ABOUT THE PROJECT

Demonstrate an understanding of intermediate typographic terminologies and the ability to select and apply a range of typographic techniques to resolve visual communication problems.

Demonstrate proficiency in professional layout design and print production processes through the creation of print-ready typography solutions of various scales and functions.

Demonstrate the ability to execute a complete design project from concept to final execution, showing integration of creative, technical, and communicative aspects of typography design.

Demonstrate the ability to present a comprehensive digital portfolio that evidences the synthesis and application of all technical, conceptual, and applied typography skills acquired throughout the discipline.

Research into Scrabble

History of Scrabble.

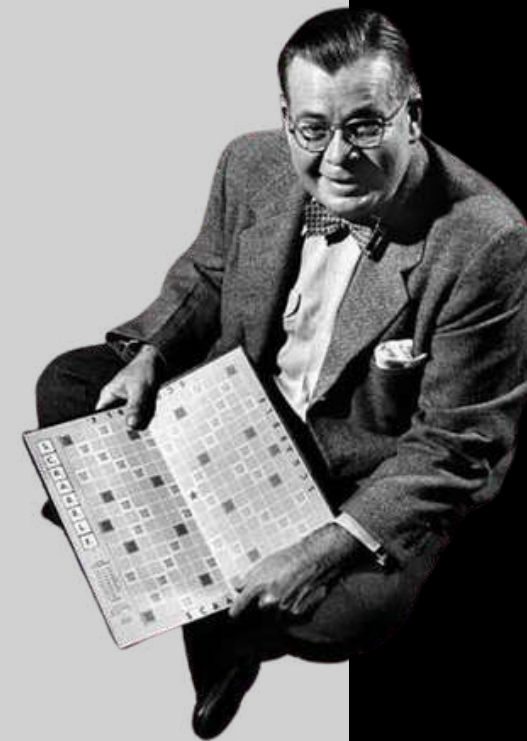

1938 : THE INVENTION

- Alfred Mosher Butts invented Scrabble during the Great Depression.
- He designed the 15×15 board and assigned letter values based on letter frequency.
- The game was first called Lexiko, then Criss-Cross Words.

1952 : A BREAKTHROUGH

- Macy's president Jack Straus discovered the game on holiday and began selling it in stores.
- Scrabble quickly became a nationwide success

1948 : SCRABBLE IS BORN

James Brunot bought the rights, renamed the game Scrabble, updated the board, and introduced the 50-point "bingo" bonus.

1954 : MASS PRODUCTION

- Production was licensed to Selchow & Righter.
- Nearly 4 million copies were sold in one year.

History of Scrabble.

1960S -1970S : COMPETITIVE PLAY

- Scrabble clubs and tournaments became popular.
- In 1978, the National SCRABBLE Association was formed, introducing official rules and tournaments.

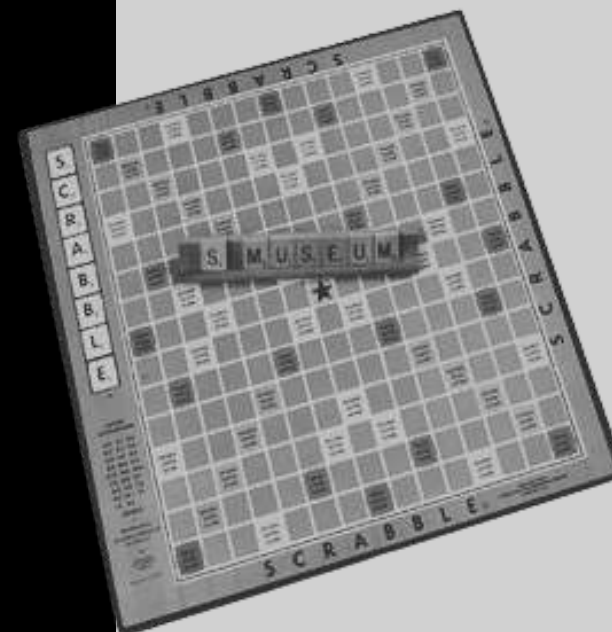

1980S - 1990S : GLOBAL EXPANSION

- Scrabble became a TV game show.
- Hasbro acquired the North American rights, while Mattel later acquired the international rights.

2004 : HALL OF FAME

Scrabble was inducted into the National Toy Hall of Fame.

Typography & Type Design

HISOTRY OF TYPEGRAPHY : SWISS STYLE

principles : cleanliness, readablilty, objeticivity

posters are ddeisnged by mike joyce inspired by swiss styles :

beigns with mathimatical grid, considered to be the “most legible and harmonious means for structuring information. clear-cut and work well with ratios (Rule of Thirds, Golden Ratio, etc. Swiss Style usually involves an asymmetrical layout, sans serif typefaces and the favoring of photography over illustrations.)

Typography & Type Design

HISOTRY OF TYPEGRAPHY : SWISS STYLE, TYPOGRAPHY

Akzidenz-Grotesk

Akzidenz-Grotesk was released by the Berthold Type Foundry in 1896

Univers

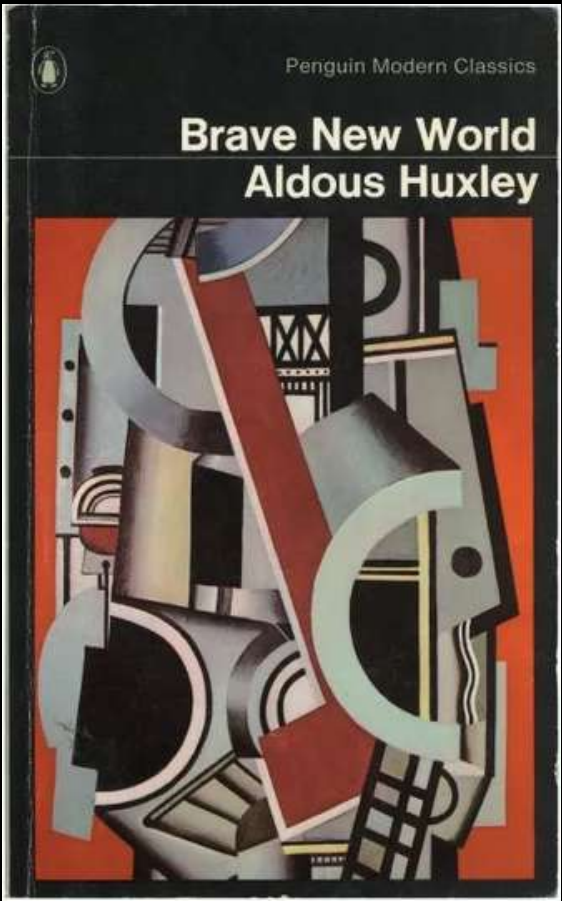

Adrian Frutiger, one of the most influential typeface designers of the 20th century, created Univers in 1954. Pulling elements from Akzidenz-Grotesk, Frutiger created one of the first typefaces that formed a font family, allowing documents to use one typeface (instead of several) in various sizes and weights, creating a beautifully simple uniform via text alone.

Typography & Type Design

HISOTRY OF TYPEPGRAPHY : SWISS STYLE, TYPOGRAPHY

Helvetica

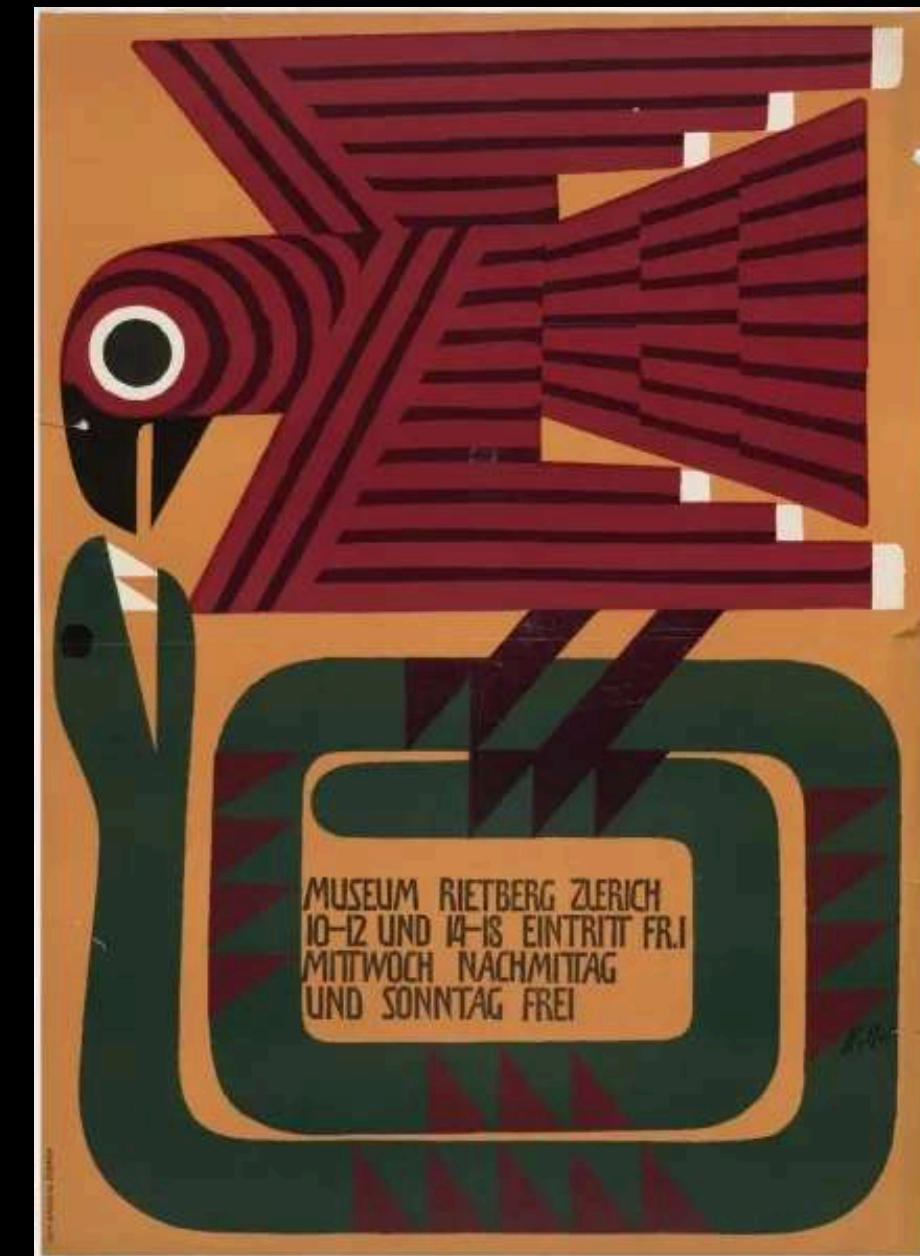

When Max Miedinger and Eduard Hoffmann created Helvetica in 1957

Typography & Type Design

HISOTRY OF TYPEGRAPHY : SWISS STYLE, DESEIGNERS

Ernst Keller

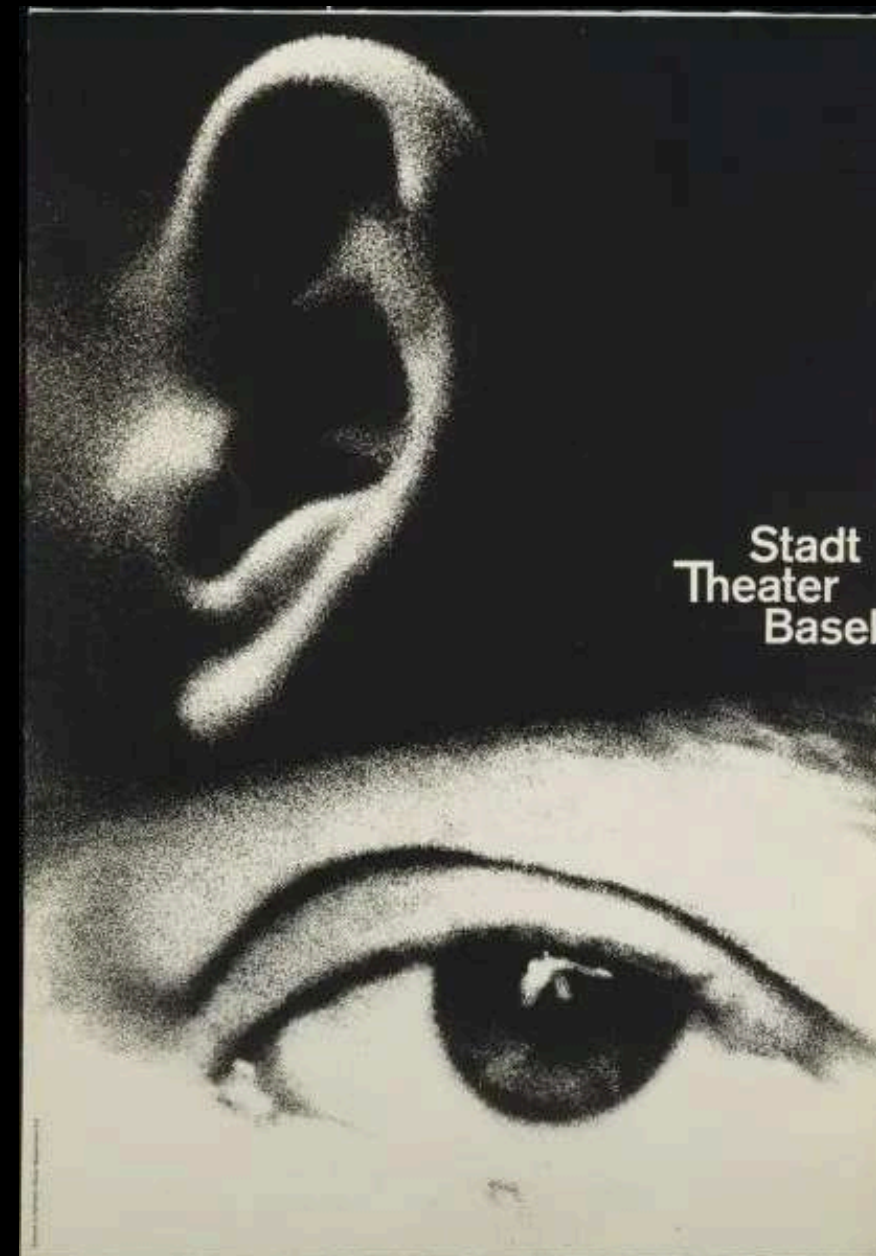

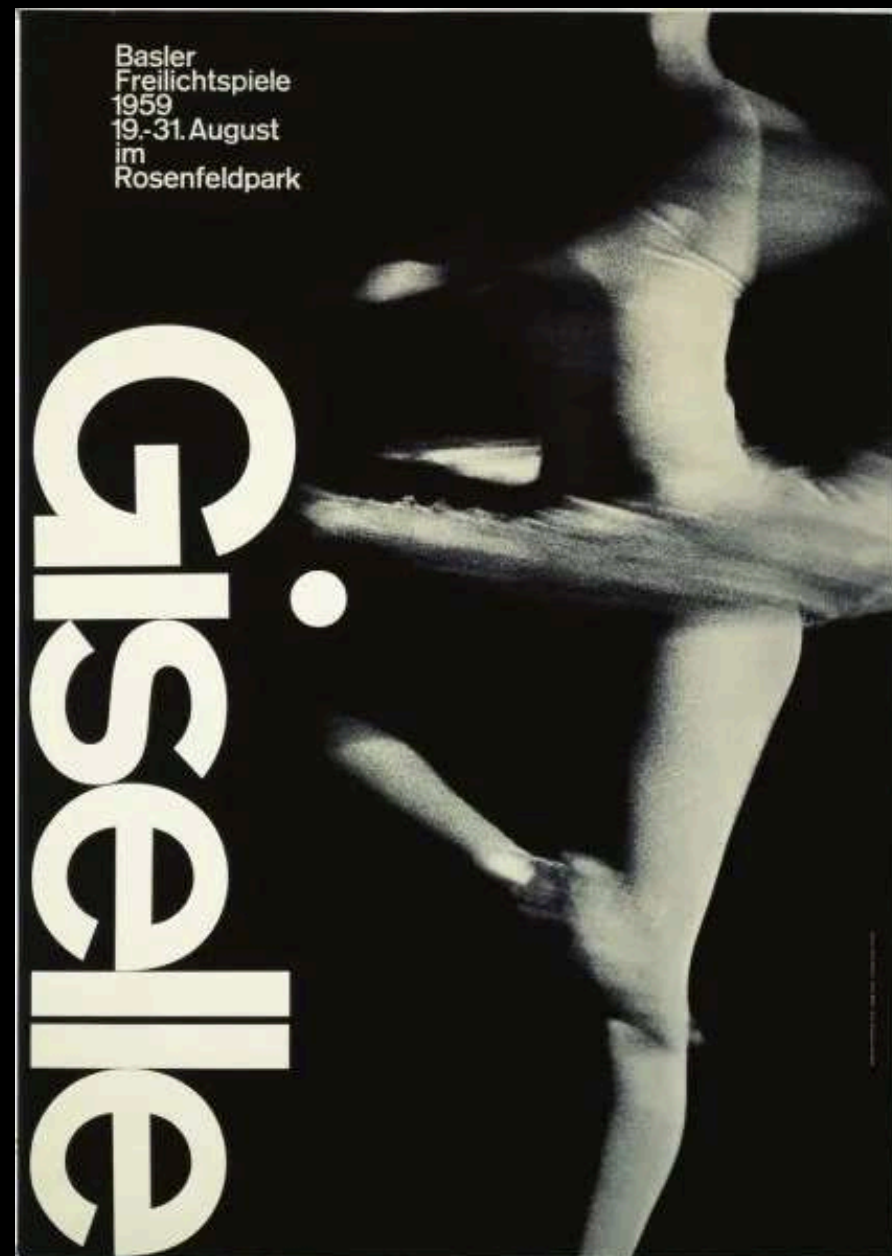

father of Swiss design.” The year is 1918 and Keller just received a teaching position at the Kunstgewerbeschule (literally translated “arts and crafts school”) in Switzerland

Typography & Type Design

HISOTRY OF TYPEGRAPHY : SWISS STYLE, DESEIGNERS

Armin Hofmann, along with Emil Ruder

Much of his work focused on elements of graphic form while remaining simple and objective. His compositions, having been influenced by Ernst Keller's teachings, often made use of typography over illustration

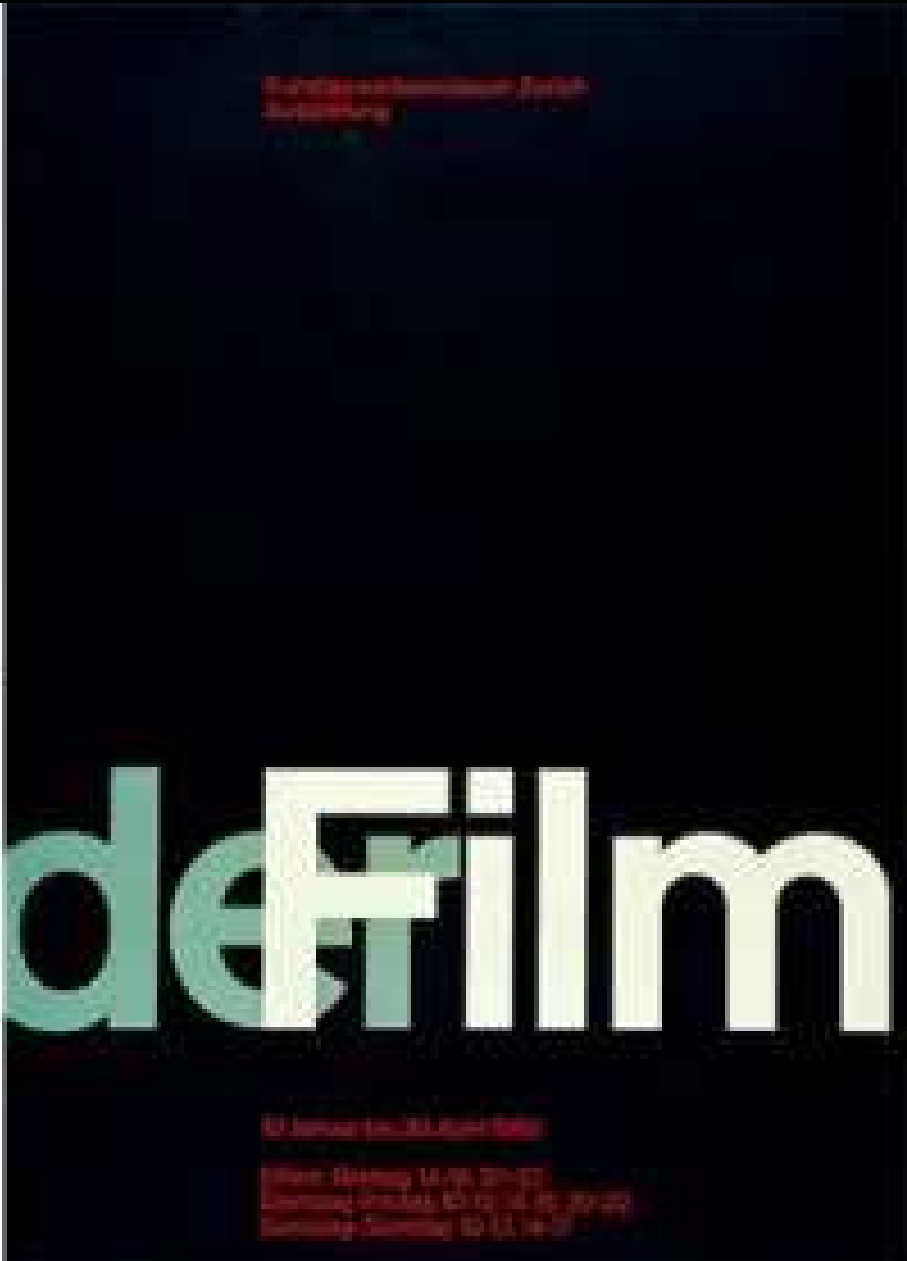

Typography & Type Design

HISOTRY OF TYPEGRAPHY : SWISS STYLE, DESEIGNERS

Josef Müller-Brockmann

tudent of Keller's, heavily focused his work around the grid system and Akzidenz-Grotesk typeface

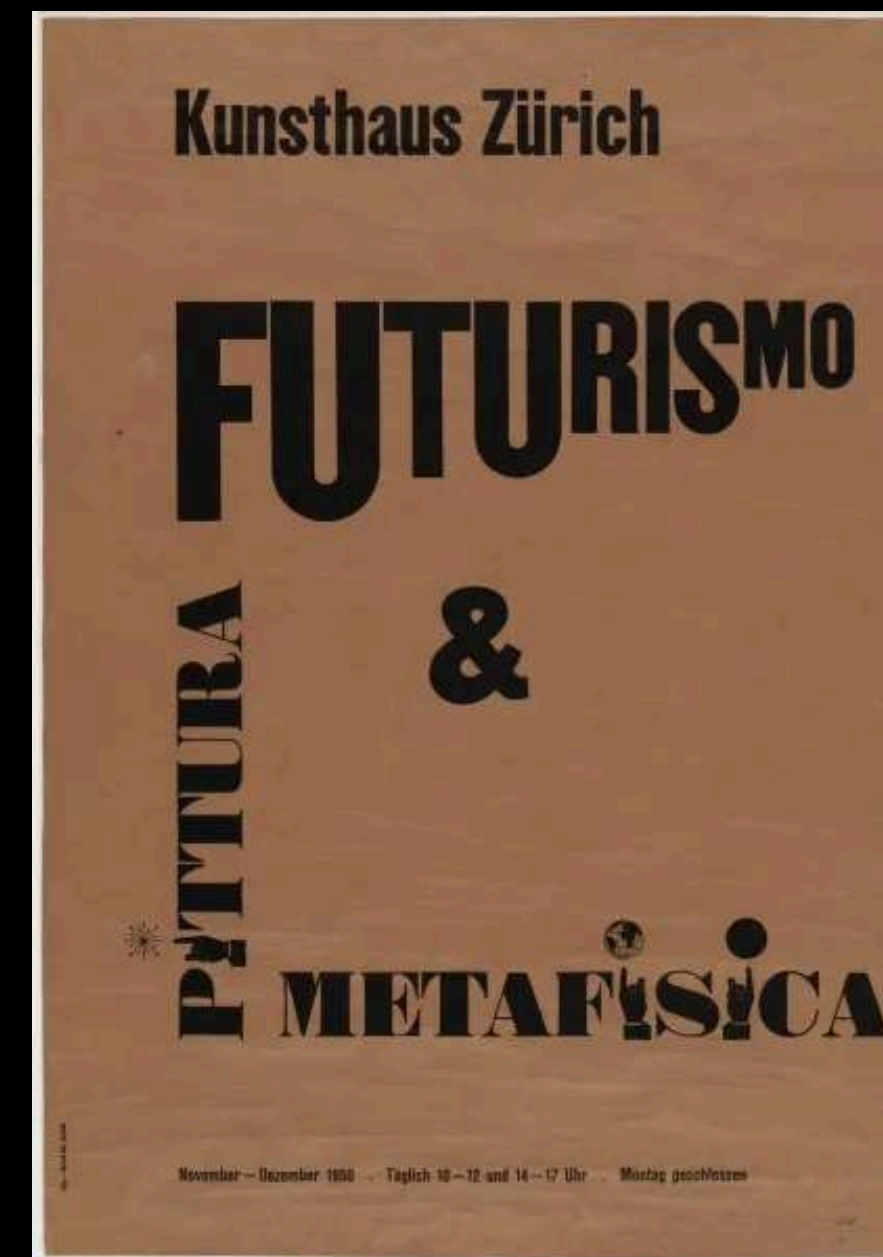

Typography & Type Design

HISOTRY OF TYPEGRAPHY : SWISS STYLE, DESEIGNERS

Max Bill

s school in Ulm included courses in semiotics, or the study of signs and symbols. These teachings fell into step with the objectivity and readability of the International Typographic Style

expressive typography

Nike frequently uses bold, high-contrast typography in its global campaigns to express confidence and energy to communicate brand attitude and emotional impact.

A24 is cited among the best expressive typography posters in contemporary cinema. The designs evoke strong emotion and set the tone before any imagery is processed.

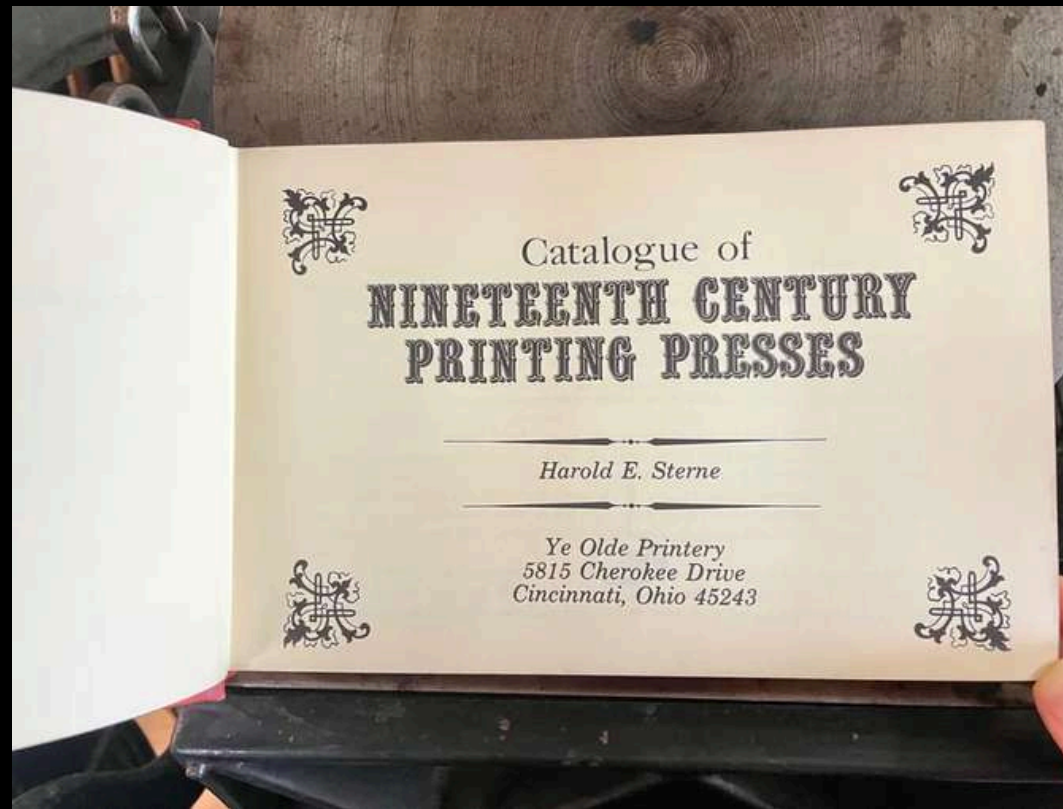

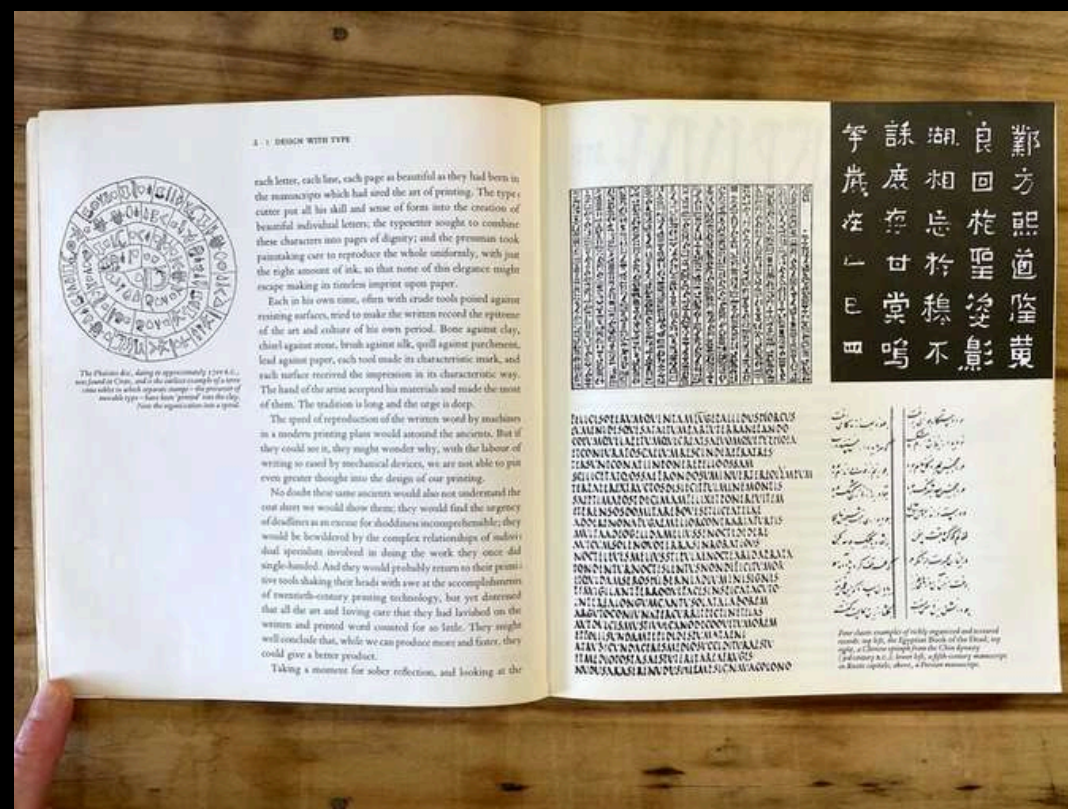

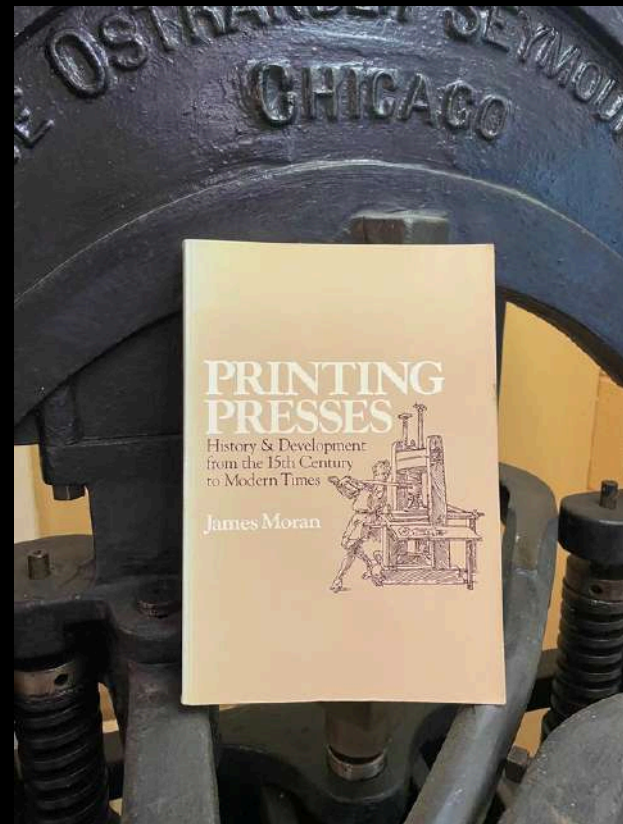

Editorial Design The New York Times Magazine mixes type sizes and weights to create visual rhythm and depth.

<https://www.getstud.io/expressive-typography/>

Typography & Type Design

HISOTRY OF TYPEGRAPHY PRINT CULTURE

print culture all about physical feeling of text. letterpress printing dominated for like 350 years and the way type gets pressed into paper creates this tactile dimension tht screens just cant replicate. (<https://rarebookschool.org/courses/details/t60v/>)

Typography & Type Design

RESEARCH SYNTHESIS

basicaly my research boiled down to 4 themese that are gona shape this pixel scrabble collectors edition. first off, tactile stuff matters just as much as the type itsel, such as letterpres, heavy board game bits, and luxry boxes prove that physical texture makes words feel expensive before you even look at them. second, it still has to actualy work, so swiss grids and board game rules keep the tiles super readable even when the type gets experimental. thrird, it's all about history: alfred butts litrally architected original scrabble tiles, modern blackletter brings back medival vibes, and pixels are just the newest block-building era. fourth, emotional type is everything because leterforms carry actual psykological weight. scrabble tiles are already physical squares, so pixel type is the ultimate brige.

scrabbles Audience Analysis

PRODUCT INFO

How many ways can you spell FUN? Bring back memories – and create new ones – with the Scrabble game! For over 70 years, the Scrabble board has been a place for friends and family to gather, play, learn, and reconnect. With the wooden tiles, wooden tile racks, and textured gameboard, players can feel the thrill of playing a classic. Players can show off their vocabulary skills as they build words with the wooden letter tiles, and rack up the points with double and triple letter and word scores. The game guide offers different ways to play and strategies according to skill level. This Classic Crossword Game is a fun game for a family game night, a night out with friends, or an indoor activity. It's a fun game for boys, girls, adults, and teens, ages 8 and up.

Hasbro Gaming and all related trademarks and logos are trademarks of Hasbro, Inc.

- CLASSIC CROSSWORD GAME: Get family and friends together for a fun game night with the Scrabble board game! Put letters together, build words, and earn the most points to win
- WOODEN TILES AND RACKS: This edition of the Scrabble game features 100 wooden letter tiles and wooden tile racks. The textured gameboard helps tiles stay on the board
- RACK UP THE POINTS: Scrabble letters are worth points, and premium squares on the gameboard multiply the score. Surprise opponents with 2-letter words, challenge their choices, and strategize to win
- GAME FOR 2-4 PLAYERS: Go for classic Scrabble gameplay in a head-to-head face-off, or mix things up and play in teams. The game guide offers expert tips, and other ways to play this classic word game
- FUN FAMILY GAME: Do you remember playing Scrabble when you were a kid? Introduce this fun game to your kids and grandkids! Connect over a classic board game and create memories for generations to come

- Includes gameboard, 100 wooden letter tiles, 4 wooden tile racks, drawstring letter bag, and game rules.
- Ages 8 and up
- For 2-4 players.

PROCESS THINKING :

how i came up with ideas

iv been playing poker recently, and i love the tension , atmosphere, and in some cases the asthetics of it, the siphitcasion, and thought to how poker is stratigic, and inregards to scrabble words can be too, its eleveting the game from it being a family game to a game that can be intense

recetly in my life iv been seeing more and more of people that have been switching off there phone compltly or to such an extent if they are able to, use a flip phone , to live a more present life, iv also seen this concept on you tube. and with that slow way and peaceful way of living people turn to a differnt form of entertainment, games, hobbies, sports, and comunity. which made me think of the asthetic of that life with the second idea collection addition

i was playing terreria and thought of the pixellation , and how in typography , looking at its history of paint on walls or paper, or even language being etched into stone, in the digital age language is built on pixels, with tiny united comming togther to create meaning. i thought it was a cool idea too, because of how far typography and language have advanged, this would attract a younger audience , with kinds and older kinds wanting to pick this up, which insentivises learning too.

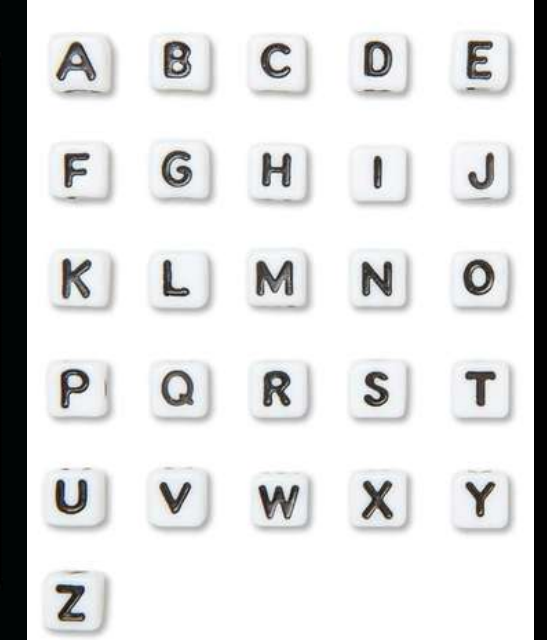

i went onto cosmos to gather insporation, and saw the grafiti typography, and it got me to thinking how is a language on not just paint, the words carry expression, freedom, rebellion, identiy and comunity and with scrabble togther , cominded every word leaves a mark. i thought i was a cool concept behind the design of this idea

Ideas

1. IDEA ONE

For this scrabble collection, the inspiration draws from poker. reimagining this being a strategic game rather than a family game. the design would evoke an atmosphere of high stakes and sophisticated.

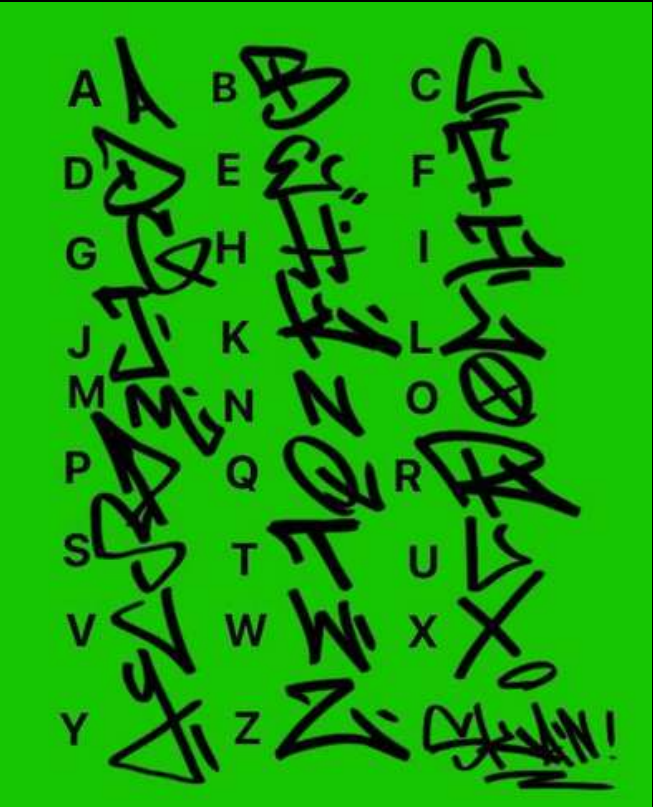

For this scrabble collection, the inspiration draws from poker. reimagining this being a strategic game rather than a family game. the design would evoke an atmosphere of high stakes and sophisticated.

Ideas

3. IDEA THREE

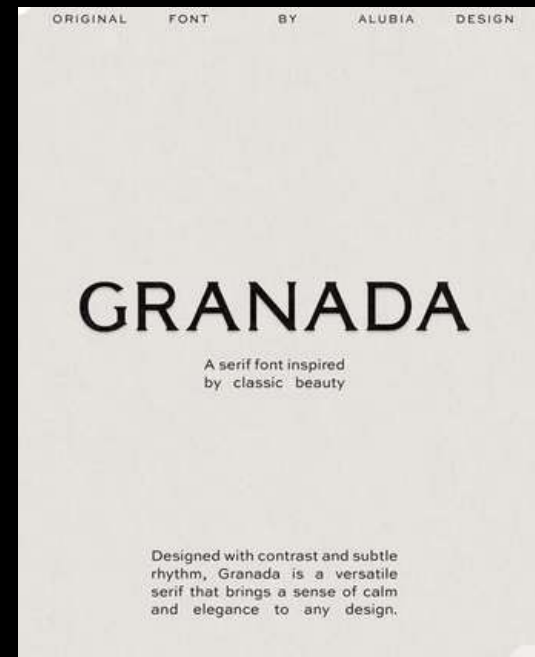

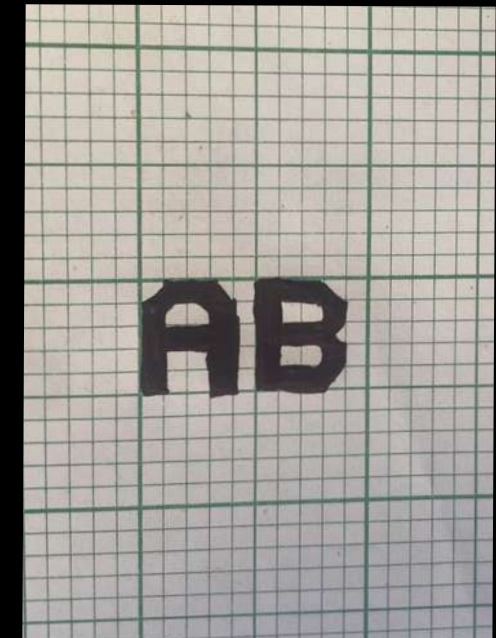

street art scrabble, graffiti stype face scrabble

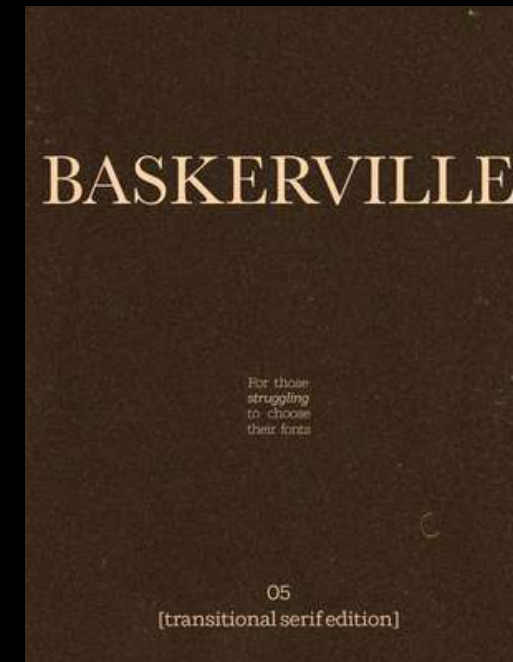

Ideas

2. IDEA TWO

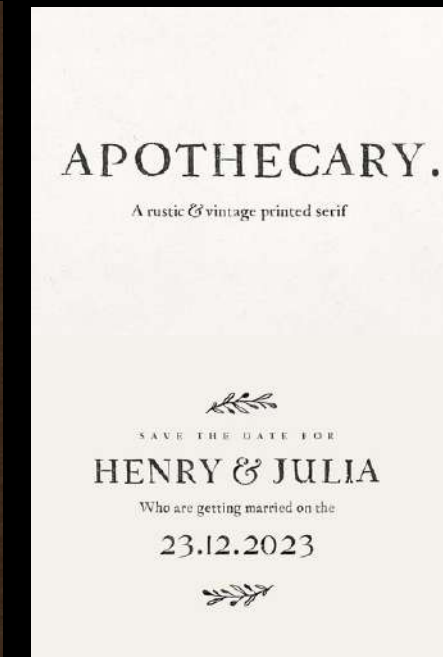

this idea, focuses on a rising movent that has been happing in young adults - adults, and that is going analoge, poeple who choose to have flip phonmes, mp4 players, cigital cameras, recordplayers, people who remove themself from soical media, and being constently connected, tehy live a slow meaningful life to them. People who values meaningful social connections, how get travel often in nature, how get to gther and play card games, people who jouranl and play sodcu, how created there own interainment, and focus on there hobbies, rather than whathing tv or engadge in social media.

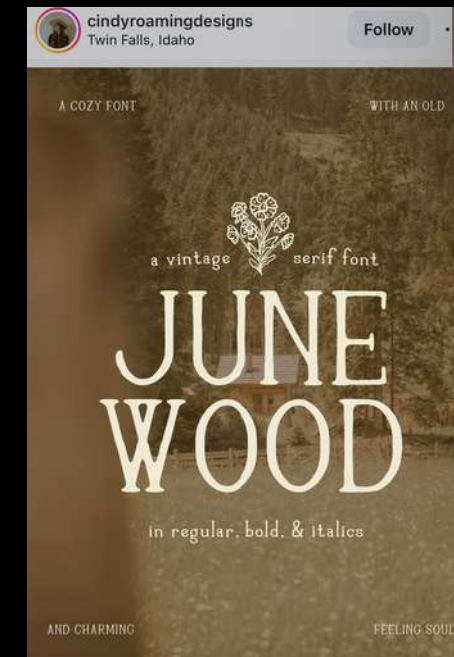

timless

dark acedimia

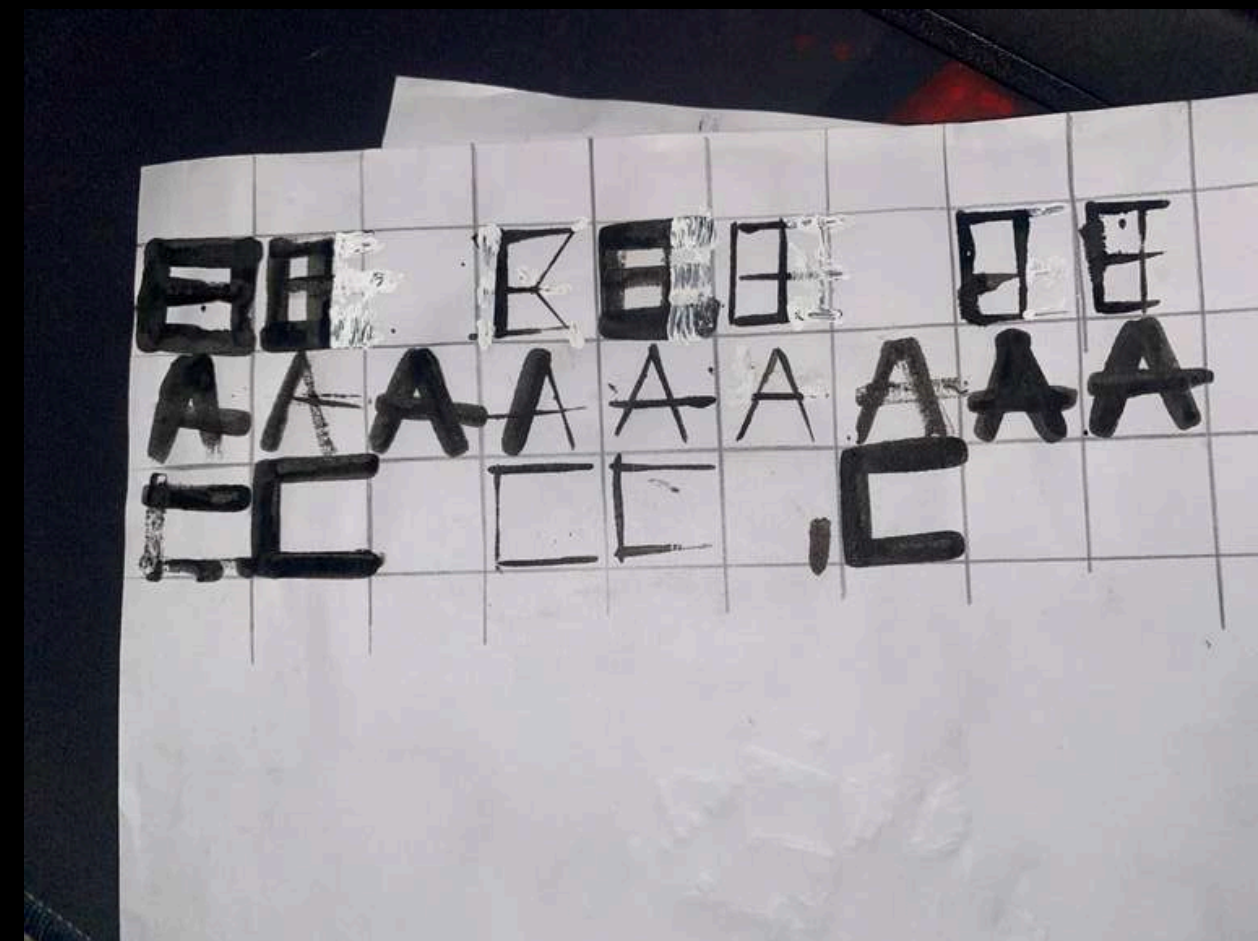

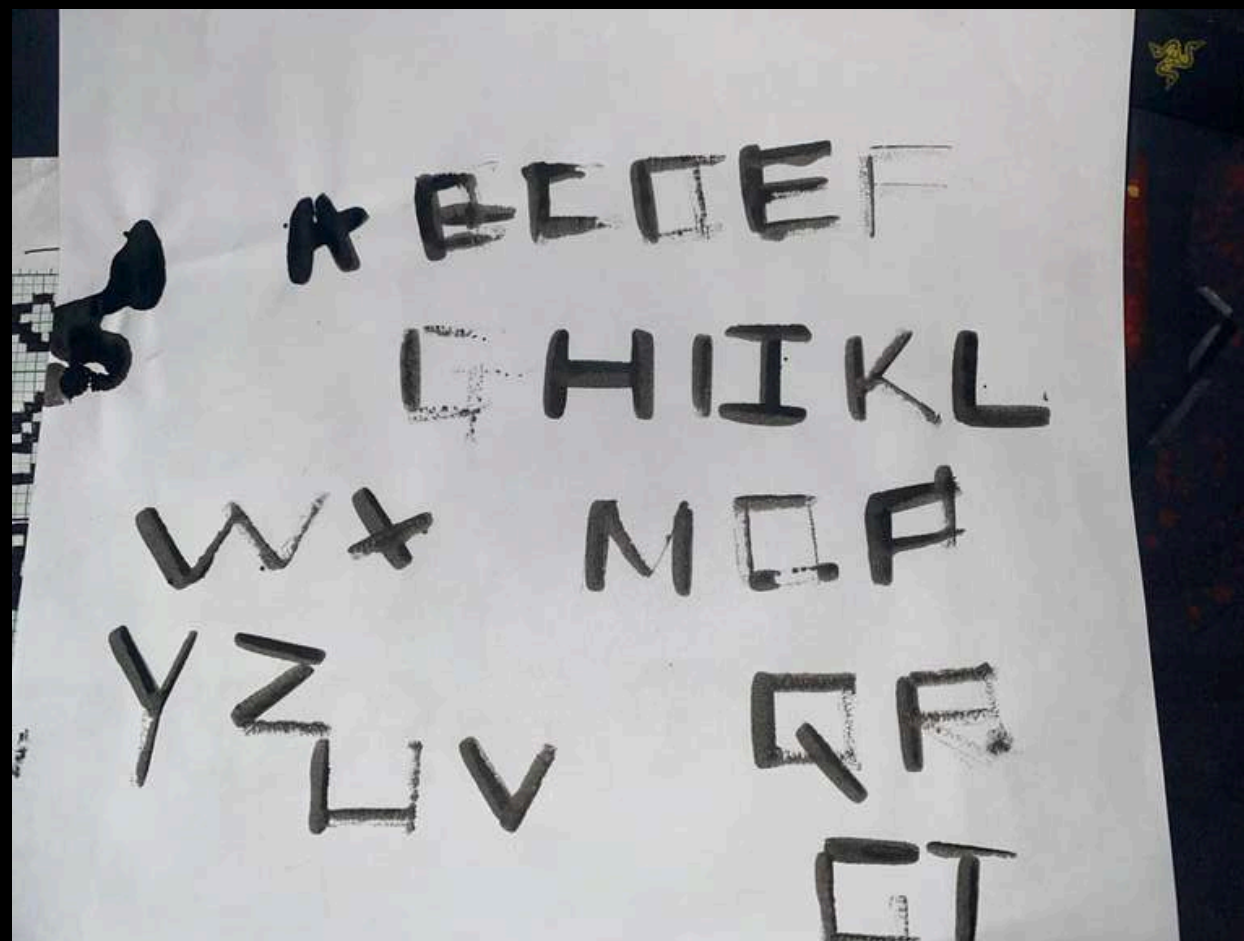

cottage core

Ideas

USING THE ACUTAL SCRABBLE PEICES TO MAKE THE TYPE

Ideas

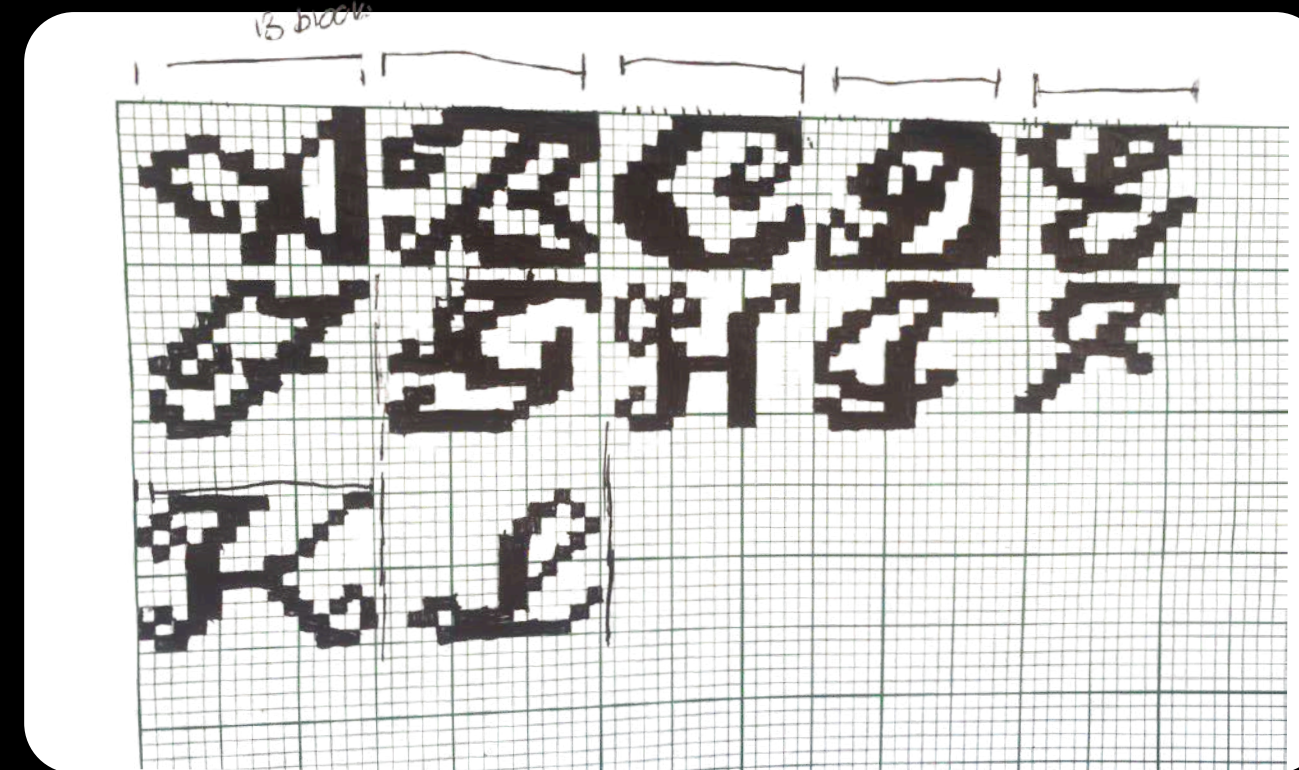

4. IDEA FOUR

pixel scrable: i think this is a cool idea beacuse looking back in history, langauge being documented, was panted onto caves, or type painted onto paper, or using metal to arrage words, and now in the digital age, language first beigns with a pixel, words beign at pixels, and scrables a word game - which marintates well, then following tht scrabble the gae is made ofut of the square block to form words, so the same with the typography its made up of squares to for letters then words.

Olaf Willner

@SETSANDSETTINGS2016

AUDIENCE ANALYSIS : MY COLLECTION : PROFIL

who are they ?

Graphic designers, typographers, art directors,
design students, creative professionals and serious
scrabble collectors

Age range

roughly 25 to 45 years old

Interests

typography, pixel art, design history, retro
computing, board games, print culture, premium
packaging, collecting design objects

What they value

craft and material quality, intellectual depth, cultural
relevance, attention to detail, storytelling through
objects, the intersection of digital and physical
design

Key motivation

owning something that signals their taste and
knowledge while also being genuinely beautiful and
functional

What they hate

cheap mass-produced feel, design that tries too hard
to be trendy, gimmicks without substance, poor
typography choices, flimsy packaging

Where they hang out

design twitter, instagram foundry accounts, are.na,
behance, design podcasts, independent
bookshops, specialty board game cafes, design
museums

What they collect

limited edition books, vintage type specimens,
mechanical keyboards, screen prints, designer
board games, art prints, independent magazines

Spending habits

willing to pay premium for quality and meaning;
they see expensive design objects as investments
in their identity and space

AUDIENCE ANALYSIS : WRITTEN AUDIENCE ANALYSIS

my audience for the pixel scrabble collectors edition is people who sit right in the middle of design obsession and digital nostalgia, graphic designers, typographers, creative directors and art students who get genuinely excited about letterforms but also grew up with pixel art, early computer games and the aesthetic of 8-bit screens. they're usually aged between like 25 and 45, these people don't just want a fancy version of scrabble - they want an object that tells a story about how language has evolved. they're motivated by owning things that feel culturally significant and intellectually satisfying. a pixel-themed edition speaks to them because it validates their belief that digital design history matters just as much as print history. they want to display this on their shelf, not hide it in a cupboard.

AUDIENCE ANALYSIS : NOTES

they have nostalgia for early digital aesthetics but they're adults now with money to spend on premium versions of that nostalgia.

they care about the story behind the object. the narrative of "pixels are the first formation of language in the digital system" is something they can explain to their friends when they pull it off the shelf. it gives them cultural capital.

Typeface Analysis & Concept Development

3. handmade cuaitiy dispite
4. digital consturustion
5. pixek script

1. max clarity and min pixewl count
2. uniform stroke wieght
3. very legiibl
4. functional hiracy
5. really good for tiles
6. san serif

1. lower cases type stuggles for legiiblity
2. unifrom family

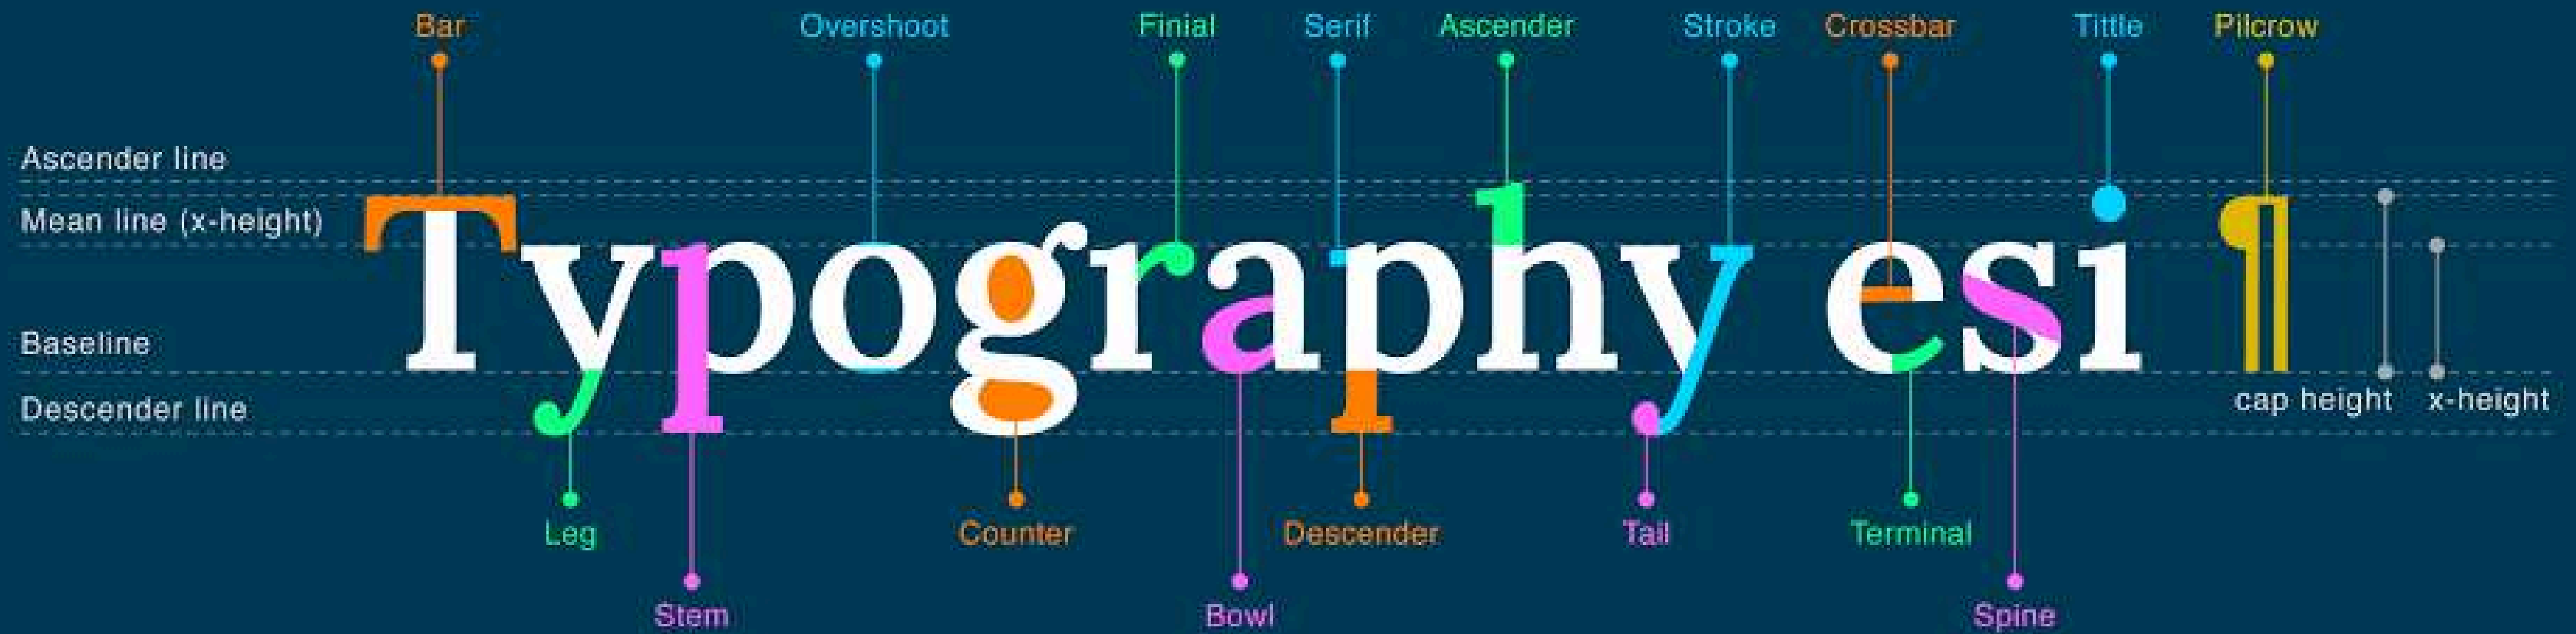

1. litterlky only the essance of the letter
2. all uniform
3. very minimal pixels

Typeface Analysis & Concept Development

TYPEFACE ANALYSIS

Looking at all five typefaces together, there's a clear spectrum from decoration to function. On one end, we've got the pixel serif display and pixel script which are all about personality and expression. They're beautiful but sacrifice readability. On the other end, we've got block pixel sans and minimal pixel for pure communication. Expanded pixel sits right in the middle, balancing character with practicality. The thing that connects all five is the grid. Every single one shares this underlying DNA, proving pixels are the universal foundation underneath all typographic expression.

GRIDS

radial grid

Best for posters where you want to draw attention to a central element, like a concert, festival, or product launch, as it organizes design elements radiating out from a focal point to create impact.

DESIGNERYASH

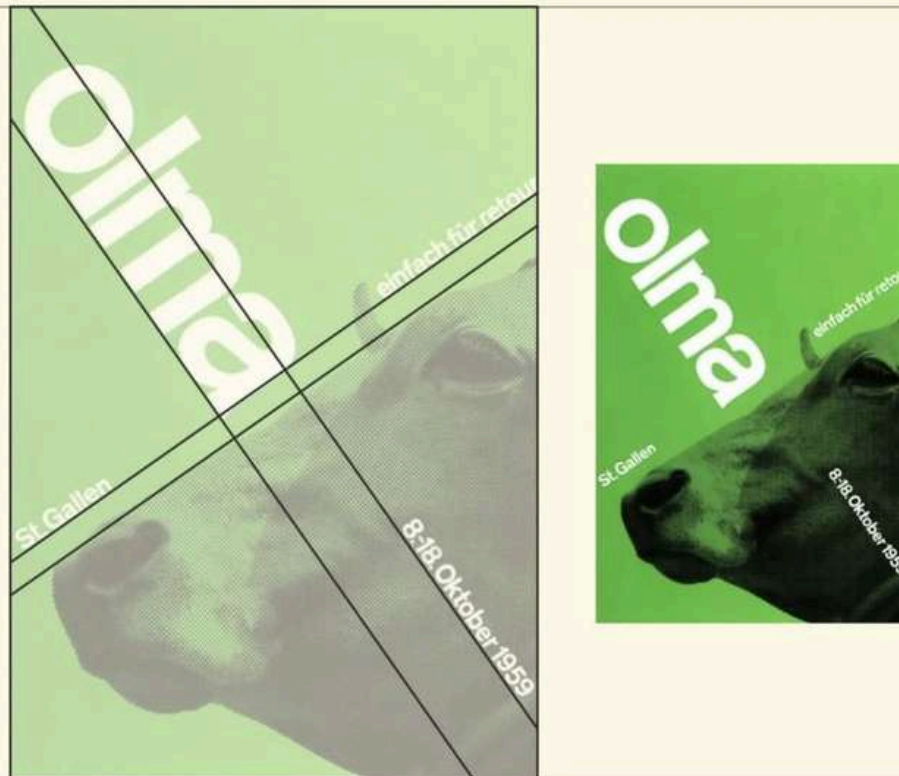

J'aime

A radial grid is a circular layout system where design or structural elements radiate outward from a central point along concentric rings and intersecting angle lines.

GRIDS

axial grid

Useful for typography-heavy posters or those requiring precise alignment,
like editorial-style designs or minimalist layouts.

DESIGNERYASH

J'aime

An axial grid is a graphic design layout system that arranges elements along a single, dominant central line.

GRIDS

baseline grid

Useful for typography-heavy posters or those requiring precise alignment, like editorial-style designs or minimalist layouts.

D E S I G N E R Y A S H

A baseline grid is a system of invisible horizontal lines used in typography and design to ensure that text lines up neatly across columns, pages, and spreads.

GRIDS

column grid

A column grid splits a page into vertical sections. Designers use these spaces to line up text, images, and other parts of a layout.

GRIDS

hierarchical grid

A hierarchical grid is a layout or data structure that organizes content based on importance, priority, or parent-child relationships.

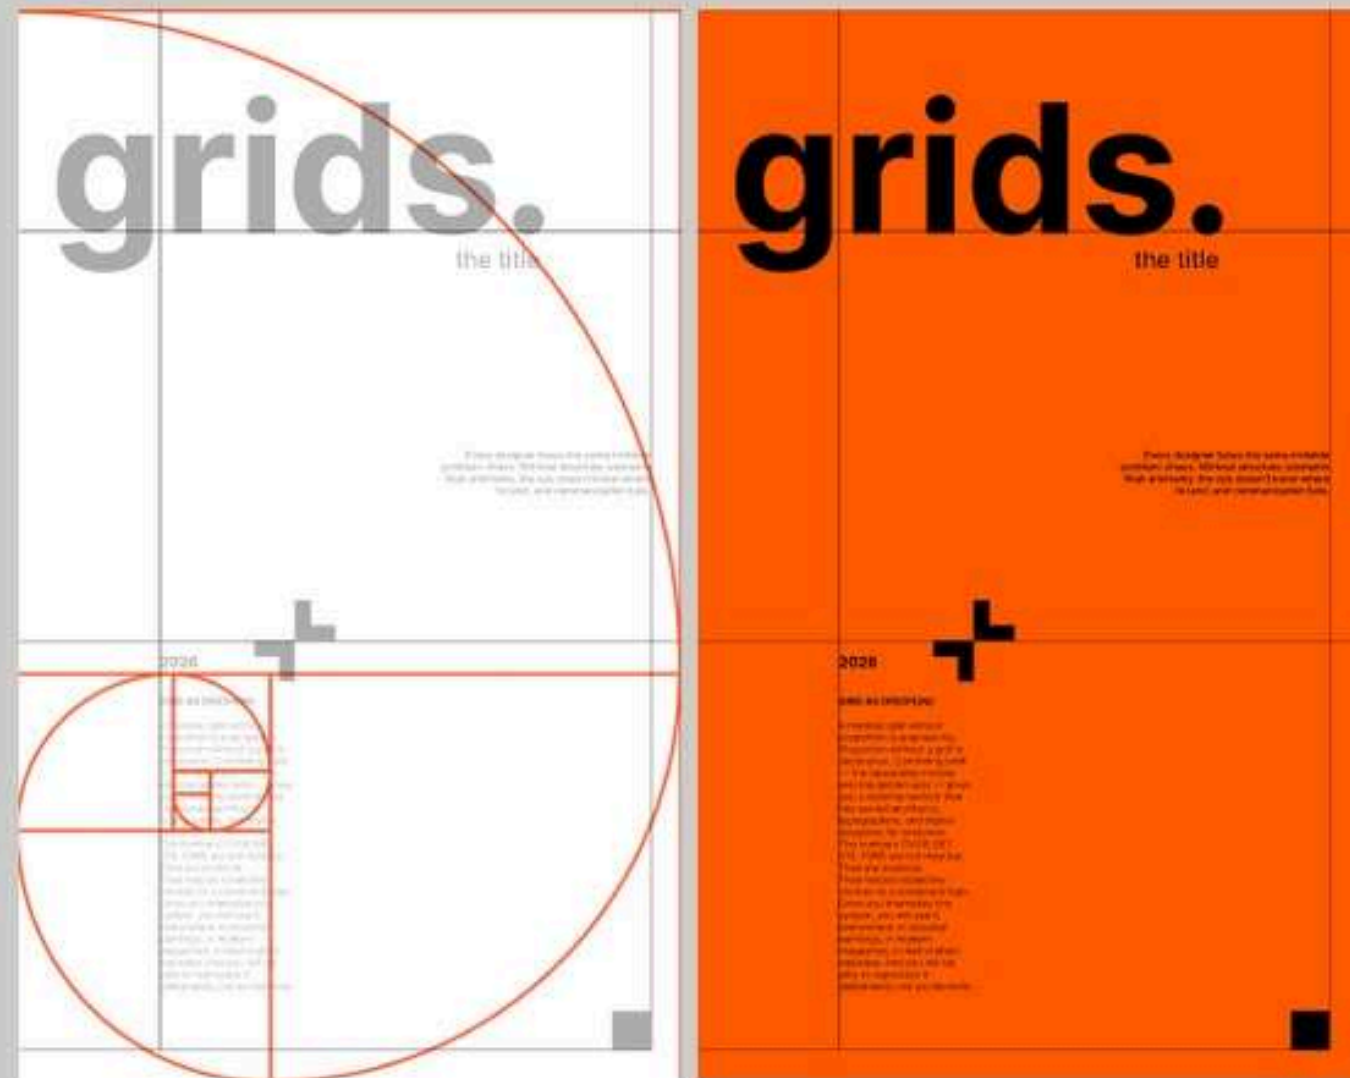

GRIDS

modular grid

A modular grid is a layout structure that divides a page, screen, or space into smaller, repeatable rectangular units called modules using a combination of vertical columns and horizontal rows.

GOLDEN RULE GRID

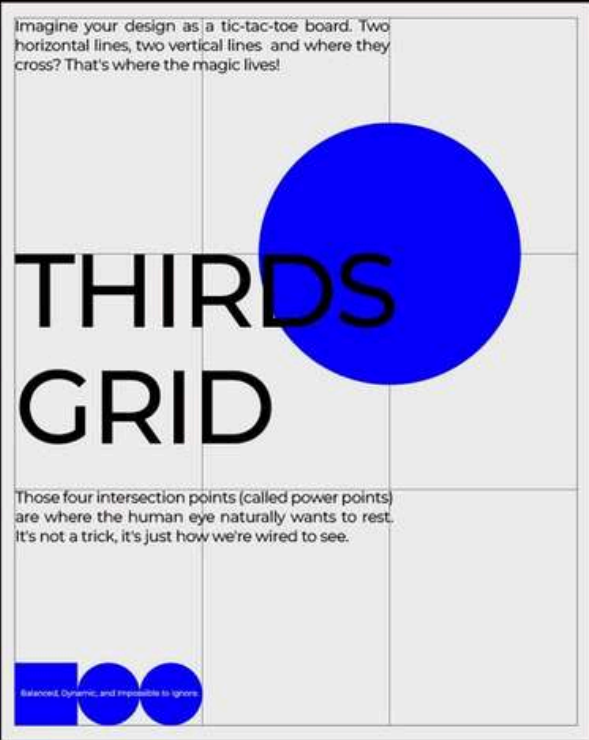

A golden rule grid (also known as a phi grid or golden ratio grid) is a visual composition tool that divides a frame into nine rectangles using an asymmetrical 1:1.618 mathematical proportion

RULE OF THIRDS

Visual Grammar

03/12

The rule of thirds grid is a compositional guideline that divides an image into nine equal parts using two equally spaced horizontal lines and two equally spaced vertical lines. [1]

#1 Rule of Thirds

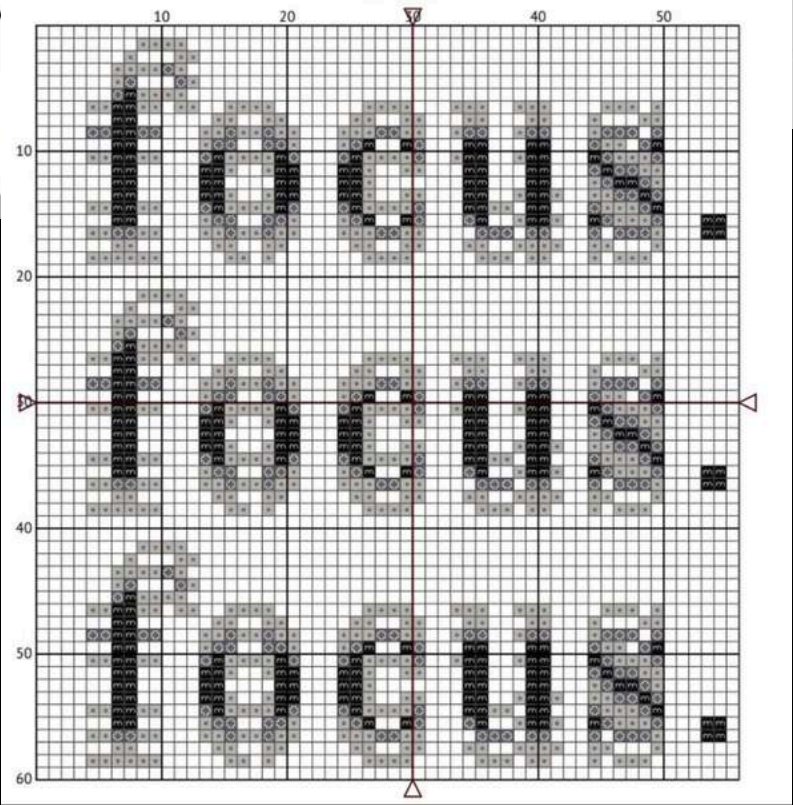

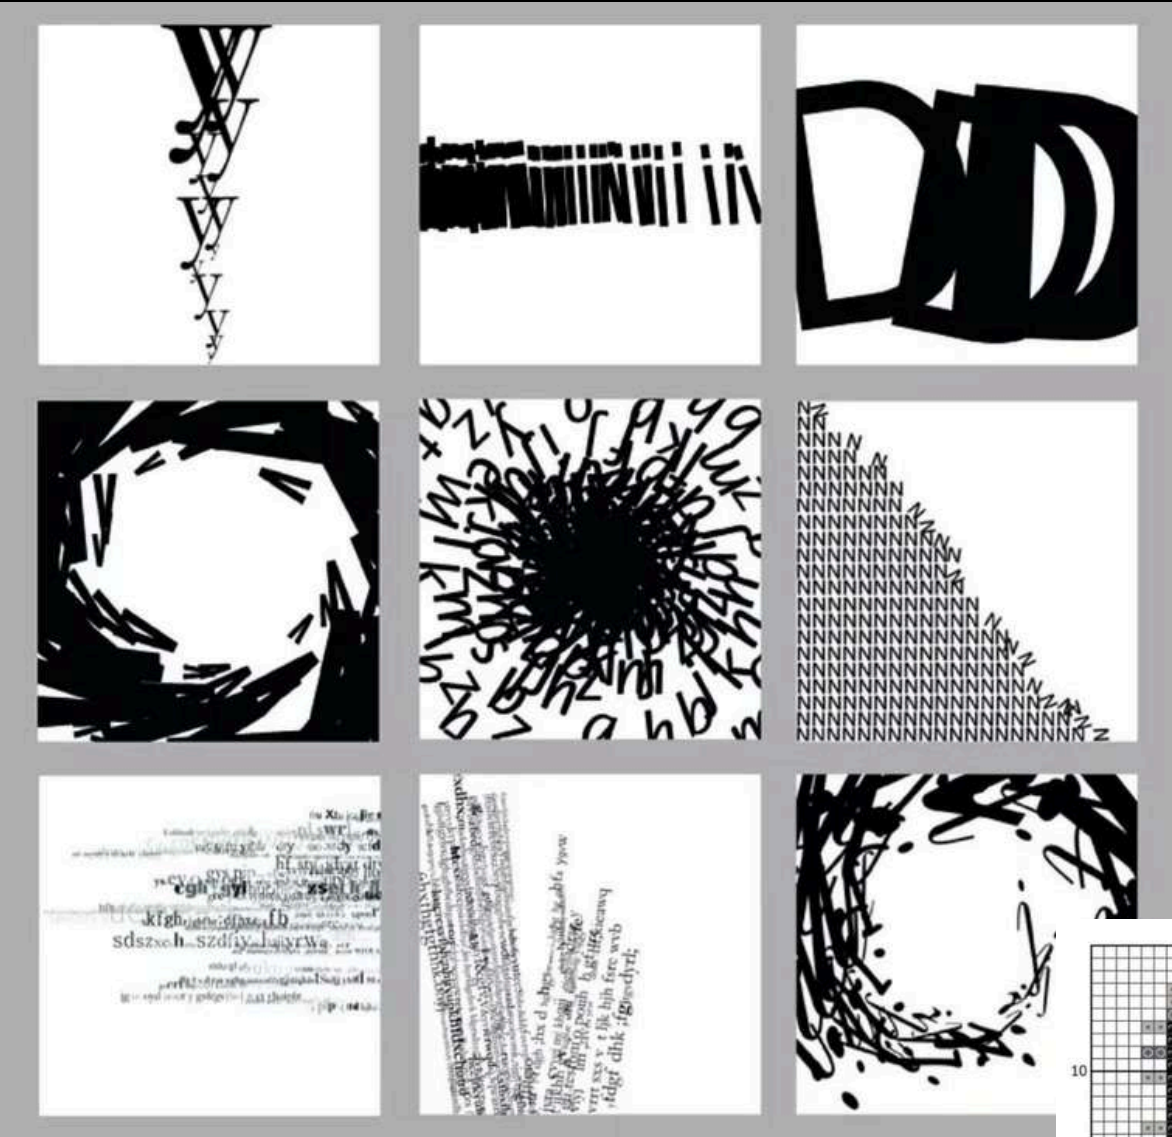

Divide your canvas into 9 equal parts — 3 rows, 3 columns. Place your most important stuff where the lines cross. That's it. Your composition instantly looks more intentional.

GAME RULES

FOR 2 TO 4 PLAYERS / AGES 8 TO ADULT

CONTENTS

Gameboard, 100 letter tiles, letter pouch, 4 tile racks.

OBJECT

In the *SCRABBLE*® game, players form interlocking words, crossword fashion, on the board using letter tiles of different values. Each player competes for high score by taking advantage of the letter tiles, as well as the premium squares on the board. In a 2-player game, a good player scores in the 300-400 point range.

SETUP

Place all letter tiles in the pouch, or facedown beside the board, and mix them up. Draw for first play. The player with the letter closest to “A” plays first. A blank tile beats any letter. Return the letters to the pool and remix. All players draw seven new letters each and place them in their racks.

GAMEPLAY

1. The first player combines two or more of his or her letters to form a word, and places the word on the board to read either across or down with one letter on the center ★ square. Diagonal words are not allowed.
2. Complete your turn by counting and announcing the score for that turn. Then draw as many new letters as you played, always keeping seven letters on your rack, as long as there are enough left in the pouch.
3. Play passes to the left. The second player, and then each in turn, adds one or more letters to those already played to form new words. All letters played on a turn must be placed in one row across or down the board to form at least one complete word. If, at the same time, they touch other letters in adjacent rows, those must form complete words, crossword fashion, with all such letters. The player gets full credit for all words formed or modified on his or her turn.
4. New words may be formed by:
 - a. Adding one or more letters to a word or letters already on the board.

- b. Placing a word at right angles to a word already on the board. The new word must use one of the letters already on the board or must add a letter to it. (See Turns 2, 3 and 4 on page 6.)
 - c. Placing a complete word parallel to a word already played so the adjacent letters also form complete words. (See Turn 5 on page 6.)
5. No tile may be shifted or replaced after it has been played and scored.
 6. **Blanks:** The two blank tiles may be used as any letters. When playing a blank, you must state which letter it represents. It remains that letter for the rest of the game.
 7. You may use a turn to exchange all, some, or none of your letters. To do this, place your discarded letter(s) facedown. Draw the same number of letters from the pool, then mix your discarded letter(s) into the pool. This ends your turn.

8. Before the game begins, players should agree on which dictionary they will use, in case of a challenge. All words labeled as a part of speech (including those listed of foreign origin, and as archaic, obsolete, colloquial, slang, etc.) are permitted with the exception of the following: words always capitalized, abbreviations, prefixes and suffixes standing alone, words requiring a hyphen or an apostrophe.

Any play may be challenged before the next player starts a turn. If the play challenged is unacceptable, the challenged player takes back his or her tiles and loses that turn. If the play challenged is acceptable, the challenger loses his or her next turn. *All* words (not just one) made in one play are challenged simultaneously. If any word is unacceptable, the entire play is unacceptable. Only one turn is lost on any challenge. Consult the dictionary for challenges only.

9. **Ending the Game:** The game ends when all letters have been drawn and one player uses his or her last letter, or when all possible plays have been made.

SCORING

1. The scorekeeper tallies each player’s score, entering it after each turn. The score value of each letter is indicated by a number at the bottom of the tile. The score value of a blank is zero.
2. The score for each turn is the sum of the letter values in each word(s) formed or modified on that turn, plus the additional points obtained from placing letters on premium squares.
3. **Premium Letter Squares:** A light blue square doubles the score of a letter placed on it; a dark blue square triples the letter score.
4. **Premium Word Squares:** The score for an entire word is doubled when one of its letters is placed on a pink square; it is tripled when one of its letters is placed on a red square. Include premiums for double or triple letter values, if any, *before* doubling or tripling the word score.

If a word covers two premium word squares, the score is doubled and then re-doubled (4 times the letter count), or tripled and then re-tripled (9 times the letter count).

NOTE: The center ★ square is a pink square, which doubles the score for the first word.

10 Ways to Become an Instant SCRABBLE® Game Expert

There’s no doubt about it — it takes a stellar vocabulary and super strategies to become a SCRABBLE expert. Looking for instant results? These tips from seasoned SCRABBLE players could help you rule the board!

1. TWO- AND THREE-LETTER WORDS

Learn the 2-letter and 3-letter words. They are the building blocks of expert play and can boost your average score by as much as 50 points per game.

2. SECRET OF THE “S”

Use an S to form two words at once. Pluralize one word while forming another at the same time. Hint: Use your S wisely. Don’t add it unless you can earn at least 8 points by doing so.

3. SHUFFLE TILES

Shuffle the tiles on your rack frequently. Look for some common ways that letters go together. Some of these are BR, CH, CL, DLE, ED, ENT, EST, FUL, GHT, ING, NK, KLE, MIS, ISM, IUM, MB, MP, ND, NT, PR, PL, RE, STR, TH, UN, IVE and OUS. As you form these combinations, it may surprise you how words will often appear on your rack when you least expect them.

4. BONUS SQUARES

Always look for ways to play across premium squares. Check especially for premium squares next to vowels.

5. CONSIDER YOUR NEXT PLAY

Make your play with an eye toward your next play. You can do so simply by saving some good tiles on your rack. Your best chance of having a great next rack is to save some combination of the letters “AEILNRST” (hint: think “starline”), ideally saving either the same number of vowels and consonants, or just one extra consonant.

6. BINGO’S

Always look for Bingo’s (using all 7 tiles at once). Optimism and know-how will mean more 50-point bonuses. Learn common word beginnings and endings and know how to place them on your rack.

7. Q WITHOUT U

Learn the Q-without-U words. The Official SCRABBLE Players Dictionary (third edition) lists these: QAT(S), QAID(S), QOPH(S), FAQIR(S), QANAT(S), TRANQ(S), QINDAR(S), QINTAR(S), QWERTY(S), SHEQEL, QINDARKA and SHEQALIM.

8. LOOK FOR HOOKS

“Hooks” are single letters that you can add to existing words that form other words. We’ve already mentioned the “S hook,” but also look for words you could end with a Y, E, R or D. Example: HAND(Y), PLAN(E), TAME(D, R).

9. CHOICE OF PLAYS

After you find a good play, if you have time, look for a better one. Always try to give yourself a choice of plays. By exercising your decision-making abilities, you’ll likely develop keener strategic skills.

10. ATTITUDE

Keep in mind that anyone can beat anyone else with a certain amount of luck. Also remember that everyone draws poor combinations of tiles at times, so when you do, take pleasure in making the best play you can. Finally, don’t dwell on your mistakes. Everyone makes them, so go easy on yourself and just enjoy playing!

COLLECTORS GUID

41638

5. Letter and word premiums count *only* on the turn in which they are played. On later turns, letters already played on premium squares count at face value.
6. When a *blank* tile is played on a pink or red square, the value of the *word* is doubled or tripled, even though the blank itself has no score value.
7. When two or more words are formed in the same play, each is scored. The common letter is counted (with full premium value, if any) for each word. (See Turns 3, 4 and 5 on page 4.)
8. BINGO! If you play seven tiles on a turn, it's a Bingo. You score a premium of 50 points *after* totaling your score for the turn.
9. **Unplayed Letters:** When the game ends, each player's score is *reduced* by the sum of his or her unplayed letters. In addition, if a player used all his or her letters, the sum of the other players' unplayed letters is *added* to that player's score.

HOW TO WIN

The player with the highest final score wins the game. In case of a tie, the player with the highest score *before* adding or deducting unplayed letters wins.

RULES FOR SHORTER GAMEPLAY

New SCRABBLE game players should find these versions faster and more inviting than the standard version.

9-TILE SCRABBLE GAME

This variant is identical to the original game except players have 9 tiles on their racks instead of the usual 7. You score a 50-point Bingo bonus for using 7, 8, or all 9 tiles on your rack.

FINISH LINE SCRABBLE GAME

In this variant, the game is over when one player reaches a pre-decided score, no matter how many tiles are left. This variant allows mixed play-level groups, as the score needed to win depends on the level of the player (Beginner, Intermediate, or Expert). Here are the points needed to win the game.

	Beginner	Intermediate	Expert
Two Players	70	120	200
Three Players	60	100	180
Four Players	50	90	160

If players of the same level are playing, each needs to reach the same score. For example, two Intermediate players would be playing to 120 and four Beginners would each be playing to 50.

COLLECTORS GUIDE

GAME
RULES

2-4 players / ages 8 to adult

- Gameboard
- 100 letter tiles
- Letter pouch
- 4 tile racks

contents

01

In the SCRABBLE® game, players form interlocking words crossword fashion on the board using letter tiles of different values. Each player competes for high score by taking advantage of the letter tiles, as well as the premium squares on the board. In a 2-player game, a good player scores in the 300-400 point range.

Object

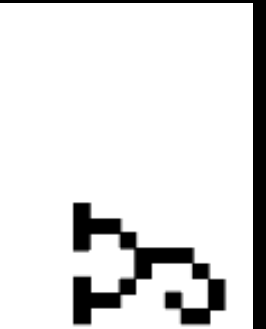

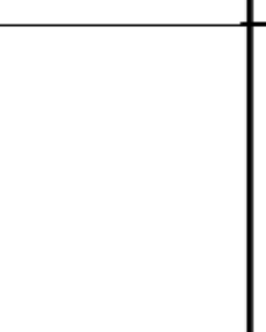

02

Place all letter tiles in the pouch or facedown beside the board and mix them up. Draw for first play. The player with the letter closest to "A" plays first. A blank tile beats any letter. Return the letters to the pool and remix. All players draw seven new letters each and place them in their racks.

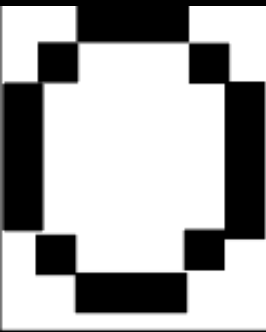

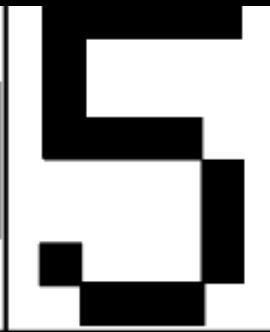

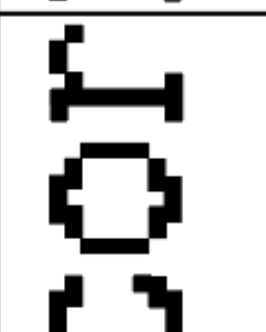

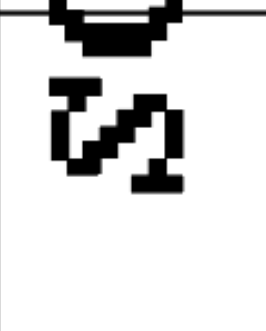

03

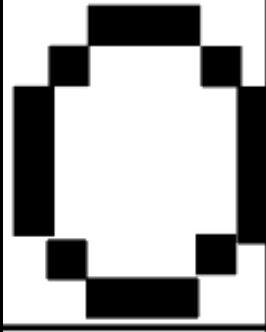

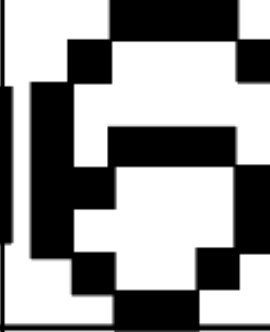

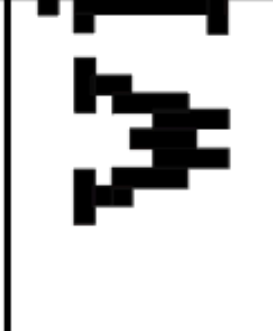

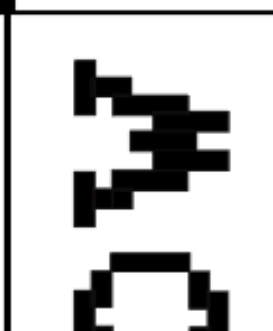

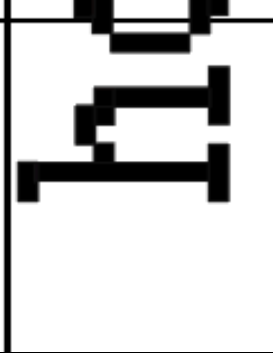

Setup

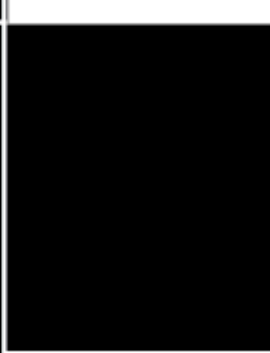

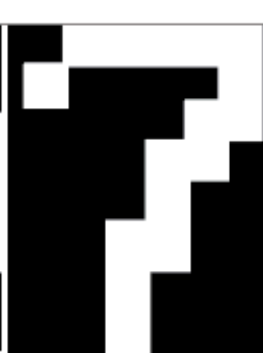

COLLECTORS GUIDE

03 . Play passes to the left the second player, and then each in turn adds one or more letters to those already played to form new words All letters played on a turn must be placed in one row across or down the board to form at least one complete word If, at the same time, they touch other letters in adjacent rows those must form complete words crossword fashion with all such letters The player gets full credit for all words formed or modified on his or her turn .	01 . The first player combines two or more of his or her letters to form a word and places the word on the board to read either across or down with one letter on the center square Diagonal words are not allowed	02 . Complete your turn by counting and announcing the score for that turn Then draw as many new letters as you played always keeping seven letters on your rack as long as there are enough left in the pouch .		04 . New words may be formed by . .		05 . No tile may be shifted or replaced after it has been played and scored		07 . You may use a turn to exchange all some, or none of your letters To do this place your discarded letter(s) facedown Draw the same number of letters from the pool then mix your discarded letter(s) into the pool This ends your turn .	08 . Before the game begins, players should agree on which dictionary they will use, in case of a challenge All words labeled as a part of speech (including those listed of foreign origin and as archaic obsolete colloquial slang etc) are permitted with the exception of the following words always capitalized abbreviations prefixes and suffixes standing alone words requiring a hyphen or an apostrophe Any play may be challenged before the next player starts a turn If the play challenged is unacceptable, the challenged player takes back his or her tiles and loses that turn If the play challenged is acceptable, the challenger loses his or her next turn All words (not just one) made in one play are challenged simultaneously If any word is unacceptable, the entire play is unacceptable Only one turn is lost on any challenge Consult the dictionary for challenges only	
				a Adding one or more letters to a word or letters already on the board .						
				b Placing a word at right angles to a word already on the board The new word must use one of the letters already on the board or must add a letter to it		06 . COLLECTORS GUIDE

Ways to become an
instant SCRABBLE
expert!

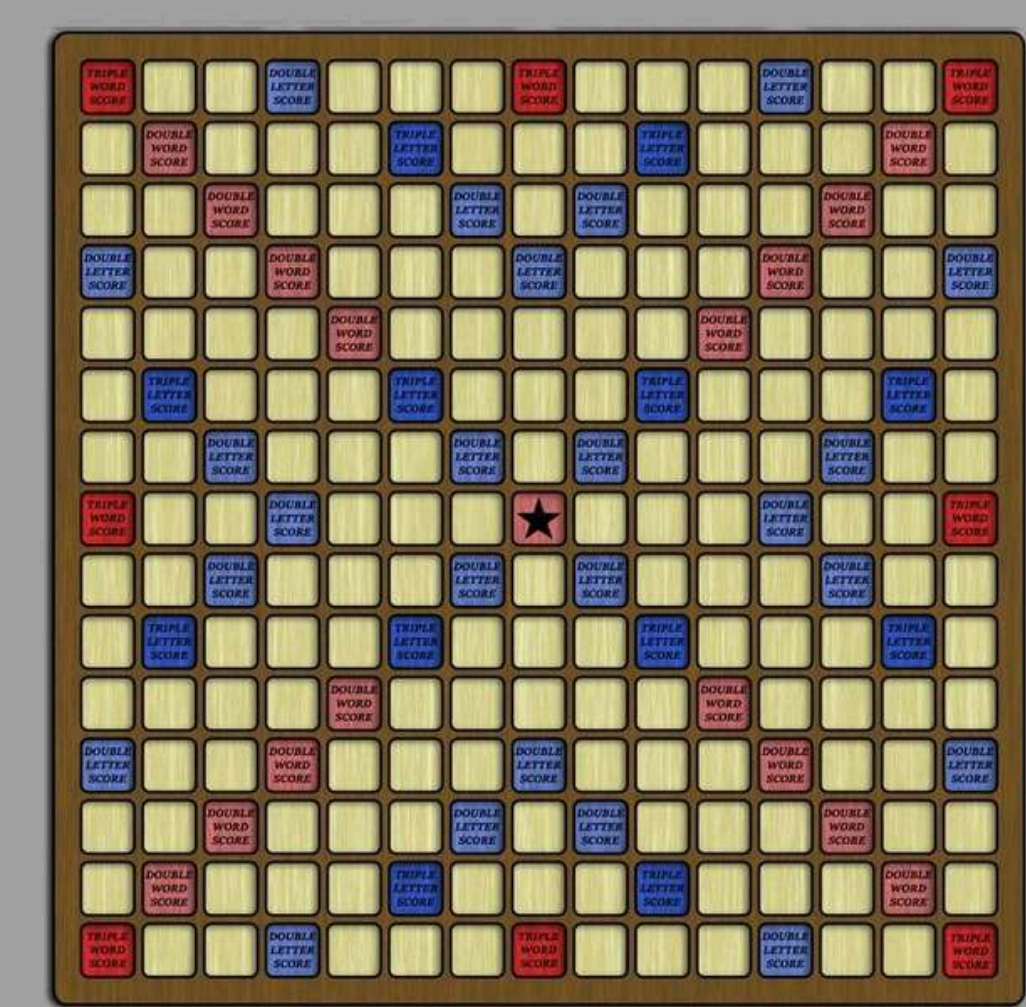

There's no doubt about it- it takes a stellar vocabulary and super strategies to become a SCRABBLE expert. Looking for instant results? These tips from seasoned SCRABBLE players could help you rule the board!

1 TWO AND THREE LETTER WORDS Learn the 2-letter and 3-letter words. They are the building blocks of expert play and can boost your average score by as much as 50 points per game.		2 SECRET OF THE 'S' Use an S to form two words at once. Pluralize one word while forming another at the same time. Hint: Use your S wisely. Don't add it unless you can earn at least 8 points by doing so.	
	4 BONUS SQUARES Always look for ways to play across premium squares. Check especially for premium squares next to vowels.		5 CONSIDER YOUR NEXT PLAY Make your play with an eye toward your next play. You can do so simply by saving some good tiles on your rack. Your best chance of having a great next rack is to save some combination of the letters "AEILNRST" (hint: think "starline"). Ideally, saving either the same number of vowels and consonants, or just one extra consonant.
3 SHUFFLE TILES Shuffle the tiles on your rack frequently. Look for some common ways that letters go together. Some of these are BR, CH, CL, DL, EN, ENT, EST, FUL, GHT, ING, NK, KL, MIS, ISM, IUM, MR, MP, ND, NT, PR, PL, RE, STR, TH, UN, IVE and OUS. As you form these combinations, it may surprise you how words will often appear on your rack when you least expect them.			
			6 BINGO'S Always look for Bingo's (using all 7 tiles at once). Optimism and know-how will mean more 50-point bonuses. Learn common word beginnings and endings and know how to place them on your rack.

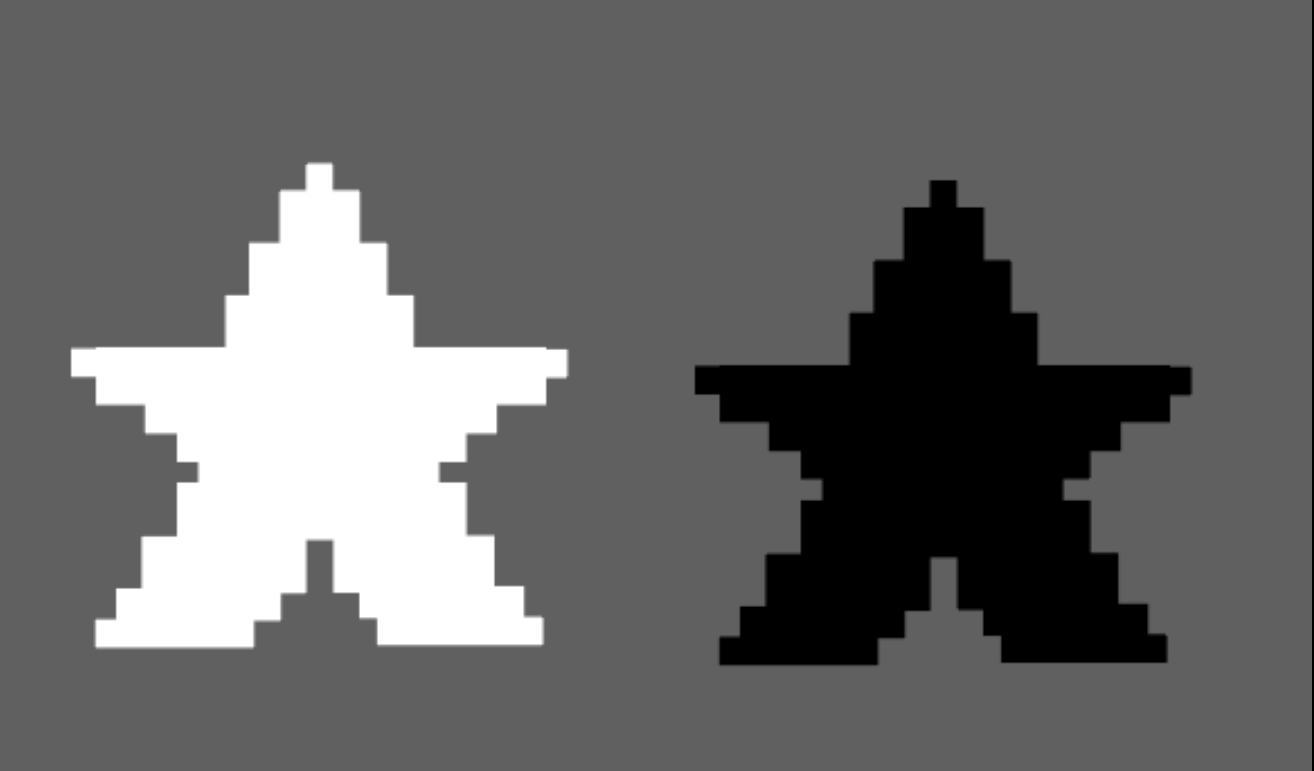

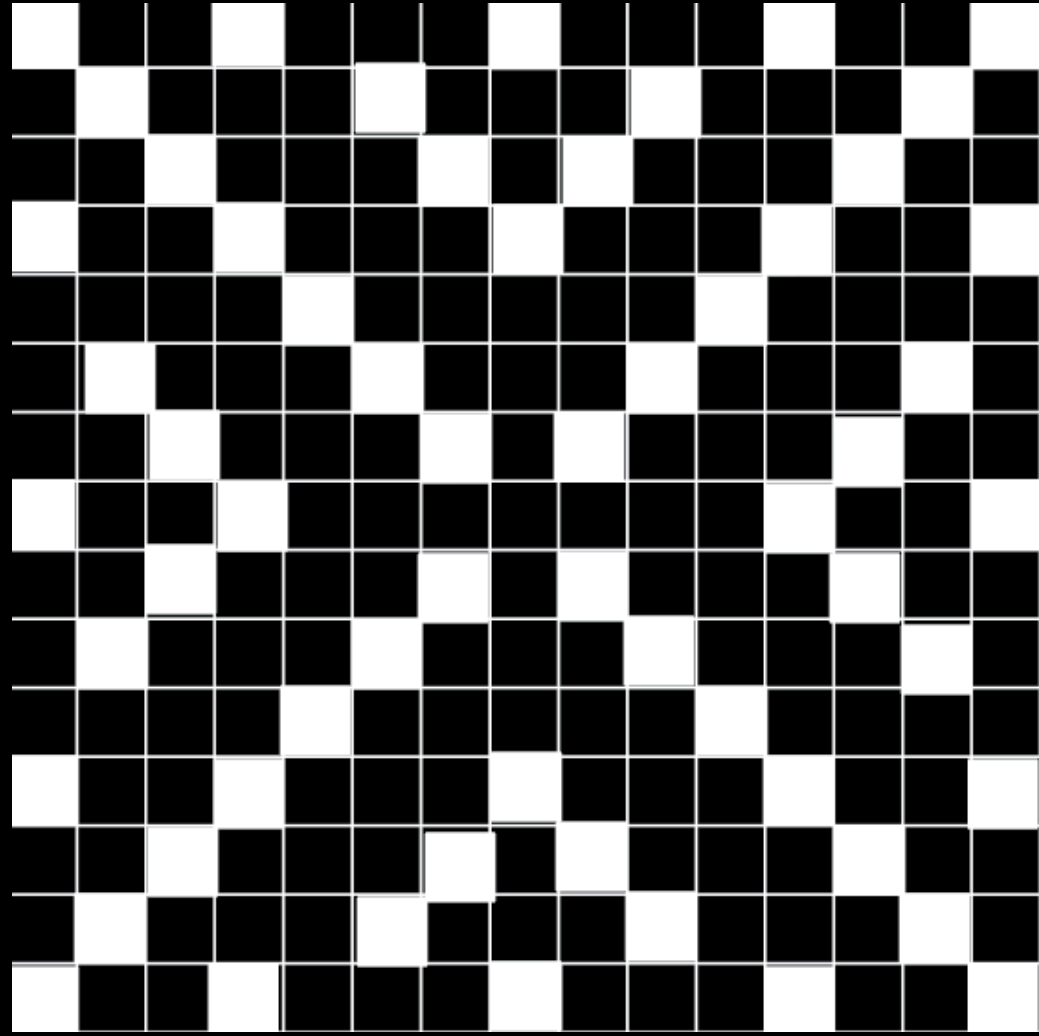

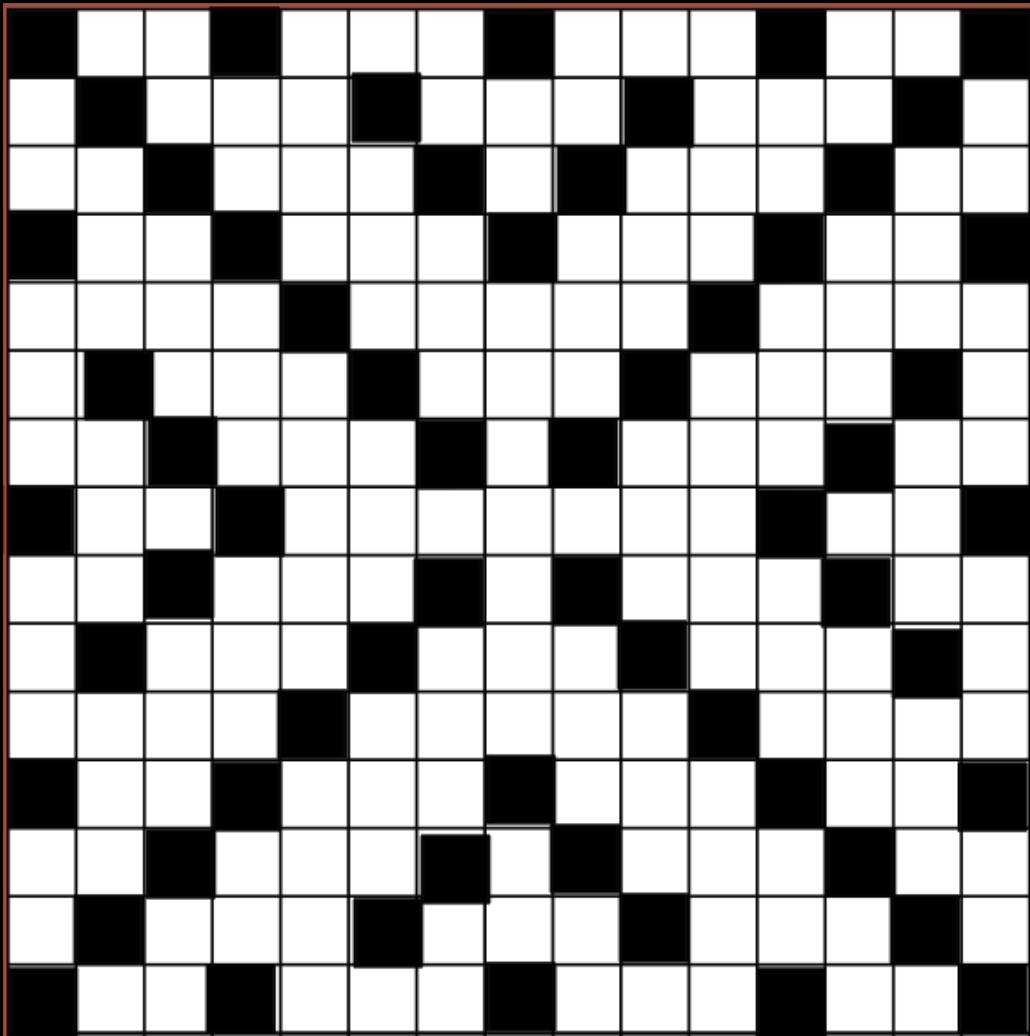

6 BINGO'S 7 Q WITHOUT U Learn the Q-without-U words. The Official SCRABBLE Players Dictionary (third edition) lists these: QAT(S), QATKS(S), QOPHS(S), FACIRS(S), QANAT(S), TRANQS(S), QINDARS(S), QINTAR(S), QWERTY(S), SHEQEL, QINDARKA and SHEQALIM.			8 BINGO'S 9 LOOK FOR HOOKS 'Hooks' are single letters that you can add to existing words that form other words. We've already mentioned the 'S hook,' but also look for words you could end with a V, Z, R or D. Example: SPANDY, PLANCE, TAMEO, R.
			10 ATTITUDE Keep in mind that anyone can beat anyone else with a certain amount of luck. Also remember that everyone draws poor combinations of tiles at times, so when you do take pleasure in making the best play you can. Finally, don't dwell on your mistakes. Everyone makes them, so go easy on yourself and just enjoy playing!
6 BINGO'S 9 CHOICE OF PLAYS After you find a good play, if you have time, look for a better one. Always try to give yourself a choice of plays. By exercising your decision-making abilities, you'll likely develop keener strategic skills.

There's no doubt about it - it takes a stellar vocabulary and super strategies to become a SCRABBLE expert. Looking for instant results? These tips from seasoned SCRABBLE players could help you rule the board!

MAKE GRID LINES MORE CLEAN :

			
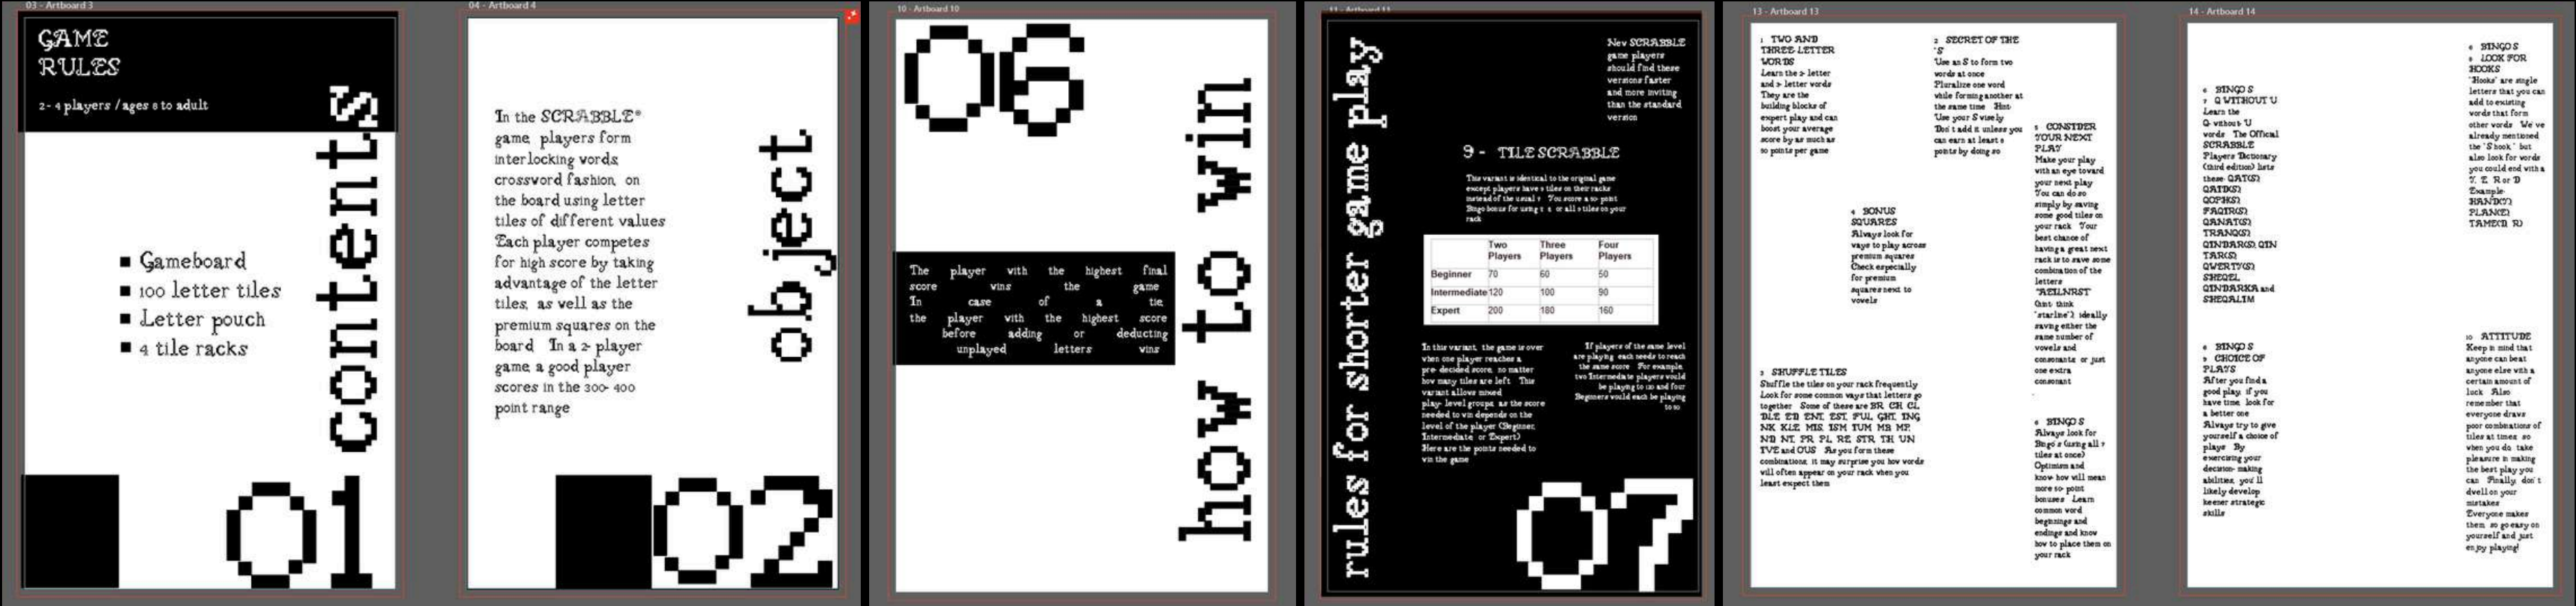

The scorekeeper tallies each player's score, entering it after each turn. The score value of each letter is indicated by a number at the bottom of the tile. The score value of a blank is zero.	The score for each turn is the sum of the letter values in each word(s) formed or modified on that turn, plus the additional points obtained from placing letters on premium squares.	Premium Letter Squares A light blue square doubles the score of a letter placed on it; a dark blue square triples the letter score.	
BINGO! If you play seven tiles on a turn, it's a Bingo. You score a premium of 50 points after totaling your score for the turn.	Letter and word premiums count only on the turn in which they are played. On later turns, letters already played on premium squares count at face value.	Premium Word Squares The score for an entire word is doubled when one of its letters is placed on a pink square; it is tripled when one of its letters is placed on a red square. Include premiums for double or triple letter values, if any, before doubling or tripling the word score. If a word covers two premium word squares, the score is doubled (4 times the letter count) or tripled (6 times the letter count). NOTE The center square is a pink square, which doubles the score for the first word.	
	Unplayed Letters When the game ends, each player's score is reduced by the sum of his or her unplayed letters. In addition, if a player used all his or her letters, the sum of the other players' unplayed letters is added to that player's score.		
		When two or more words are formed in the same play, each is scored. The common letter is counted (with full premium value, if any) for each word. (See Turns 1, 4 and 5 on	

07 . You may use a turn to exchange all some or none of your letters. To do this, place your discarded letter(s) facedown. Draw the same number of letters from the pool, then mix your discarded letter(s) into the pool. This ends your turn.	08 . Before the game begins, players should agree on which dictionary they will use in case of a challenge. All words labeled as a part of speech (including those listed of foreign origin and as archaic, obsolete, colloquial, slang, etc.) are permitted with the exception of the following words: always, capitalized, abbreviations, prefixes and suffixes standing alone, words requiring a hyphen or an apostrophe. Any play may be challenged before the next player starts a turn. If the play challenged is unacceptable, the challenged player takes back his or her tiles and loses that turn. If the play challenged is acceptable, the challenger loses his or her next turn. All words (not just one) made in one play are challenged simultaneously. If any word is unacceptable, the entire play is unacceptable. Only one turn is lost on any challenge. Consult the dictionary for challenges only.	
		
	09 . Ending the Game The game ends when all letters have been drawn and one player uses his or her last letter, or when all possible plays have been made.	

	01 . The first player combines two or more of his or her letters to form a word and places the word on the board to read either across or down with one letter on the center square. Diagonal words are not allowed.	02 . Complete your turn by counting and announcing the score for that turn. Then draw as many new letters as you played, always keeping seven letters on your rack, as long as there are enough left in the pouch.	
			
03 . Play passes to the left the second player, and then each in turn, adds one or more letters to those already played to form new words. All letters played on a turn must be placed in one row across or down the board to form at least one complete word. If, at the same time, they touch other letters in adjacent rows, those must form complete words crossword fashion with all such letters. The player gets full credit for all words formed or modified on his or her turn.

Blanks
The two blank tiles may be used as any letters. When playing a blank, you must state which letter it represents. It remains that letter for the rest of the game.

உயிர்

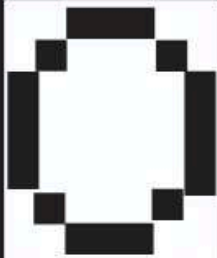

You may use a turn to exchange all some, or none of your letters To do this place your discarded letter(s) facedown Draw the same number of letters from the pool then mix your discarded letter(s) into the pool This ends your turn .

Before the game begins, players should agree on which dictionary they will use, in case of a challenge. All words labeled as a part of speech (including those listed of foreign origin and as archaic, obsolete, colloquial, slang, etc.) are permitted with the exception of the following words: always, capitalized, abbreviations, prefixes and suffixes standing alone, words requiring a hyphen or an apostrophe. Any play may be challenged before the next player starts a turn. If the play challenged is unacceptable, the challenged player takes back his or her tiles and loses that turn. If the play challenged is acceptable, the challenger loses his or her next turn. All words (not just one) made in one play are challenged simultaneously. If any word is unacceptable, the entire play is unacceptable. Only one turn is lost on any challenge. Consult the dictionary for challenges only.

2	6	7
---	---	---

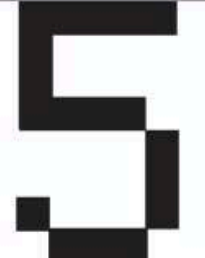

உரு

Ending the Game: The game ends when all letters have been drawn and one player uses his or her last letter, or when all possible plays have been made.

The scorekeeper tallies each player's score, entering it after each turn. The score value of each letter is indicated by a number at the bottom of the tile. The score value of a blank is zero.

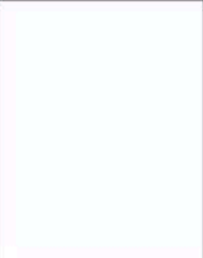

BINGO! If you play seven tiles on a turn, it's a Bingo. You score a premium of 50 points after totaling your score for the turn.

The score for each turn is the sum of the letter values in each word(s) formed or modified on that turn, plus the additional points obtained from placing letters on premium squares.

Letter and word premiums count only on the turn in which they are played. On later turns, letters already played on premium squares count at face value.

Unplayed Letters
When the game ends, each player's score is reduced by the sum of his or her unplayed letters. In addition, if a player used all his or her letters, the sum of the other players' unplayed letters is added to that player's score.

Premium Letter Squares
A light blue square doubles the score of a letter placed on it; a dark blue square triples the letter score.

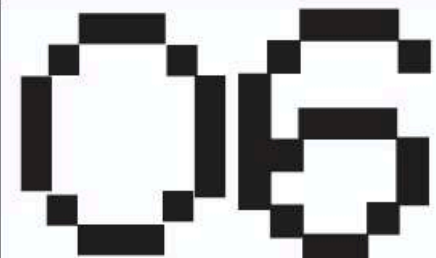

Premium Word Squares
The score for an entire word is doubled when one of its letters is placed on a pink square; it is tripled when one of its letters is placed on a red square. Include premiums for double or triple letter values, if any, before doubling or tripling the word score. If a word covers two premium word squares, the score is doubled, and then re-doubled (4 times the letter count), or tripled and then re-tripled (6 times the letter count).
NOTE: The center square is a pink square, which doubles the score for the first word.

06

07

When two or more words are formed in the same play, each is scored. The common letter is counted (with full premium value, if any) for each word. (See Turns 3, 4 and 5 on

Win to win

rules for shorter game play

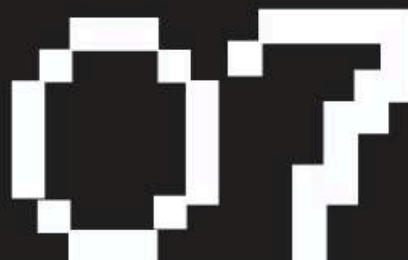

9 - TILE SCRABBLE

This variant is identical to the original game except players have 9 tiles on their racks instead of the usual 7. You score a 50-point Bingo bonus for using 7, 4, or all 9 tiles on your rack.

	Two Players	Three Players	Four Players
Beginner	70	60	50
Intermediate	120	100	90
Expert	200	180	160

In this variant, the game is over when one player reaches a pre-decided score, no matter how many tiles are left. This variant allows mixed play-level groups, as the score needed to win depends on the level of the player (Beginner, Intermediate, or Expert). Here are the points needed to win the game:

If players of the same level are playing, each needs to reach the same score. For example, two Intermediate players would be playing to 120 and four Beginners would each be playing to 50.

New SCRABBLE game players should find these versions faster and more inviting than the standard version.

Ways to become an instant SCRABBLE expert!

There's no doubt about it - it takes a stellar vocabulary and super strategies to become a SCRABBLE expert. Looking for instant results? These tips from seasoned SCRABBLE players could help you rule the board!

6 BINGO S
7 Q WITHOUT U
Learn the Q- without- U words. The Official SCRABBLE Players Dictionary (third edition) lists these: QAT(S) QATKS) QOPHS) FAQTR(S) QANAT(S) TRANQS) QINDAR(S) QIN TAR(S) QWERTY(S) SHEQEL QINDARKA and SHEQALIM

6 BINGO S
9 CHOICE OF PLAYS
After you find a good play, if you have time, look for a better one. Always try to give yourself a choice of plays. By exercising your decision- making abilities, you'll likely develop keener strategic skills.

6 BINGO S
8 LOOK FOR HOOKS
"Hooks" are single letters that you can add to existing words that form other words. We've already mentioned the "S hook," but also look for words you could end with a Y, Z, R or D. Example: HANDY) PLANE) TAME(D R)

10 ATTITUDE
Keep in mind that anyone can beat anyone else with a certain amount of luck. Also remember that everyone draws poor combinations of tiles at times, so when you do, take pleasure in making the best play you can. Finally, don't dwell on your mistakes. Everyone makes them, so go easy on yourself and just enjoy playing!

1 TWO- AND THREE- LETTER WORDS
Learn the 2- letter and 3- letter words. They are the building blocks of expert play and can boost your average score by as much as 50 points per game.

4 BONUS SQUARES
Always look for ways to play across premium squares. Check especially for premium squares next to vowels.

3 SHUFFLE TILES
Shuffle the tiles on your rack frequently. Look for some common ways that letters go together. Some of these are BR, CH, CL, DL, E, EN, ENT, EST, FUL, GHT, ING, NK, KL, MIS, ISM, IUM, MB, MP, ND, NT, PR, PL, RE, STR, TH, UN, TVE and OUS. As you form these combinations, it may surprise you how words will often appear on your rack when you least expect them.

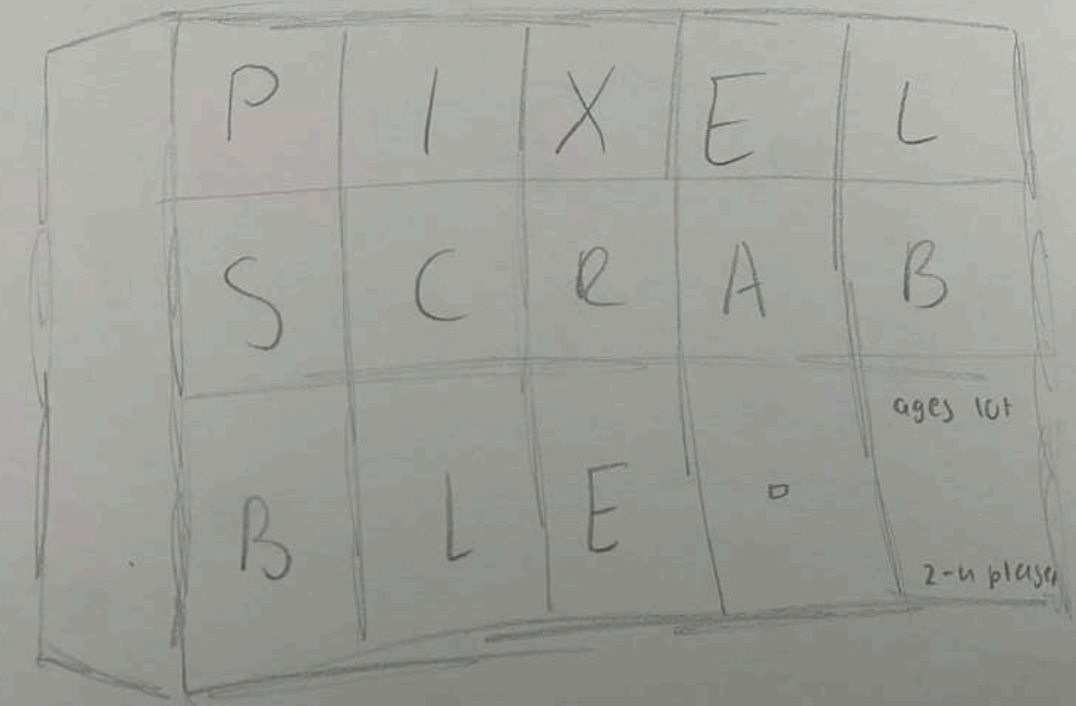

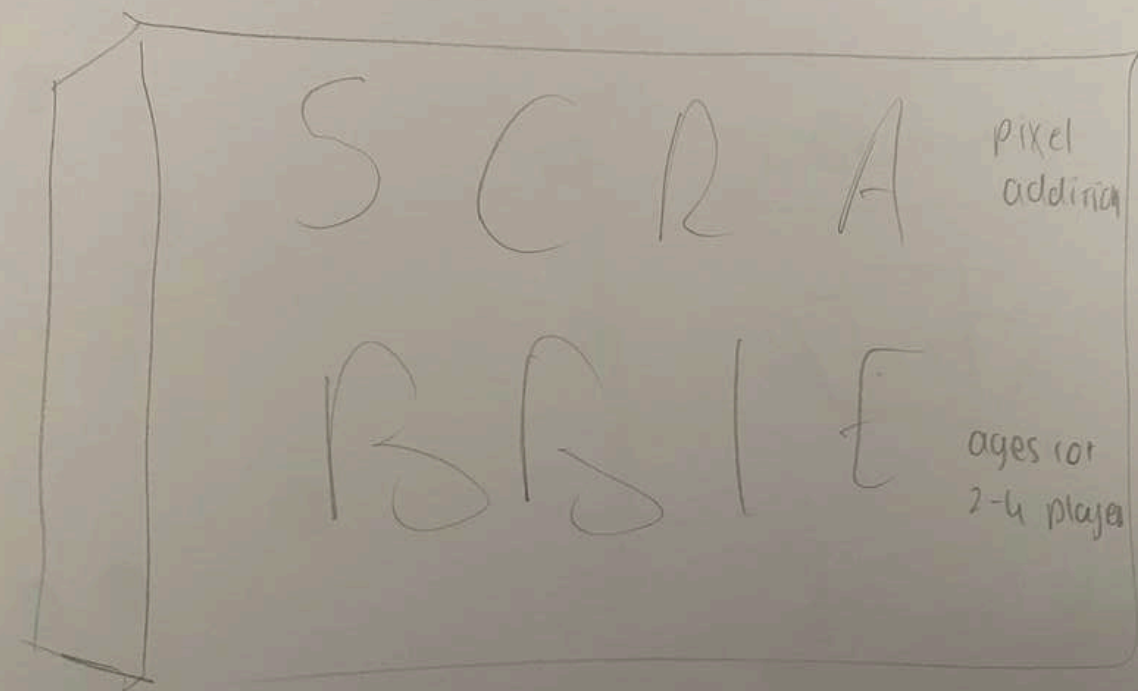

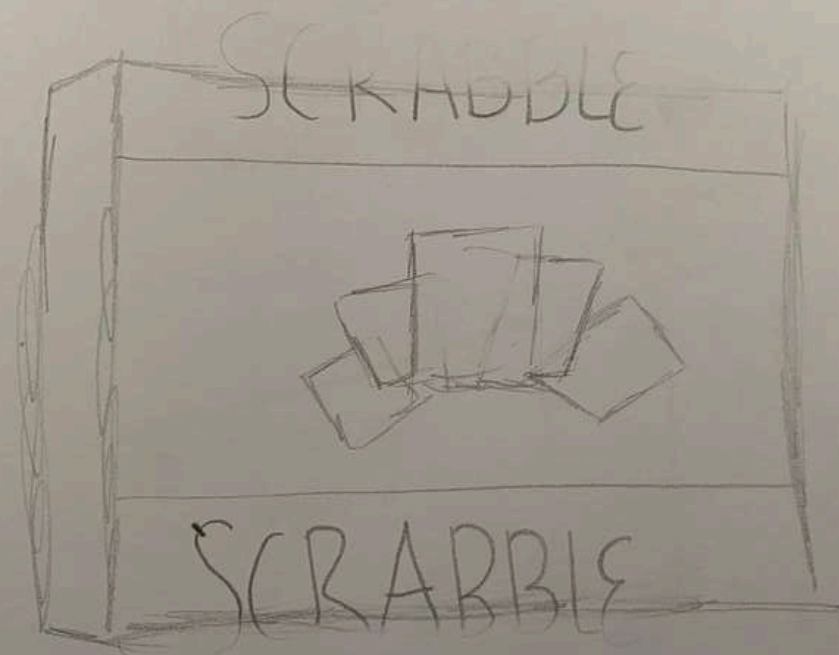

2 SECRET OF THE "S"
Use an S to form two words at once. Pluralize one word while forming another at the same time. Hint: Use your S wisely. Don't add it unless you can earn at least 8 points by doing so.

5 CONSIDER YOUR NEXT PLAY
Make your play with an eye toward your next play. You can do so simply by saving some good tiles on your rack. Your best chance of having a great next rack is to save some combination of the letters "A E I L N R S T". (Hint: think "starline") Ideally, saving either the same number of vowels and consonants, or just one extra consonant.

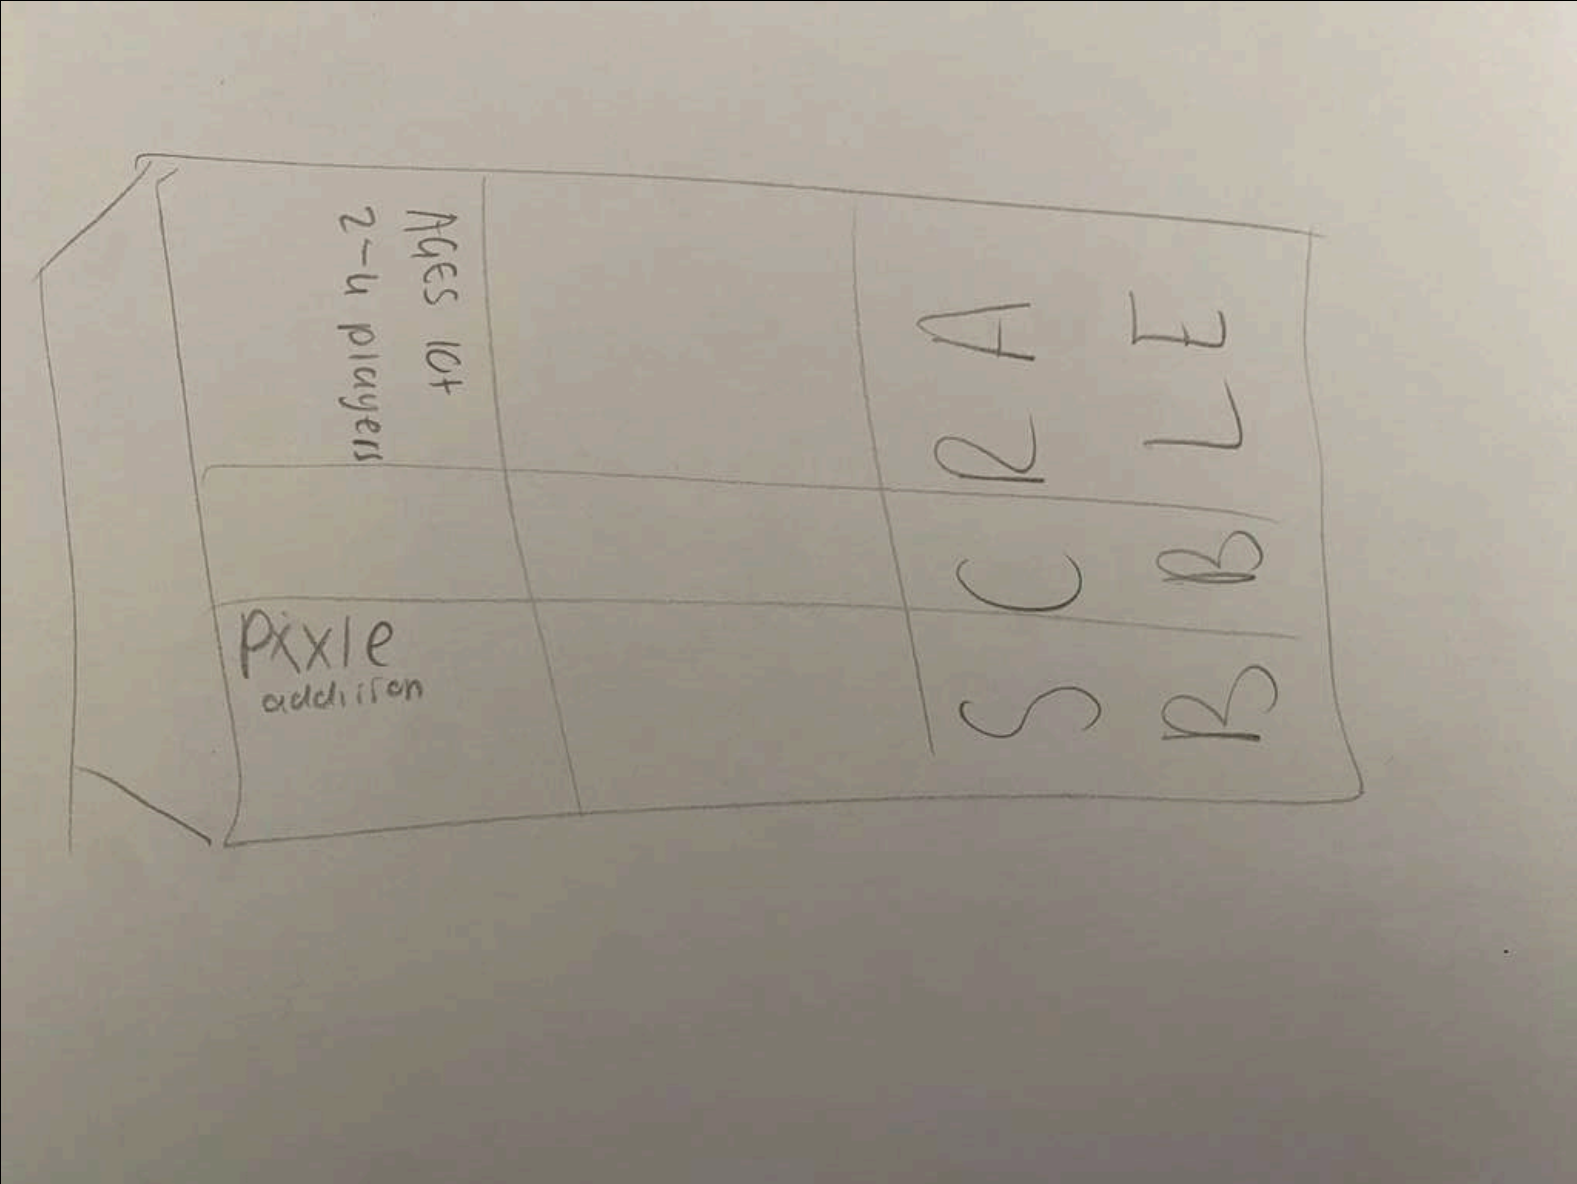

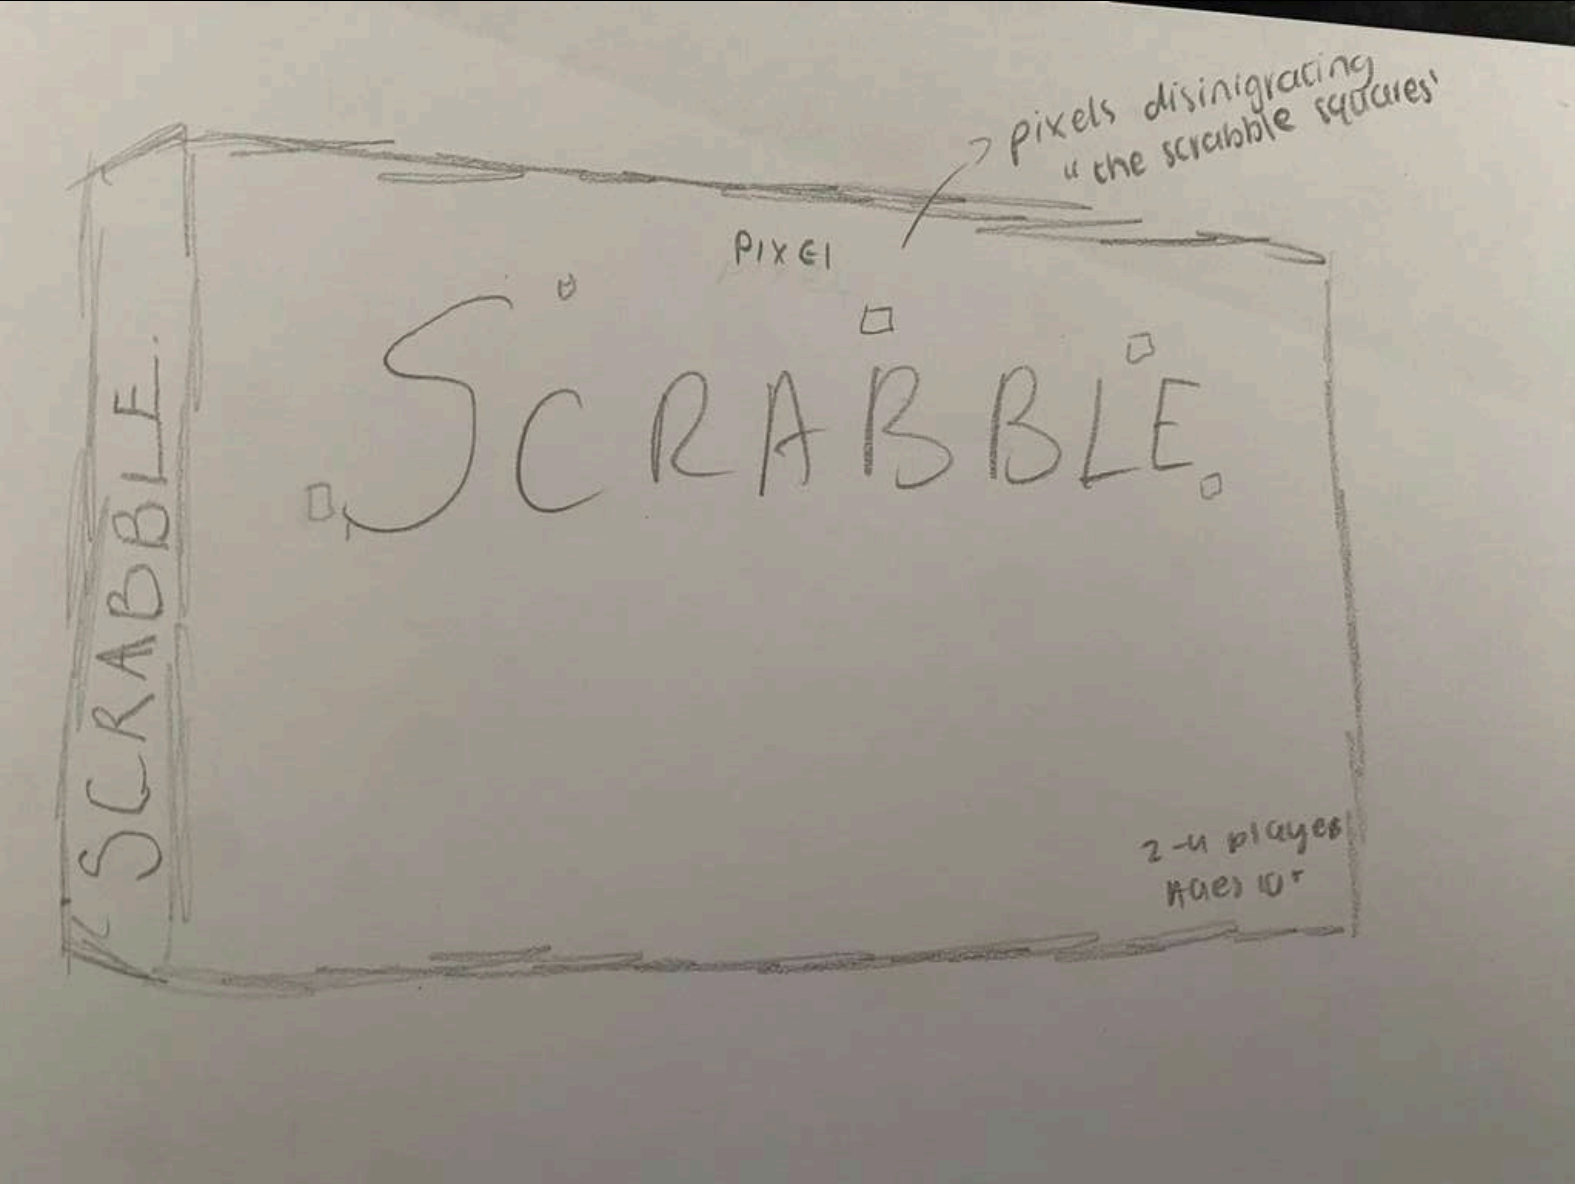

6 BINGO S
Always look for Bingo's (using all 7 tiles at once). Optimism and know-how will mean more 50- point bonuses. Learn common word beginnings and endings and know how to place them on your rack.
