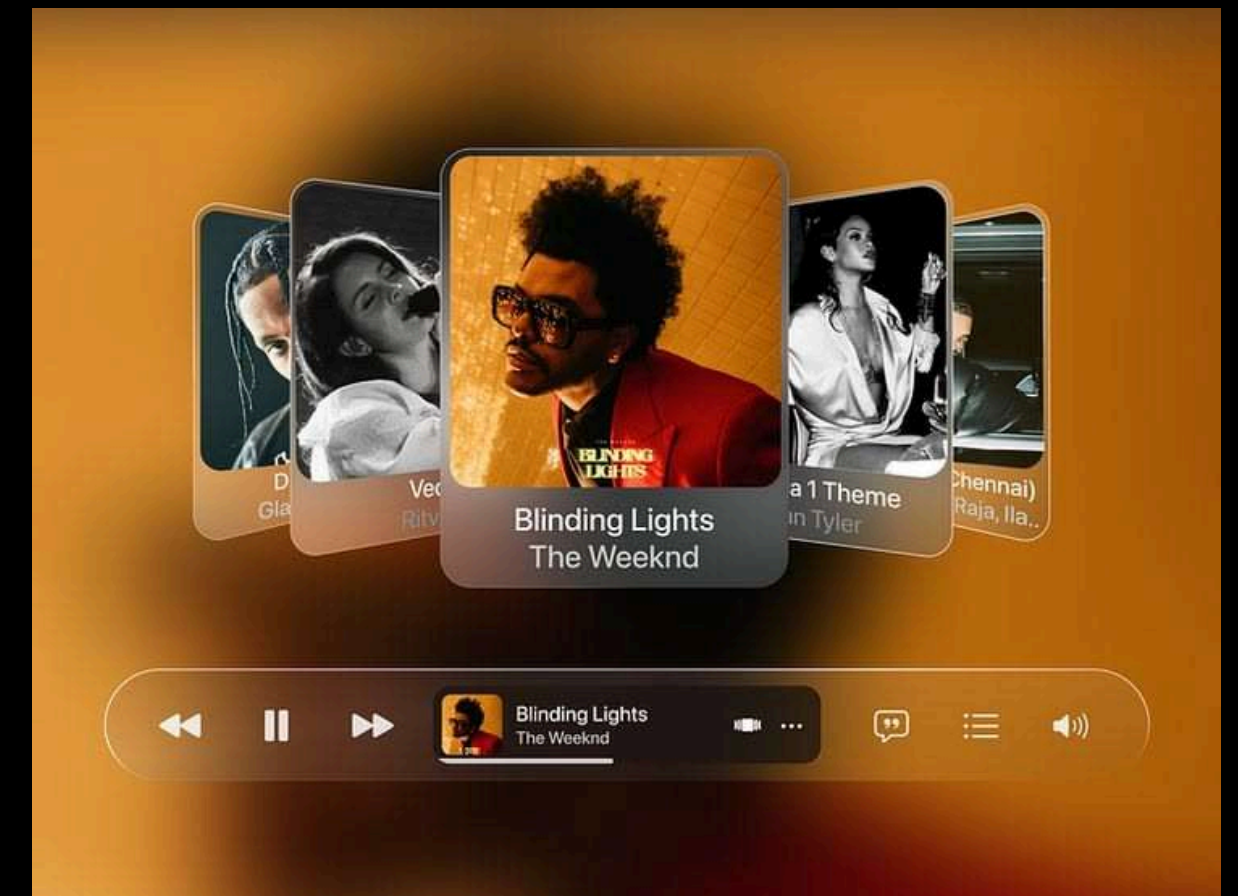

This could be a cool way to shuffle through the user's favourite or starred locations for quick access. The user could also have a "Next Class" section, where they can click into a folder and then select a location to view information relating to that location.

Favourite folders

Folder for saved locations.

shuffel

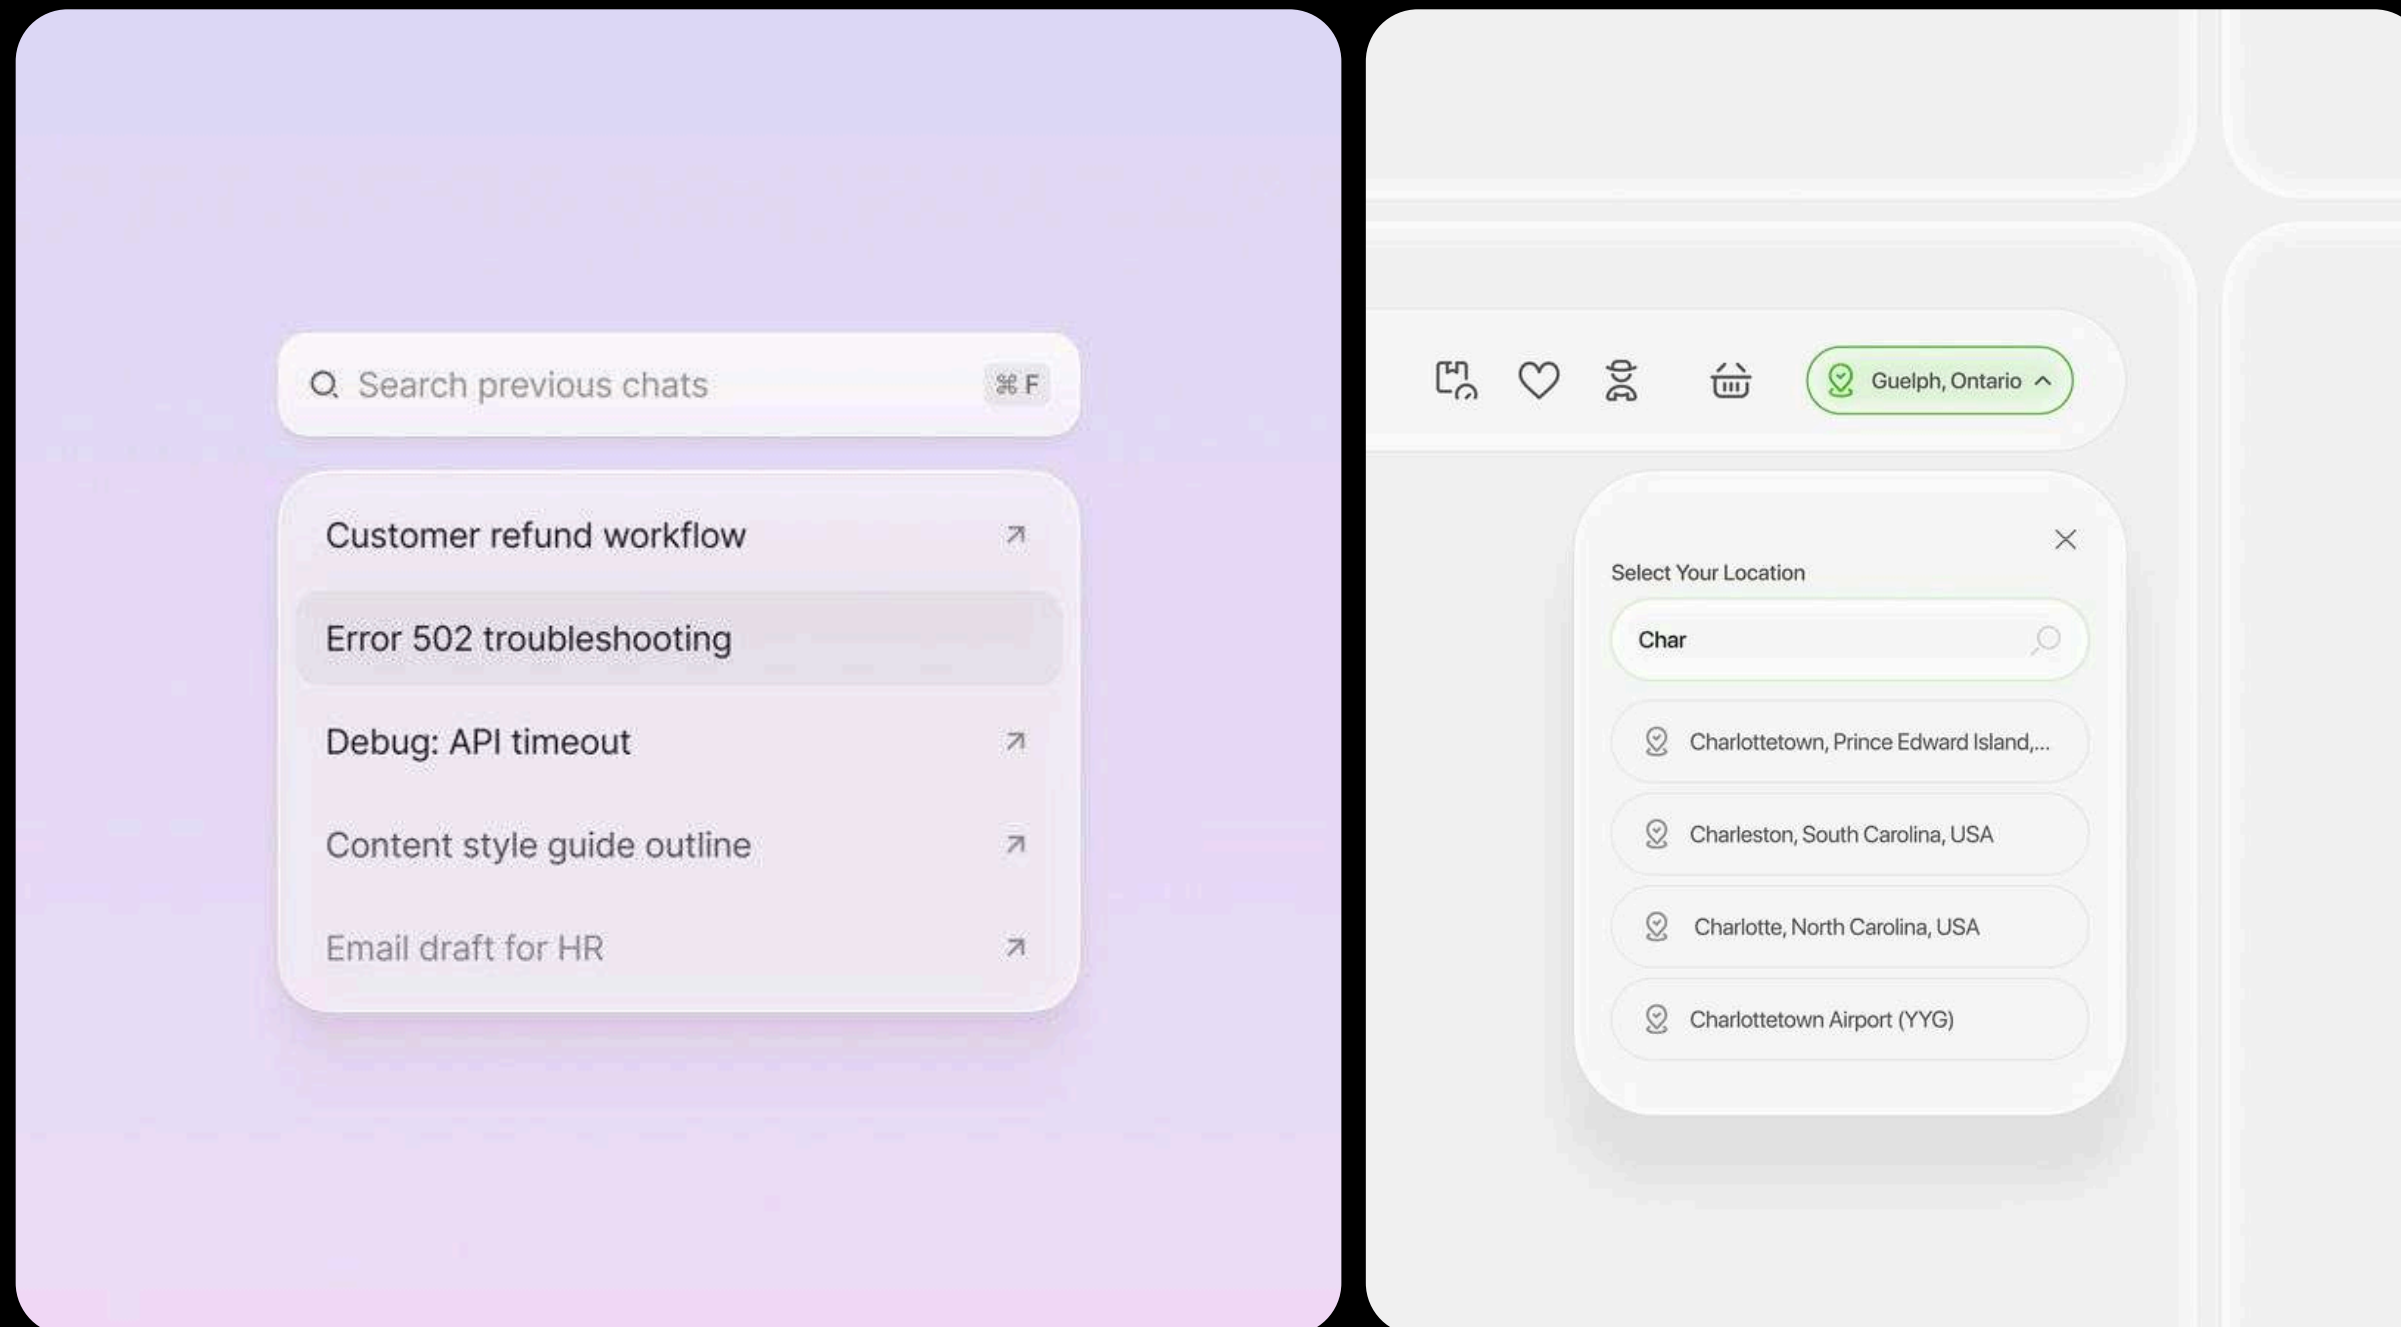

Shuffle through recent/most popular locations, such as the BIB, café, IT labs, first-floor bathroom, student advisor's offices, and reception.

ui inspiration cards

Initial concept

IDEA 1 - Having the map be interactive, using apps such as Polycam, Scaniverse, or Magicplan.

IDEA 2 - Having an interactive map where the map is a digital illustration, creating a live walkthrough of the campus instead of using photographs.

Questionnaire: ai general anylasis

“PROMPT FOR COPILOT

This is a questionnaire for a Level 2 Graphic Design Degree NQF Level 6, Students designing a Wayfinder app for new for new students. Analyse the feeedback from 22 respondents. Analyse general trends and suggestions for questions to interrogate.”

General Trends from Responses

- Year of study Majority are in their 2nd or 3rd year (59%), meaning they already have some campus familiarity. Only 5% are 1st years — the app should primarily target newcomers but also consider advanced students who still face challenges.
- Confidence navigating campus Many felt confident within 2–5 weeks. This shows the steepest learning curve happens early in the semester — the app should focus on onboarding during the first month.
- Orientation landmarks 86% use the cafeteria as their main landmark. This suggests central, high-traffic areas should anchor the app’s map design.
- Ease of finding classes Mixed ratings: Level 2 and 3 students struggled more than Level 4. This indicates that classroom numbering and block systems are confusing.
- Hardest locations to find SAA offices (23%) and lecture rooms (18%) were the biggest pain points. Administrative spaces are especially problematic.
- Navigation app usage 34% rarely or never use apps. Most rely on asking peers (23) or trial and error (23). This shows a cultural reliance on human help rather than digital tools.
- Biggest challenges Lack of signage and confusing stairs were common. Physical wayfinding infrastructure is weak, so the app must compensate.
- Desired app features Top requests: shortest routes & busy times (19), event notifications (11), live GPS (8). Students want real-time, practical utility.
- Download willingness Only 34% said yes — adoption is not guaranteed. The app must prove value beyond asking friends.
- Preferred navigation apps Google Maps dominates (48%). Students already trust its design and efficiency, so the Wayfinder app should emulate its simplicity.
- Barriers to use The biggest deterrent is a cluttered interface (22). Clean, minimal design is critical.

Questionnaire: what it means for my design

Students use landmarks to orientate themselves, so I will add the most popularly searched places, such as the cafeteria. This means that when students are first starting to use the app, they can always return to a familiar landmark, such as the cafeteria, to help orientate themselves.

Students also stated that they find lecture rooms and SAA offices the hardest to find. Therefore, I will implement timetable navigation, where the student's timetable will be linked to the app. When a class is coming up, students can click on their timetable, select the class they need to attend, and the app will guide them directly to the classroom. They do not need to think about which floor the classroom is on; they can simply follow the map.

For the SAA offices, I will include their directions in the "Most Popularly Searched" section.

Students stated that they wanted the shortest route, busy times, and live GPS to be included.

Students also noted that they preferred Google Maps over other navigation apps because of features such as the current location indicator, knowing the distance, and the ability to save places. Therefore, for my wayfinding app, I will incorporate live location tracking, distance information, and the ability to save places.

Students stated that the main reasons they would delete the app are if it feels cluttered, confusing, or has a difficult interface.

Therefore, I will use a clean, modern, and simple UI design while also incorporating popular UI trends to enhance the overall user experience.

Personas

THE USER

NAME : *Conner du Pelssis*

QUALIFICATION : *Graphic Design / Humanities*

YEAR : *First year*

AGE : *21 yo*

GOALS :

- *Find classrooms quickly*
- *Feel more confident navigating the campus*
- *Arrive on time for lectures*

NEEDS :

- *Simple search function*
- *Clear campus map*
- *Estimated walking times*

FRUSTRATIONS :

- *Doesn't know building names*
- *Doesn't want to ask strangers for directions*
- *Gets lost between lectures*

Conner Du Plessis : Journey map

Stage	User Actions	Thoughts & Feelings	Opportunities
Before arriving	Opens V-way to find today's lecture venue.	"I hope I don't get lost on my first day."	Simple search bar and timetable integration.
Searching	Searches for his classroom.	"Where is Building a?"	Predictive search with building names and lecture rooms.
Navigating	Follows walking directions.	"This is much easier than reading a campus map."	Turn-by-turn navigation with live location.
Arriving	Reaches lecture before it starts.	"I made it on time!"	Arrival confirmation and estimated walking time.
Afterwards	Saves the lecture room as a favourite.	"Next time will be even easier."	Favourite locations and recent destinations; favourite folders, similar to playlists.

THE USER

NAME : *Abby Stront*

QUALIFICATION : *Educatation*

YEAR : *First year*

AGE : *19 yo*

GOALS :

- *Navigate the campus independently*
- *Find accessible entrances and exits with ease*

FRUSTRATIONS :

- *Asking others for directions makes her feel dependent*
- *Elevators can be difficult to find*

NEEDS :

- *Accessible route navigation*
- *Step-by-step navigation that avoids stairs*

ABOUT:

Abby actively uses a wheelchair and needs to know where all the elevators are to get to class. This is also her first year, so although she is excited, she is extremely nervous too.

Abby Stront : Journey map

Stage	User Actions	Thoughts & Feelings	Opportunities
Before arriving	Enables an accessible route.	"I hope there aren't any stairs."	Accessibility settings during onboarding.
Searching	Searches for her lecture venue.	"I need to know if there's an elevator."	Display elevators, ramps and accessible entrances.
Navigating	Follows an accessible route.	"I'm glad it avoided the stairs."	Route better for wheelchair users.
Arriving	Uses the elevator to reach class.	"That was stress-free."	Accessible floor navigation.
Afterwards	Saves the route.	"I'll use this route again."	Favourite accessible routes saved in a folder.

THE USER

NAME : *Leon Smith*

QUALIFICATION : *Business*

YEAR : *First year*

AGE : *22 yr*

GOALS :

- *Get to lectures on time*
- *Find the quickest routes between classes*
- *Make the most of limited time on campus*
- *Locate nearby study areas between lectures and work shifts*

FRUSTRATIONS :

- *Tight schedule between classes and work*
- *Wastes time looking for lecture venues*
- *Stress increases when running late*
- *Doesn't have time to ask for directions*

NEEDS :

Leon is a first-year student who works part-time. He needs to know where the parking spots are and manage his time effectively so that he can quickly get to class and leave for work on time.

ABOUT:

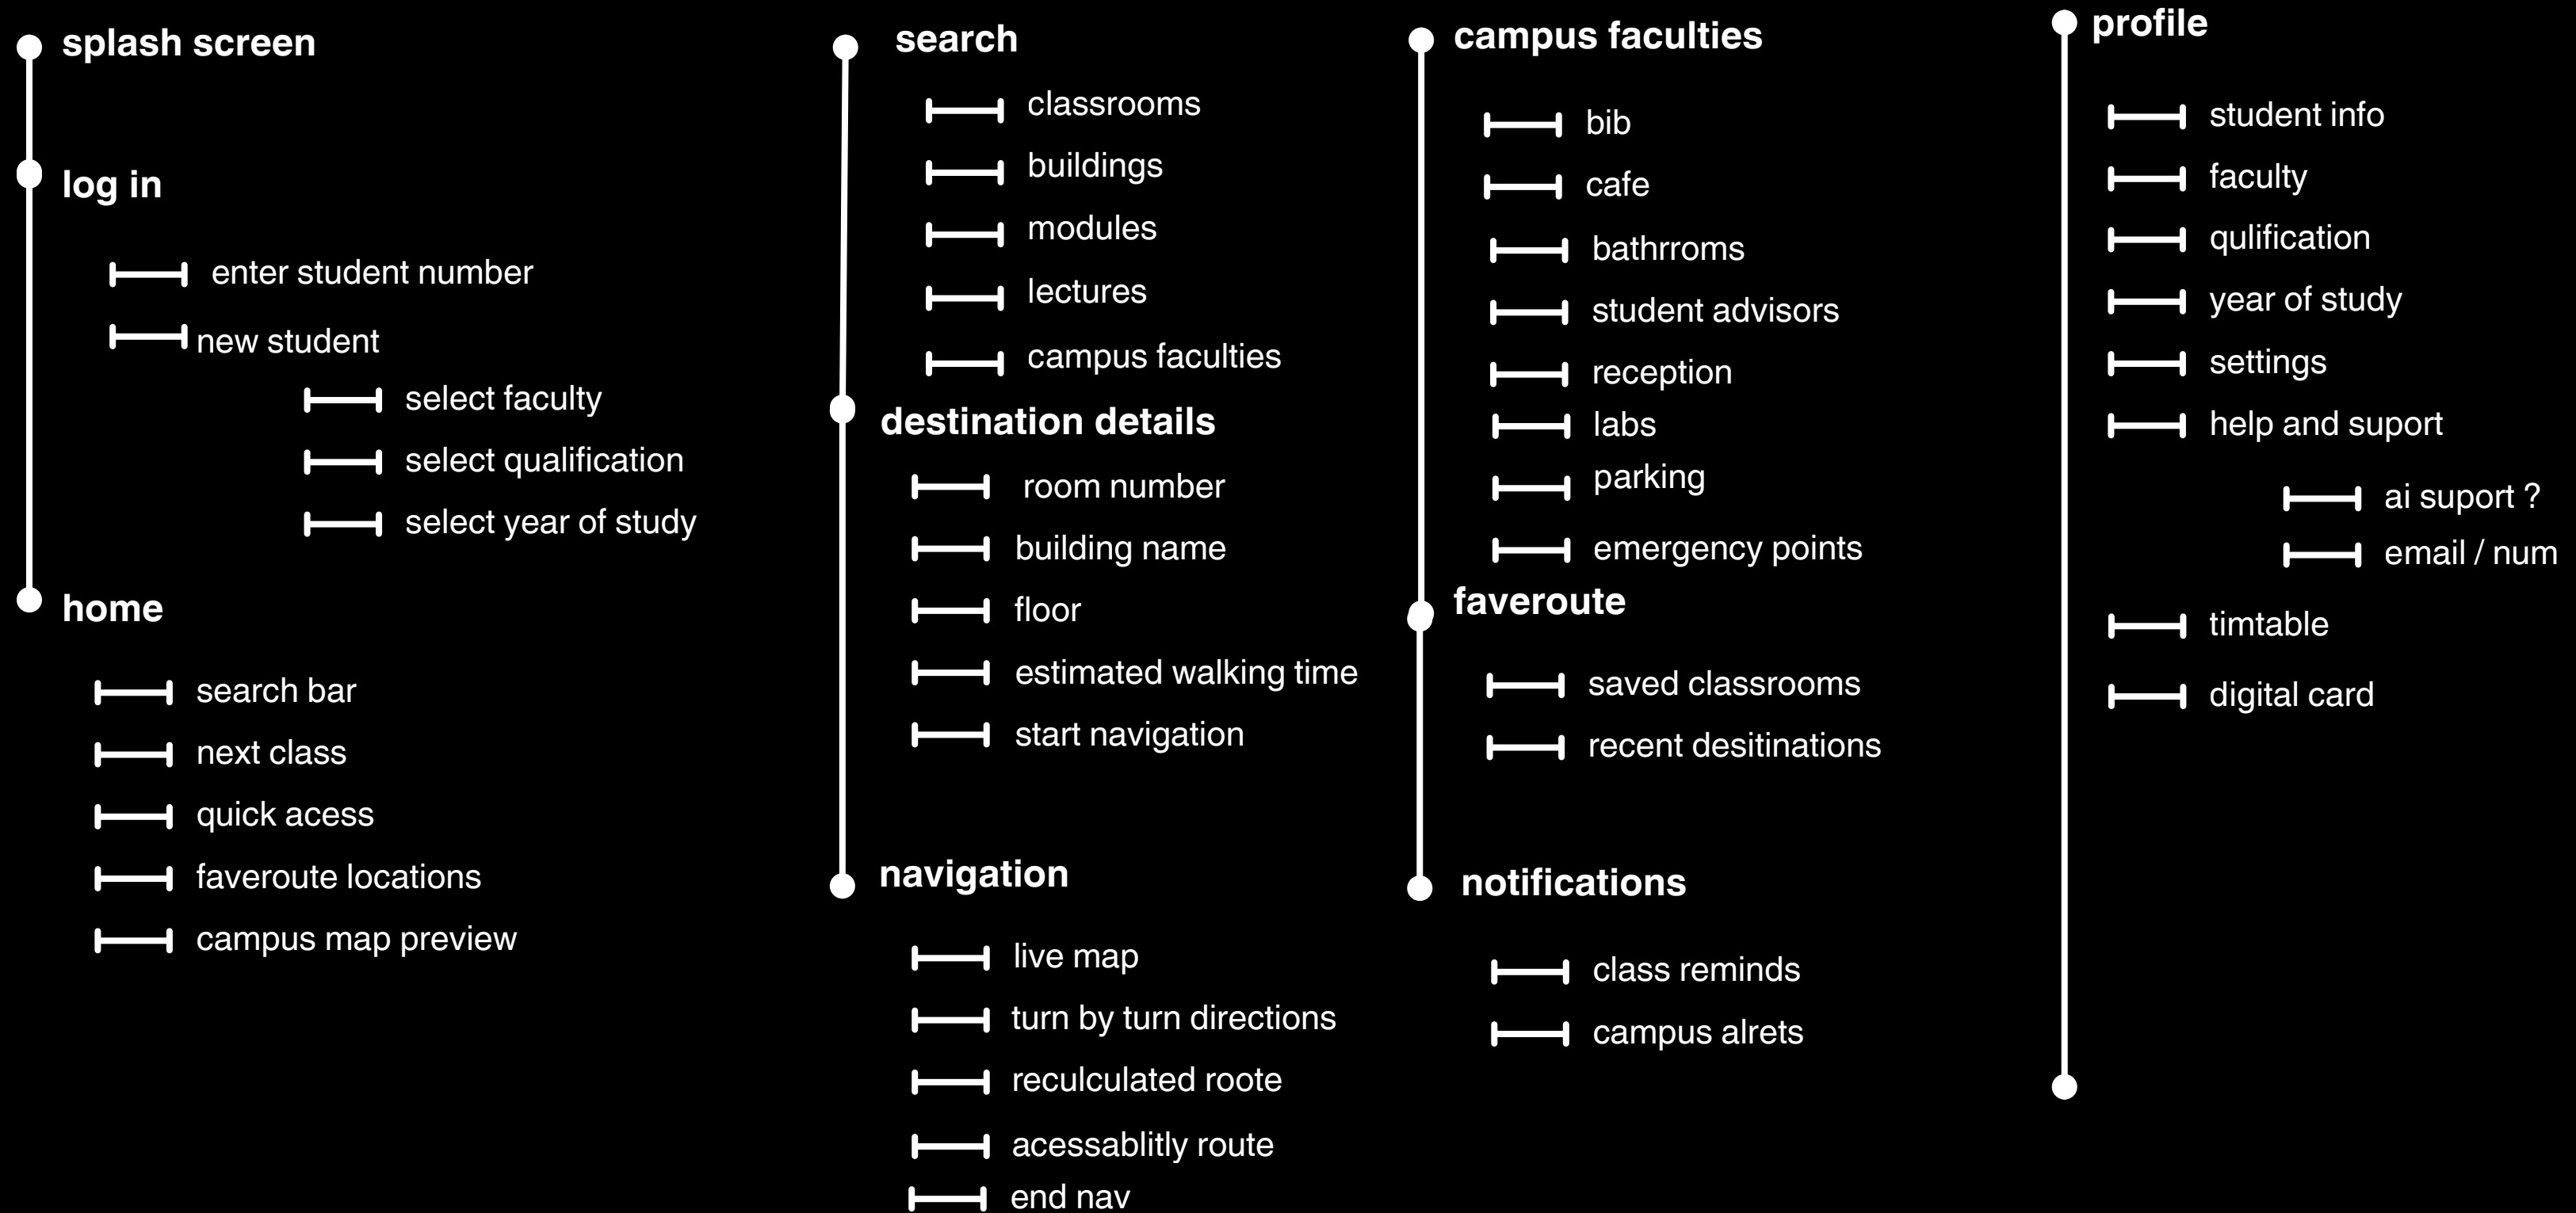

- *Save favourite locations for quick access.*
- *Need to know where parking locations are.*
- *Maybe we can add the digital card to this app.*

leon smith : Journey map

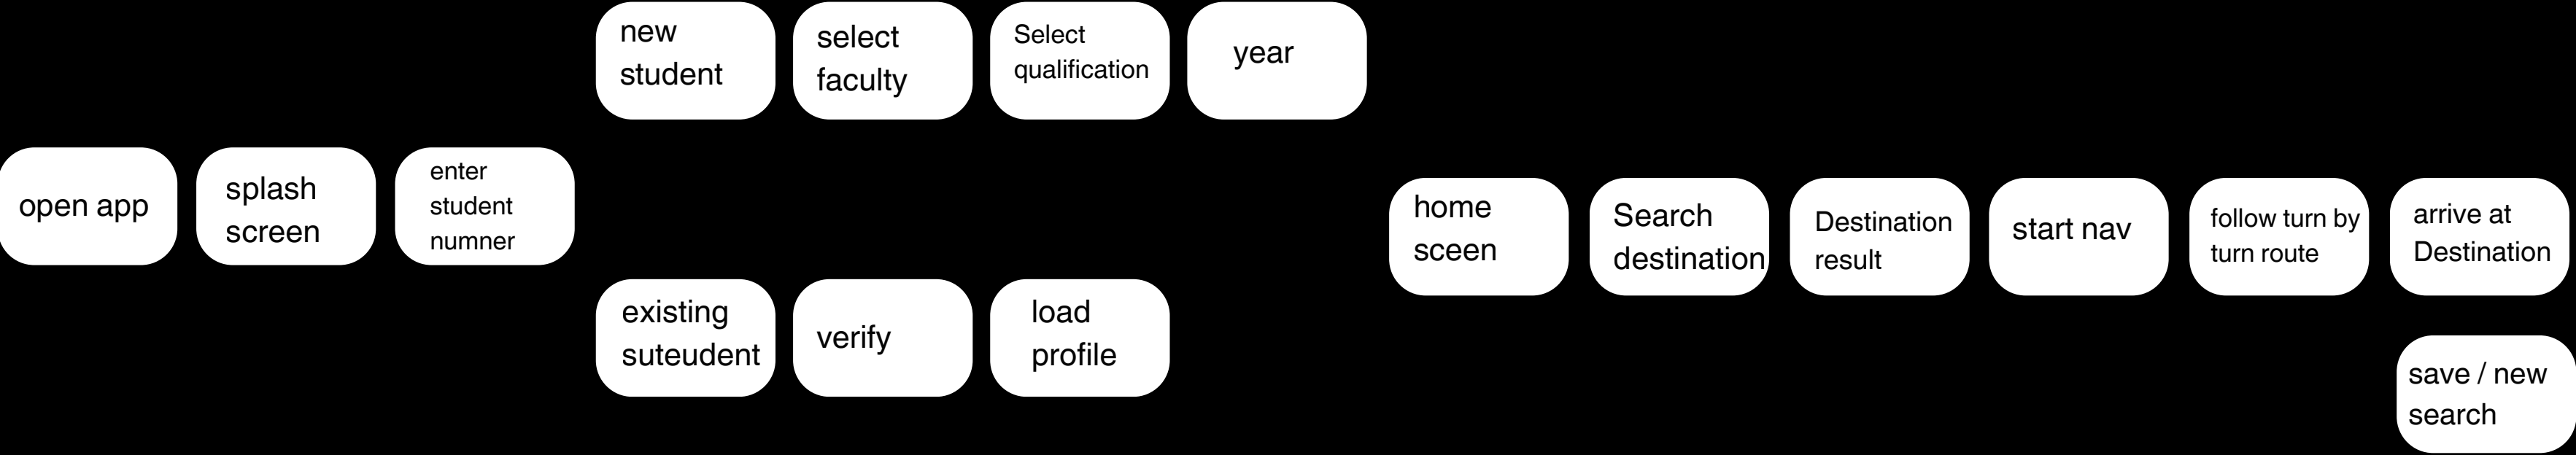

Stage	User Actions	Thoughts & Feelings	Opportunities
Before arriving	Opens WayFinder before reaching campus to check parking availability.	"I hope I don't waste time looking for parking."	Real-time parking availability with colour-coded parking lots.
Searching	Sees his preferred parking lot is full and selects another nearby lot with available spaces.	"Good thing I checked before I arrived."	Live parking occupancy updates and alternative parking suggestions.
Navigating	Follows directions to the recommended parking area, then walks to his lecture.	"This route is much quicker."	Navigation from parking lot to lecture venue with estimated walking time.
Arriving	Parks successfully and reaches class on time.	"I made it with time to spare."	Arrival notifications and route reminders.
Afterwards	Saves his preferred parking lot and lecture building for future trips.	"This will save me time every morning."	Favourite parking areas, saved destinations, and personalised route suggestions.

Brand identity

COLOUR PALLET

Our Brand Colour Palette

A new, distinct brand color palette allows for endless visual diversity in our brand expressions. It consists of a harmonious range of blues that, when used together, create a palette that is unmistakably Eduvos.

Heritage & Future Blue

Heritage Blue and Future Blue are the core of our palette, symbolizing our balance between tradition and progress. Heritage Blue serves as the anchor, providing trust and stability, while Future Blue adds energy and modernity. They work best together, with Heritage Blue as the dominant color and Future Blue enhancing it.

Analogous Blues

The secondary blues expand the palette with harmonious shades that complement the primary colors. These analogous tones add depth and variety, serving as accents to enrich layouts while keeping Heritage Blue and Future Blue as the focus.

Heritage Blue

RGB: 21, 48, 93
CMYK: 100, 70, 10, 30
HEX: #15305D

Future Blue

RGB: 41, 171, 226
CMYK: 75, 23, 2, 0
HEX: #29ABE2

Veritas Gold

Design a Frosted Glass Effect using HTML and CSS - GeeksforGeeks

HTML CHEAT SHEET

Template

```
<html>
<head>
<title></title>
Meta Tags
CSS
JavaScript
</head>
<body>
Content
</body>
</html>
```

CSS Media

```
all
handheld
print
projection
screen
```

Meta Types

```
http-equiv
name
```

Lists

```
<ol>
<li>
</li>
</ol>

<ul>
<li>
</li>
</ul>
```

SYNTAX

Basic

HTML: <tag></tagclose> or <tag>
XHTML: <tag></tagclose> or <tag />

With an Attribute

HTML: <tag attribute="?">
XHTML: <tag attribute="?" />

BASIC

<body> the visible portion of the page
<head> portion not displayed on the page
<html> creates a html page
<title> shows the page name in the title bar

LINKS

* displays an image
* link to anchor in current document
* link to another document
* link to anchor in another document
* email link

STRUCTURE

* line break
<code> source code listing
<div> Formats structure or block of text
 italic text
<h1>...<h6> page headings from largest to smallest
<hr> horizontal rule
<p> paragraph
<pre> preformatted text
 inline formatting
 bold text
<sub> subscript text
<sup> superscript text

FRAMES

<frame> defines a single frame
<frameset> frame document
</frameset> inline frame

HEAD

<link rel="stylesheet" href="?" type="text/css">* external CSS link
<script language="JavaScript" type="text/javascript"> embedded javascript
<meta http-equiv="content-type" content="?" charset="?">* meta information

TABLES

<caption> table caption
<table> defines a table
<tbody> body section of the table
<td> table cell
<td colspan="?"> number of columns cell spans
<td rowspan="?"> number of rows cell should spans
<tfoot> footer section of the table
<tr> table header cells
<th colspan="?"> number of columns table header cell spans
<thead> the header section of the table
<tr> table row

LISTS

<dd> definition
<dl> definition list
<dt> definition term
 item in a list
 ordered list
 unordered list

FORMS

<form> defines a form
<fieldset> group of related form items
<input type="?">* form element (see input types at right)
<option> menu item in a select box
<select> drop-down list
<textarea> multi-row text area

SPECIAL CHARACTERS

 non-breaking space
" quotation mark
& ampersand
< less than sign
> greater than sign

changed fornt to larkern

Phase2_Exercise1

website skeleton

Rationale

SUMMATIVE

FEEDBACK INTO A CHECK LIST

01 ~~Full questionnaire + research findings (added in portfolio)~~

02 ~~Connect research → actual design decisions (added in portfolio)~~

03 ~~Proofread and organise portfolio (added in portfolio)~~

04 ~~Add "Try the App" + working Figma link~~

05 ~~Change fonts: Larken headings / Cocogoose body~~

06 ~~improve screen-by-screen/user-flow explanations (added in portfolio)~~

07 ~~Add prototype testing + refinements~~

08 ~~Add responsive screenshots + labelled breakpoints~~

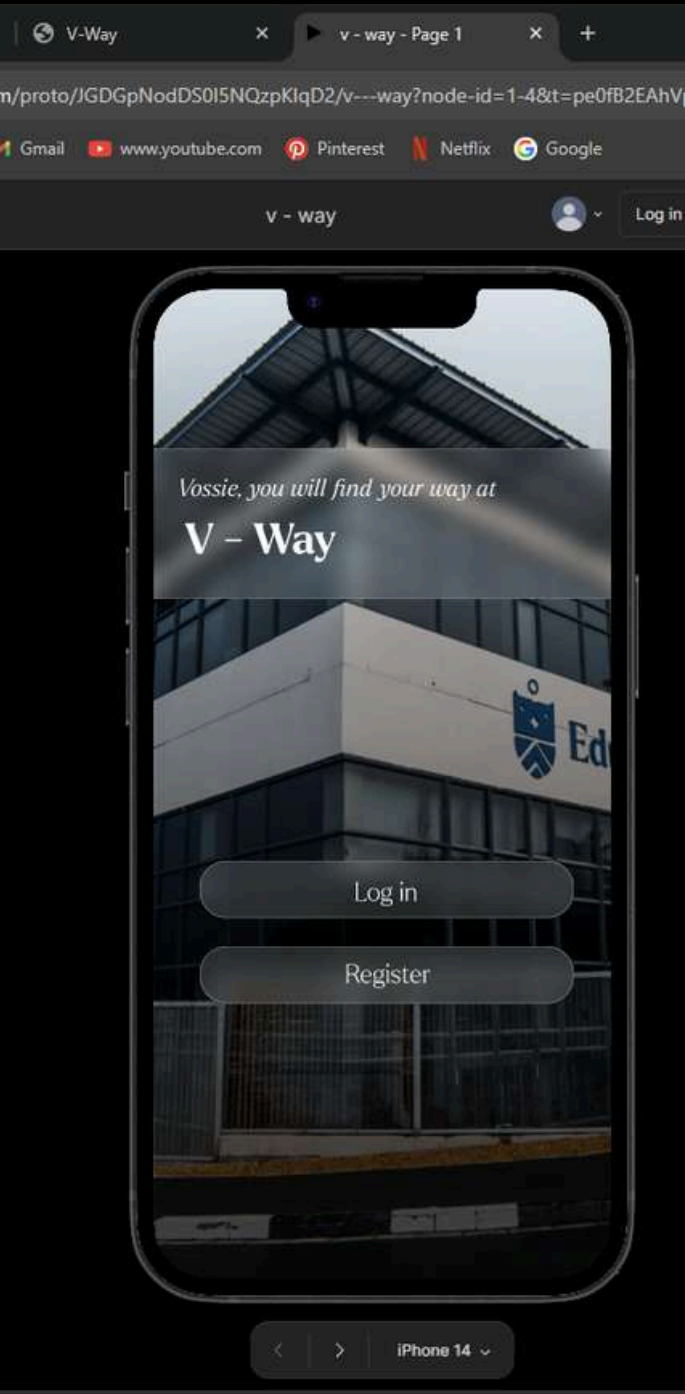

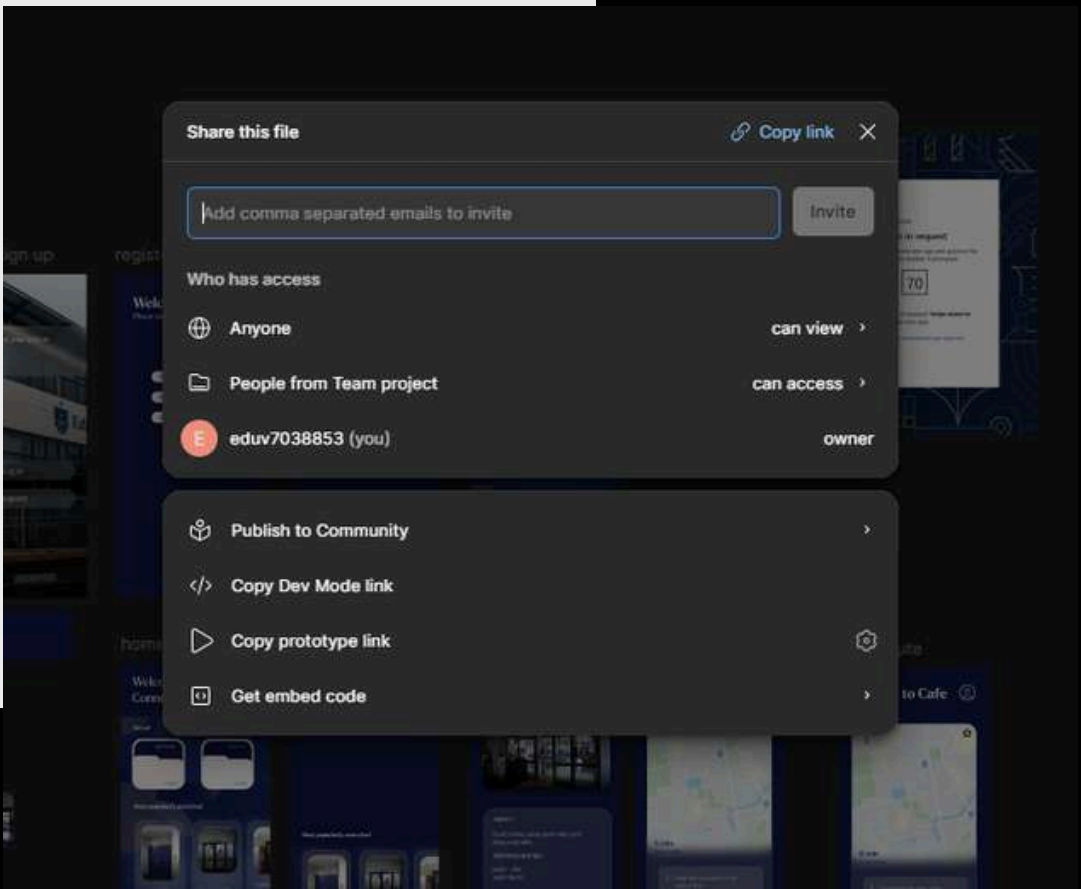

09 ~~Align coded landing page more closely with Figma~~

Add "Try the App" + working Figma link

```
<p>V-way helps vossies navigate there way around campus,pressure and stress free. Find your way quickly and painlessly now with V-way</p>
  <a href="https://www.figma.com/proto/JGDGpNodDS0I5NQzpKIqD2/v---way?node-id=0-1&t=pe0fB2EAhVpQI5JF-1" traget="_blank">
    Try Now|
  </a>
</div>
</section>
```

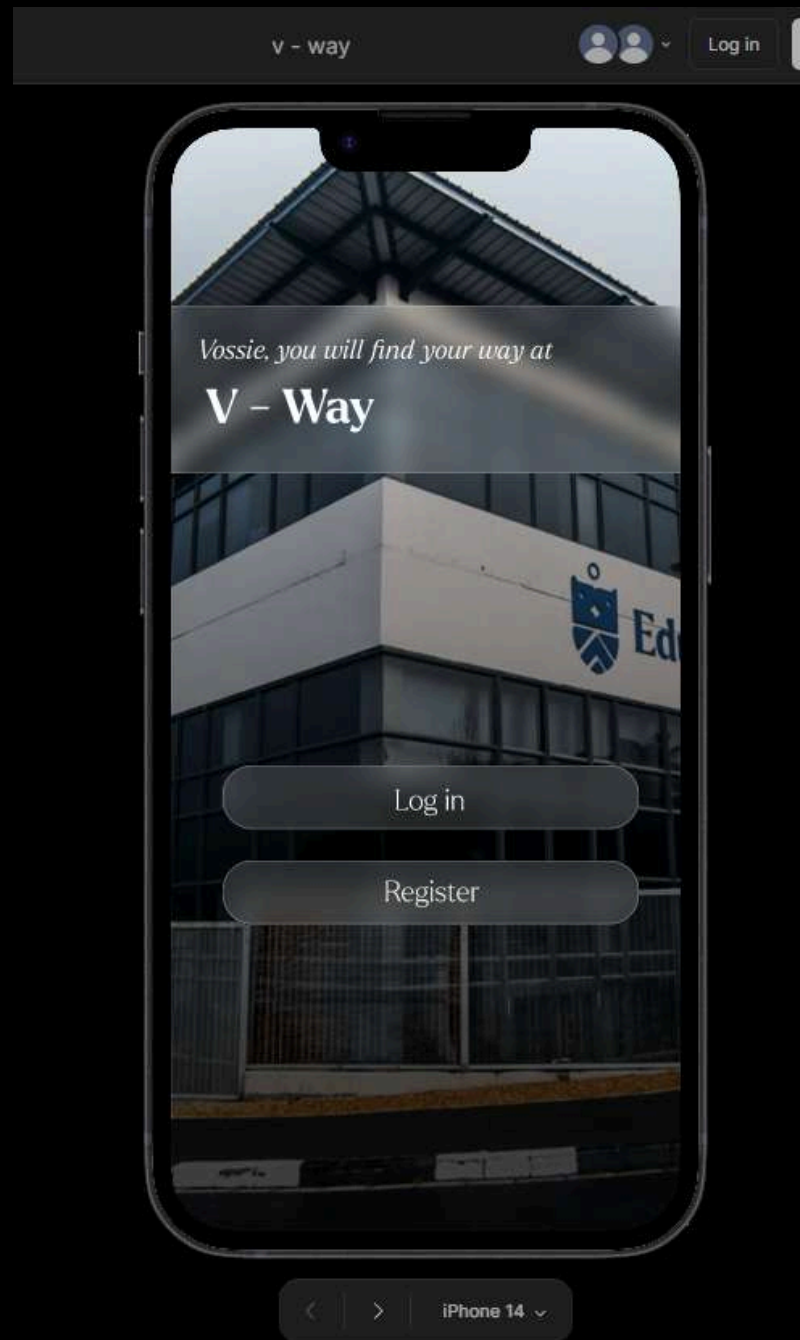

I have no idea why my link isn't opening up.

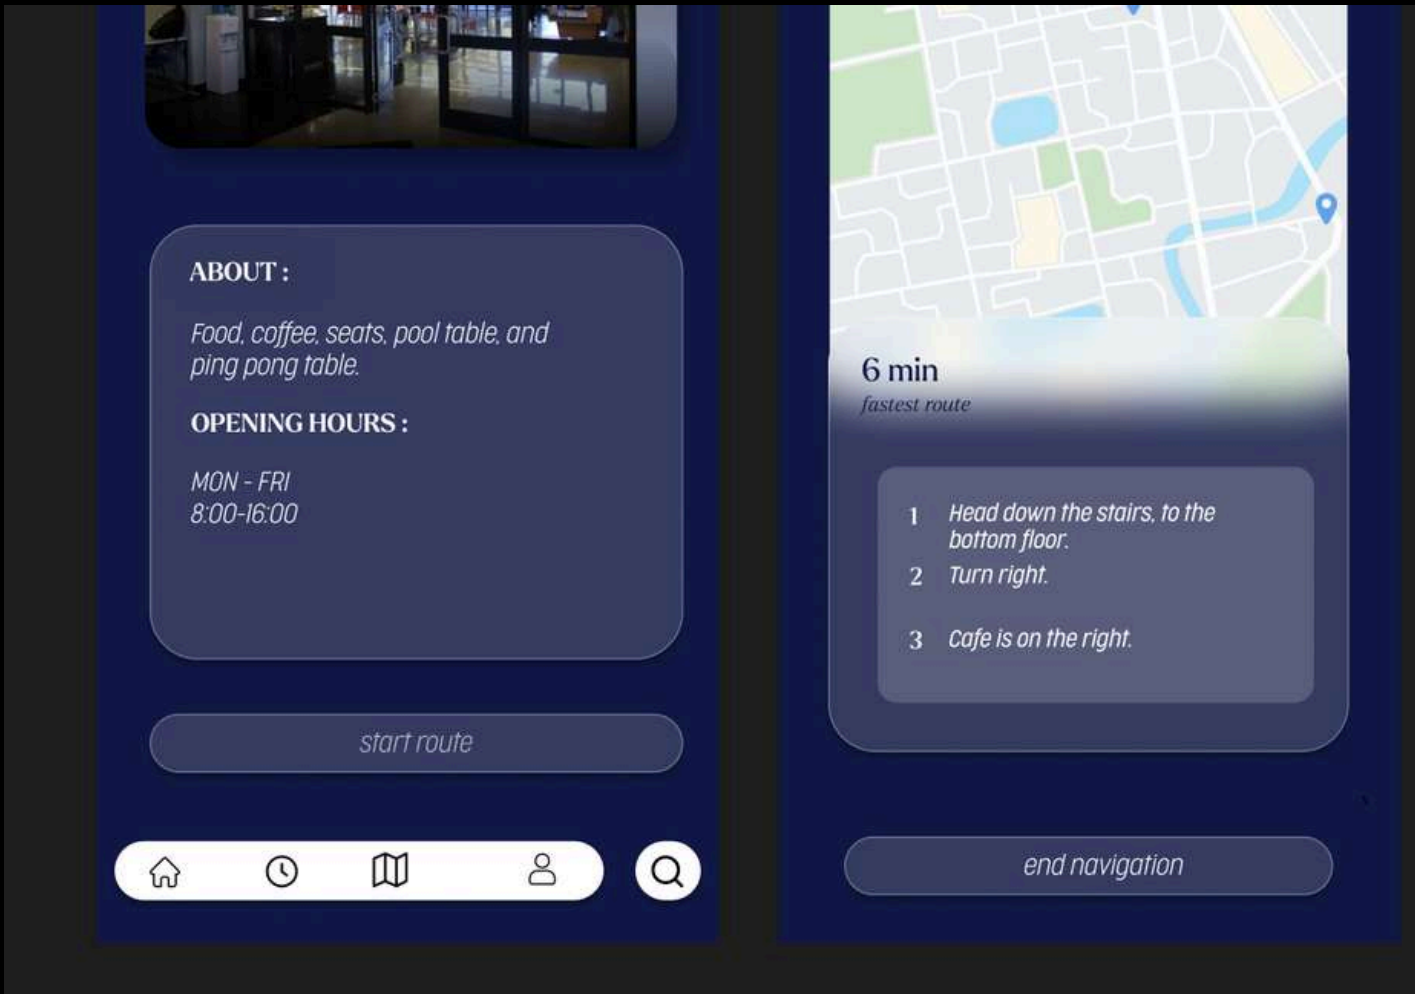

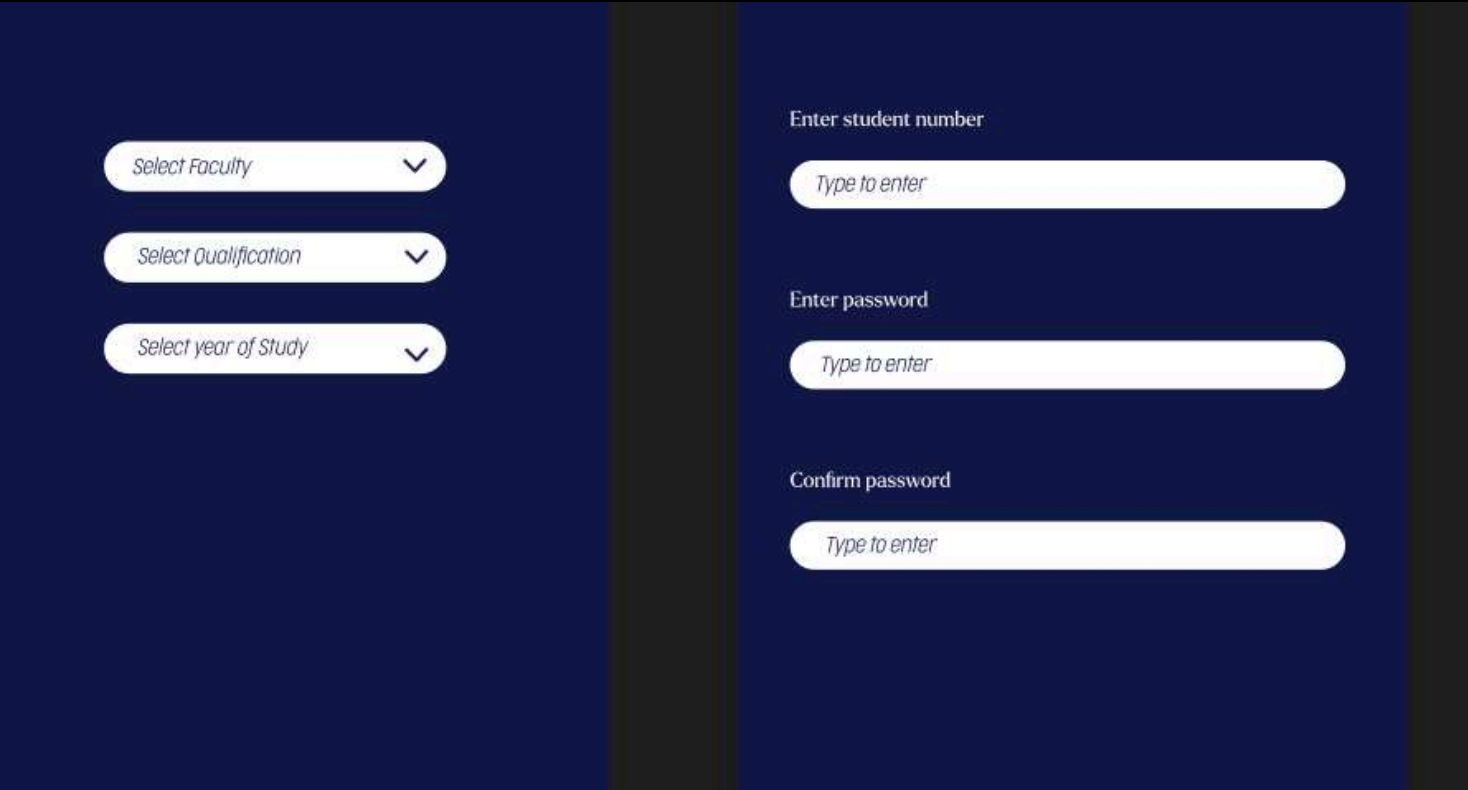

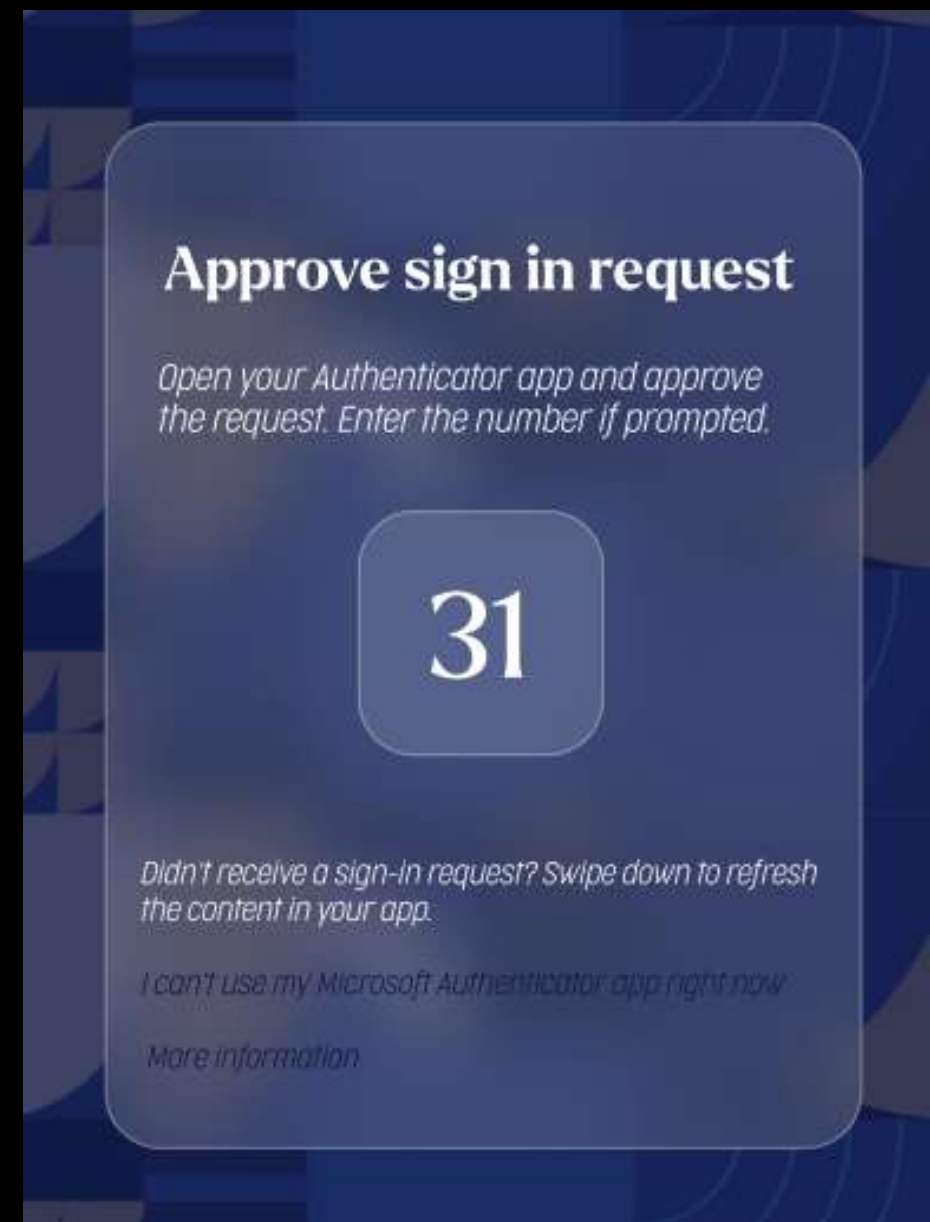

Copied link and pasted in the browser, it's not a link. Issue: it's a code issue.

Add "Try the App" + working Figma link

Got it working. I misspelled "target."

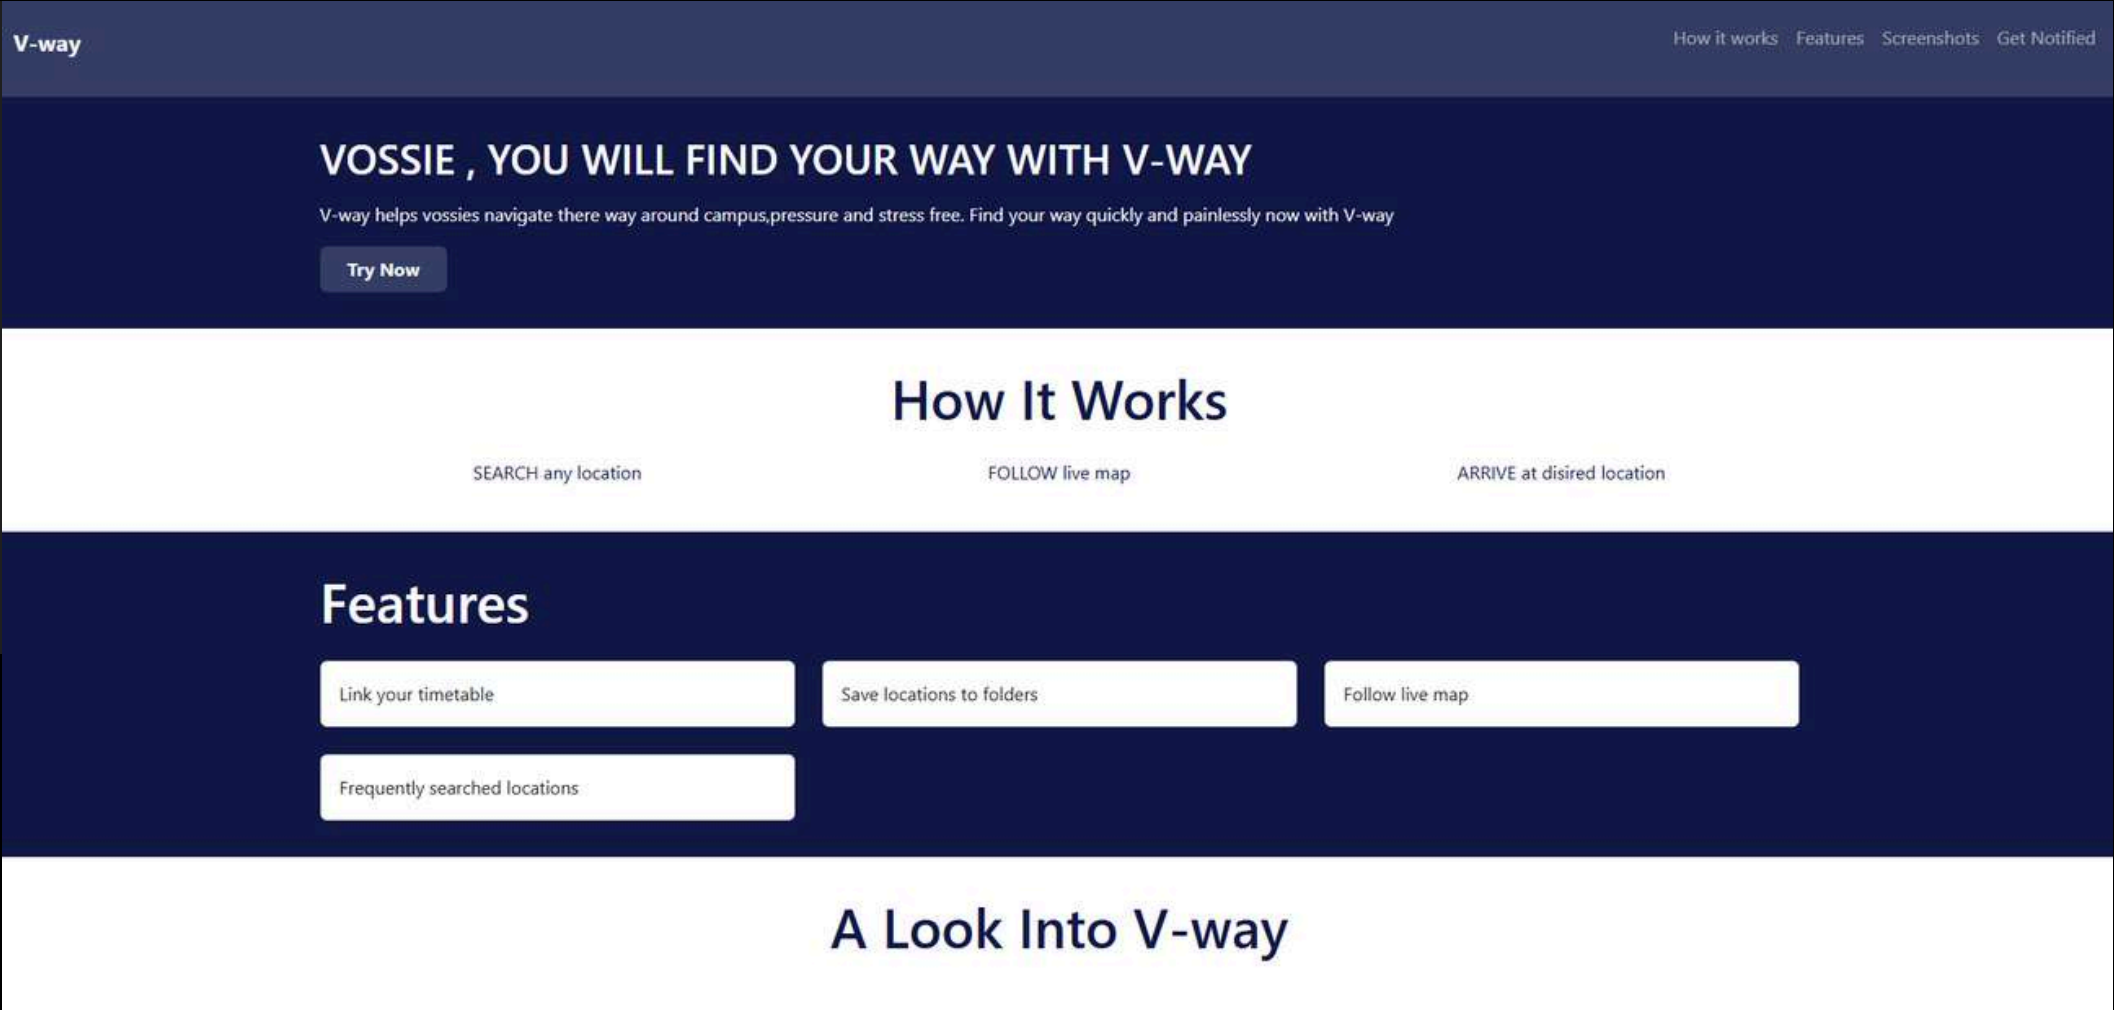

Change fonts: Larken headings / Cocogoose body

Change fonts: Larken headings / Cocogoose body

```
3 }
4
5 ▼ body {
6   margin: 0;
7   font-primary{
8     font-family: 'EllenLuff Larken Variable',serif;
9   }
10  font-secondary {
11    font-family:'Cocogoose Condensed',serif;
12  }
13  font-size: 16px;
14  line-height: 1.5;
15  color:#FFFFFF;
16  background-color:#131A4B;
17 }
18
```

This code changed my website to just the Cocogoose font.

Change fonts: Larken headings / Cocogoose body

```
▼ @font-face{
  font-family: 'EllenLuff - Larken Bold';
  src: url('fonts/EllenLuff - Larken Bold.ttf') format('truetype');
  font-weight: normal;
  font-style: normal;
}

▼ @font-face{
  font-family: 'CocogooseCompressed UltLtIta';
  src:url('fonts/CocogooseCondensed-UltLtIta.ttf')
  format('truetype');
  font-weight: normal;
  font-style: normal;
}
```

A Look Into V-way

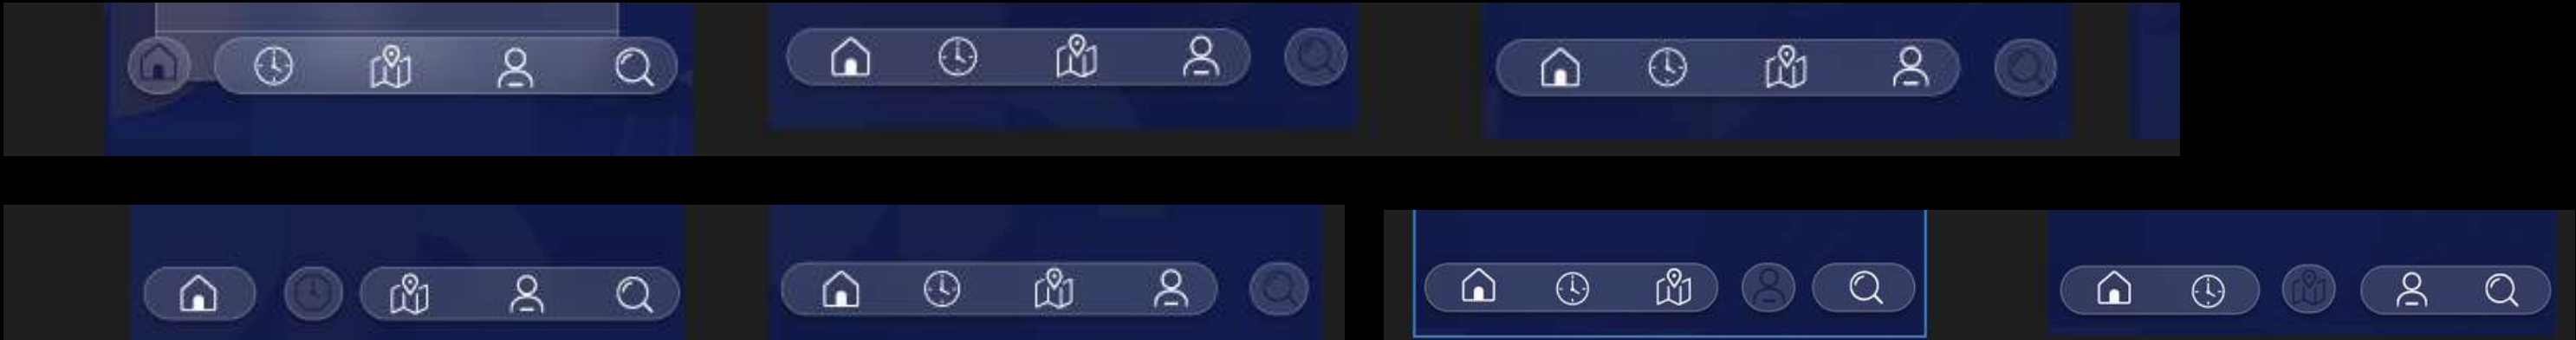

Change fonts: Larken headings / Cocogoose body

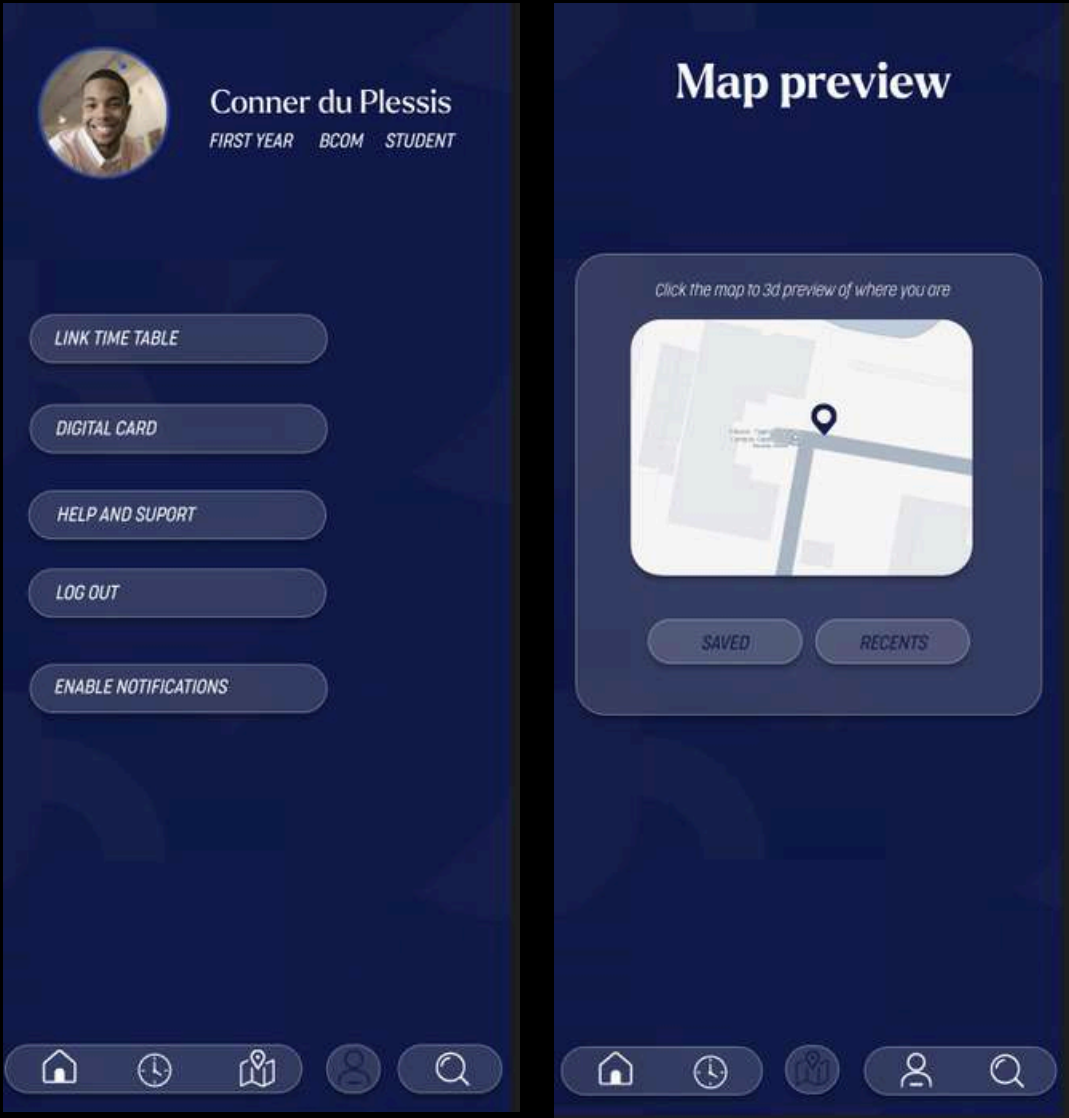

```
▼ @font-face{
  font-family: 'EllenLuff - Larken Bold';
  src: url('fonts/EllenLuff - Larken Bold.ttf') format('truetype');
  font-weight: normal;
  font-style: normal;
}

▼ @font-face{
  font-family: 'CocogooseNarrow-Light';
  src:url('fonts/CocogooseNarrow-Light.ttf')
  format('truetype');
  font-weight: normal;
  font-style: normal;
}
```

Add prototype testing + refinements

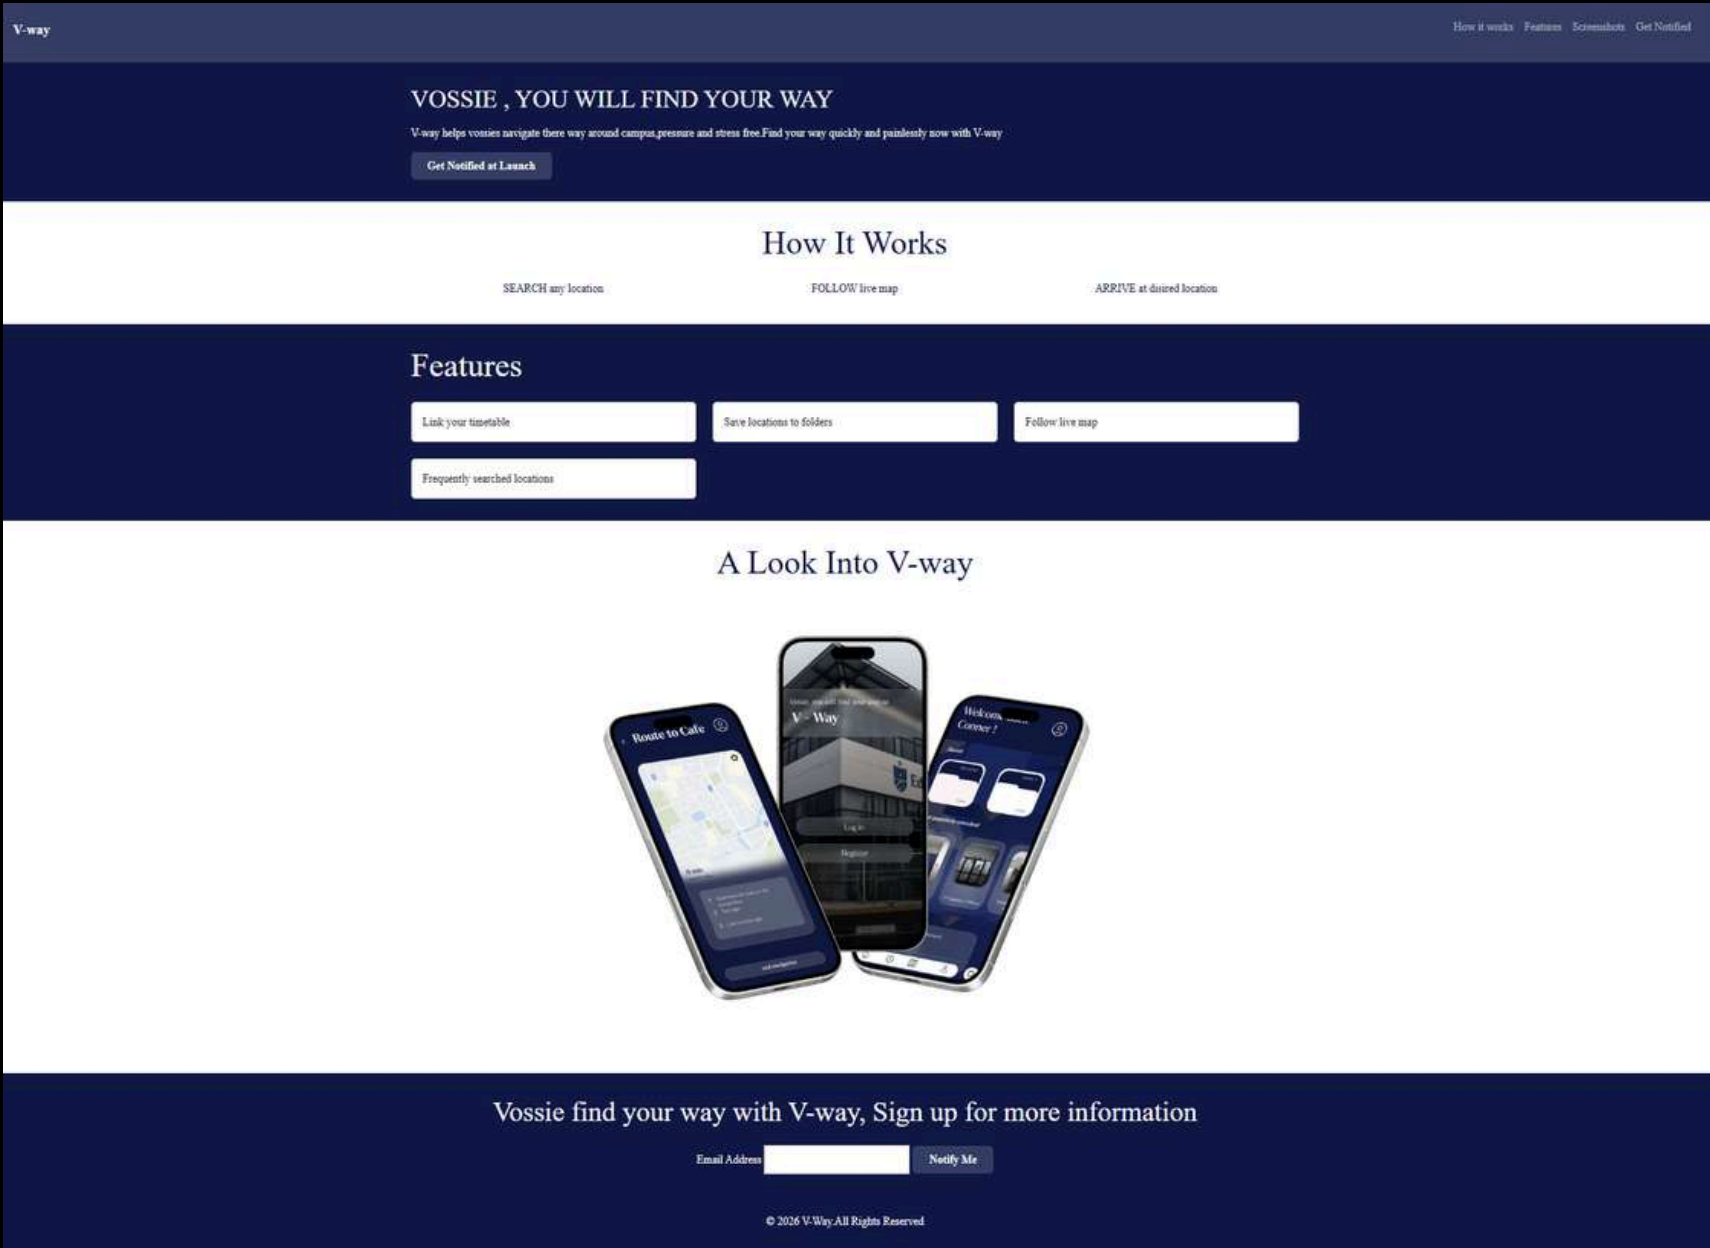

Added new icons and changed the design of the navigation bar, as before it did look coherent with the rest of the design.

Added 2 new pages to make the navigation bar open to all pages.

Align coded landing page more closely with Figma
