GAME RULES

2- 4 players / ages 8 to adult

- Gameboard
- 100 letter tiles
- Letter pouch
- 4 tile racks

THE

In the **SCRABBLE®** game, players form interlocking words crossword fashion on the board using letter tiles of different values. Each player competes for high score by taking advantage of the letter tiles, as well as the premium squares on the board. In a 2-player game, a good player scores in the 300-400 point range.

Place all letter tiles in the pouch or facedown beside the board and mix them up. Draw for first play. The player with the letter closest to "A" plays first. A blank tile beats any letter. Return the letters to the pool and remix. All players draw seven new letters each and place them in their racks.

	01 . The first player combines two or more of his or her letters to form a word and places the word on the board to read either across or down with one letter on the center square Diagonal words are not allowed	02 . Complete your turn by counting and announcing the score for that turn Then draw as many new letters as you played always keeping seven letters on your rack as long as there are enough left in the pouch .	
03 . Play passes to the left the second player, and then each in turn, adds one or more letters to those already played to form new words All letters played on a turn must be placed in one row across or down the board to form at least one complete word If, at the same time, they touch other letters in adjacent rows, those must form complete words, crossword fashion, with all such letters The player gets full credit for all words formed or modified on his or her turn .

You may use a turn to exchange all, some, or none of your letters To do this, place your discarded letter(s) facedown Draw the same number of letters from the pool, then mix your discarded letter(s) into the pool This ends your turn .

08 .

Before the game begins, players should agree on which dictionary they will use, in case of a challenge All words labeled as a part of speech (including those listed of foreign origin and as archaic, obsolete, colloquial, slang, etc) are permitted with the exception of the following words: always, capitalized, abbreviations, prefixes and suffixes standing alone, words requiring a hyphen or an apostrophe Any play may be challenged before the next player starts a turn If the play challenged is unacceptable, the challenged player takes back his or her tiles and loses that turn If the play challenged is acceptable, the challenger loses his or her next turn All words (not just one) made in one play are challenged simultaneously If any word is unacceptable, the entire play is unacceptable Only one turn is lost on any challenge Consult the dictionary for challenges only

09 .

Ending the Game The game ends when all letters have been drawn and one player uses his or her last letter, or when all possible plays have been made

			
The scorekeeper tallies each player's score, entering it after each turn. The score value of each letter is indicated by a number at the bottom of the tile. The score value of a blank is zero.	The score for each turn is the sum of the letter values in each word(s) formed or modified on that turn, plus the additional points obtained from placing letters on premium squares.	Premium Letter Squares: A light blue square doubles the score of a letter placed on it; a dark blue square triples the letter score.	
BINGO! If you play seven tiles on a turn, it's a Bingo. You score a premium of 50 points after totaling your score for the turn.	Letter and word premiums count only on the turn in which they are played. On later turns, letters already played on premium squares count at face value.	Premium Word Squares: The score for an entire word is doubled when one of its letters is placed on a pink square; it is tripled when one of its letters is placed on a red square. Include premiums for double or triple letter values, if any, before doubling or tripling the word score. If a word covers two premium word squares, the score is doubled and then re-doubled (4 times the letter count), or tripled and then re-tripled (9 times the letter count). NOTE: The center square is a pink square, which doubles the score for the first word.	
	Unplayed Letters: When the game ends, each player's score is reduced by the sum of his or her unplayed letters. In addition, if a player used all his or her letters, the sum of the other players' unplayed letters is added to that player's score.		
		When two or more words are formed in the same play, each is scored. The common letter is counted (with full premium value, if any) for each word. (See Turns 3, 4 and 5 on

Scrabble game play & shortcuts for setting up

New SCRABBLE game players should find these versions faster and more inviting than the standard version

9 - TILE SCRABBLE

This variant is identical to the original game except players have 9 tiles on their racks instead of the usual 7. You score a 50-point Bingo bonus for using 7, a or all 9 tiles on your rack

	Two Players	Three Players	Four Players
Beginner	70	60	50
Intermediate	120	100	90
Expert	200	180	160

In this variant, the game is over when one player reaches a pre-decided score, no matter how many tiles are left. This variant allows mixed play-level groups, as the score needed to win depends on the level of the player (Beginner, Intermediate, or Expert). Here are the points needed to win the game

If players of the same level are playing, each needs to reach the same score. For example, two Intermediate players would be playing to 120 and four Beginners would each be playing to 50

Ways to become an instant SCRABBLE expert !

There's no doubt about it - it takes a stellar vocabulary and super strategies to become a SCRABBLE expert. Looking for instant results? These tips from seasoned SCRABBLE players could help you rule the board!

1 TWO AND THREE-LETTER WORDS

Learn the 2-letter and 3-letter words. They are the building blocks of expert play and can boost your average score by as much as 50 points per game.

4 BONUS SQUARES

Always look for ways to play across premium squares. Check especially for premium squares next to vowels.

3 SHUFFLE TILES

Shuffle the tiles on your rack frequently. Look for some common ways that letters go together. Some of these are BR, CH, CL, DL, ED, EN, ES, FL, GH, IG, NK, KL, MI, IS, TU, MB, MP, ND, NT, PR, PL, RE, ST, TH, UN, VE and OUS. As you form these combinations, it may surprise you how words will often appear on your rack when you least expect them.

2 SECRET OF THE "S"

Use an S to form two words at once. Pluralize one word while forming another at the same time. Hint: Use your S wisely. Don't add it unless you can earn at least 8 points by doing so.

5 CONSIDER YOUR NEXT PLAY

Make your play with an eye toward your next play. You can do so simply by saving some good tiles on your rack. Your best chance of having a great next rack is to save some combination of the letters "AELNRST". (Hint: think "starline"). Ideally, saving either the same number of vowels and consonants, or just one extra consonant.

6 BINGO'S

Always look for Bingo's (using all 7 tiles at once). Optimism and know-how will mean more 50-point bonuses. Learn common word beginnings and endings and know how to place them on your rack.

10 ATTITUDE

Keep in mind that
anyone can beat
anyone else with a
certain amount of
luck Also
remember that
everyone draws
poor combinations of
tiles at times, so
when you do take
pleasure in making
the best play you
can Finally, don't
dwell on your
mistakes
Everyone makes
them so go easy on
yourself and just
enjoy playing!
